Schwitters have built this text's reputation on clear and concise exposition, numerous examples, and plentiful problem sets. This traditional text consistently reinforces the following common thread: learn a skill; practice the skill to help solve equations; and then apply what you have learned to solve application problems. This simple, straightforward approach has helped many students grasp and apply fundamental problem-solving skills necessary for future mathematics courses. Algebraic ideas are developed in a logical sequence,

and in an easy-to-read manner, without excessive vocabulary and formalism. The open and uncluttered design helps keep students focused on the concepts while minimizing distractions. Problems and examples reference a broad range of topics, as well as career areas such as electronics, mechanics, and health, showing students that mathematics is part of everyday life. The text's resource package--anchored by Enhanced WebAssign, an online homework management tool--saves instructors time while

providing additional help and skill-building practice for students outside of class. Algebra, 4/e, retains the hallmark features for which the Larson team is known: abundant, high-quality applications; the use of real data; the integration of visualization (figures and graphs) throughout; and extensive opportunities for self-assessment (mid-chapter quizzes, review exercises,

tests, and cumulative tests). What You Should Learn orients students to each section by listing the main objectives. Why You Should Learn It provides a motivational explanation for learning the given objectives. What Did You Learn? following each chapter highlights key mathematical terms and concepts. For solving from easy reference, Key Terms are correlated to the chapter by page number, while Key Concepts are correlated by section number. Integrated Review Exercises appear before section exercises in every section. They offer a review of skills, definitions, and problem solving from previous chapters. Eduspace, powered by Blackboard, for the Lars on/Hostetler Elementary and Intermediate Algebra course features algorithmic exercises, test bank content in question pools, an online study guide, interactive tutorials for appropriate sections and video
