The Gillingham Manual
Harvard University Press
Yes, I Can Read! was written

for fourth graders through adults who are nonreaders, beginning readers, or struggling readers, those who speak English as well as ESL learners. The workbook was designed for learners who may be working with minimal assistance in a one-on-one, small group, or classroom setting, and its reading levels

range from 0 to 5.9. What you will find in Yes, I Can Read! - Flexibility: Can be used as a decoding program or as a supplement to strengthen particular skills. - Explicit, sequential phonics and the multi-sensory approach: Research-based, proven methods facilitate learning, inspiring confidence in students. - Easy to use: Designed for student success and mastery, its predictable page format with completed examples, illustrations, phonetic pronunciations, and symbols serve as cues for students. Matching, tracing, word search and fill-in-the-blank exercises reinforce learning. - Extensive reading, vocabulary, spelling, tracing, and handwriting practiced - 2,000-plus words - Age-appropriate format
Combination teacher's manual and student

workbook "This book is an abundant resource of phonetic exercises. These exercises gave my student confidence and a momentum to move smoothly along in her reading efforts because once she finished the lessons and exercises, she remembered how to spell and read the words. This book is well organized and at your fingertips to use. I am so glad to have found this resource!" - Martha Wilson, Literacy Tutor "I wish I had this book when I was homeschooling my kids." - Susan Christensen

Standards-Based
Connections Reading for grade 2 offers focused skill practice in reading comprehension. A skill assessment will point out students' learning gaps. This allows teachers to choose

appropriate student pages for focused, comprehensive individualized remediation. The student pages emphasize five important reading comprehension skills: summarizing, inferring, story elements, comparing and contrasting, and cause and effect. The book includes high-interest fiction and nonfiction, with texts about moving day, volcanoes, Laura Ingalls Wilder, planets, poetry, and more. --Each 96-page book in the Standards-Based Connections Reading series includes a skill assessment, an assessment analysis, targeted practice pages, and an answer key, making this series an ideal resource for differentiation and remediation. The skill assessments and assessment analyses help teachers determine individualized instructional needs. And, the

practice pages and self-assessments guide students to reflection and exploration for deeper learning!

The national standards require that students beginning at fourth grade use their knowledge of prefixes and suffixes to

determine the meaning of words. Each of the 30 units in this resource includes a word list, vocabulary sort cards, review game cards, and a vocabulary quiz.

Students will learn over 300 vocabulary words and become more comfortable "dissecting" words and defining their parts.

Is literacy a social and cultural practice, or a set of cognitive skills to be learned and applied?

Literacy researchers, who have differed sharply on this question, will welcome this book, which

is the first to address the critical divide. The authors lucidly explain how we develop our abilities to read and write and offer a unified theory of literacy development that places cognitive development within a sociocultural context of literacy practices. Drawing on research that reveals connections between literacy as it is practiced outside of school and as it is taught in school, the authors argue that students learn to read and write through the knowledge and skills that they bring with them to the classroom as well as from the ways that literacy is practiced in their own different social communities. The authors argue that until literacy development can be

understood in this broader way educators will never be able to develop truly effective literacy instruction for the broad range of sociocultural communities served by schools.

In this multisensory phonics technique, students first learn the sounds of letters, and the build these letter-sounds into words. Visual, auditory and kinesthetic

associations are used to remember the concepts. Training is recommended. *We're Going on a Picnic!* Corwin Press Successful implementation of response to intervention (RTI) for academic skills problems requires rigorous progress monitoring. This book shows how the proven instructional technology known as precision teaching (PT) can facilitate progress monitoring while building K-12 students' fluency in reading, writing, math, and the content areas. Detailed instructions help general and special education teachers use PT to target specific skills at all three tiers of RTI, and incorporate it into project-based learning. Of crucial importance for RTI implementers, the book provides explicit procedures for measuring and charting learning outcomes during

each PT session, and using the data to fine-tune instruction. Reproducible charts and other useful tools can be downloaded and printed in a convenient 8 1/2" x 11" size.

This comprehensive interactive CD-ROM resource profiles the articulation ability of a client, identifies areas in particular need of treatment and provides the material and tools to create tailor-made practice worksheets. This easy-to-use CD-ROM generates word lists according to the linguistic

and phonetic criteria defined by the therapist. Words can also be added to the Library by the therapist allowing it to grow over time and to store a large number of words for articulation practice. Tailor-made lists of practice words and sentences, as well as pictures and instructions, can be designed and printed for individual clients or students. There are seven levels of articulation practice in the order of single sounds; consonant-vowel combinations; DDK rates; short words; multisyllabic words; short phrases with the target sound in one word; and longer sentences saturated with the target sound. The work includes an articulation screening test

using words not in the Library to indicate the areas of greatest difficulty and to assess the generalisation of articulation skills. This versatile resource can be used with adults or children and will be invaluable to speech language therapists, teachers, and students of phonetics.

This must-read book for all literacy educators illuminates the intersection of research on literacy instruction and teacher evaluation. Since 2009, 46 states have changed or revised policies related to evaluating teachers and school leaders. In order for these new policies to be used to support and develop effective literacy instruction, resources are needed that connect the best of what is known about teaching literacy with current evaluation policies and support practices. A major contribution to meeting this need, the volume brings together a range of perspectives on tools, systems, and policies for the evaluation of teaching, organized into two sections: • Crafting Systems and Policies for Evaluating Literacy

Instruction • Examples of Alternative Systems/Approaches for Evaluating Literacy Instruction Across the text, expert scholars in the field emphasize the need for literacy professionals to do more than merely apply generic observation instruments for teacher evaluation, but also to consider how these tools reflect professional values, how elements of effective literacy instruction can be unearthed or included within them, and how teacher evaluation systems and policies can be used to increase students' opportunities to develop literacy.
