Packaging Technology Nirali Prakashan

This volume is a collection of scholarly papers that explore the complex issues concerning English Studies in the present Indian context. The discussions in this volume range from historical perspectives to classroom-specific pedagogies, from sociological and political hierarchies to the dynamics of intellectual development in the English language environment. Interrogating both policy and practice pertaining to English Studies in the context of Indian society, culture, history, literature and governance, the chapters seek to formulate contemporary perspectives to these debates and envision alternative possibilities. Since the introduction of English to India more than 2 centuries ago, the language has transmuted the very fabric of Indian society, culture, history, literature and governance. The idea of India cannot be conceived in its entirety without taking into consideration the epistemological role that English has played in its formation. The

present globalized world order has added dimensions to English Studies which are radically different from those of India's colonial and postcolonial past. It is therefore imperative that the multitudinous shades and shadows of the discipline be re-examined with inputs drawn from the present context. This volume is for scholars and researchers of English literature and language studies, linguistics, and culture studies, and others interested in exploring new paradigms of engagement with the disciplinary formulation of English Studies in India.

A Textbook of Engineering Mathematics (U.P. Technical University, Lucknow) Sem-II S. Chand Publishing

Introduction to Auditing (University of Mumbai) Laxmi Publications

Human Rights are the basic rights which one gets being human. These are inherent rights which are received since inception. Knowing and valuing the Human Rights is the best practice to prevent the violation in any form. When an individual learns about ones rights it builds respect for the right of other which helps in constructing more tolerant and peaceful citizens ultimately leading to peaceful civil societies. All Human Rights for All ascertains the universality, indivisibility and interrelationship of all human rights. The fact of unchangeable nature of Human Rights is essential for human existence Human rights in Teaching Practices" is a book for students, teacher educators, teachers as well as researchers in the field of Education and Human Rights Education who intends to know about Human Rights and how to impart them to their students. The main objective of this book is to share knowledge and skills to generate awareness and develop attitude towards Human Rights Education amongst student teachers. It provides an indepth description of concepts of Human Rights, Human Rights Education and strategies for teaching Human Rights in B.Ed course. The book is divided mainly in three parts: first part deals with concept of human rights, Human Rights Education, the policy perspective of Human Rights, the concept of human rights awareness and attitude towards human rights. This section describes the theoretical underpinnings of human rights from different approaches, Universal Declaration of Human Rights and how and where human rights are reflected in Indian Constitution. The concept of human rights Education and its policy perspectives in Indian Education system. Human Rights Education at different levels of school and at Teacher Education are described in detail from Indian Education policy perspective. Researchers at National and International level are studied with respect to human rights of different persons in the society such as- children, women and other vulnerable groups. Second part deals with the analysis of various components of human rights education programme for teacher education. Following areas are included in the present module of Human Rights Education. Concept, Foundation, and History of Human Rights, Gender Discrimination and Equality, Rights of the Child, Secularism and Education, Environmental Protection and Human Rights, The Right to Education, Egalitarianism and Education, Protection of Human rights in India. The Human Rights Education programme for student teachers of Bachelor in Education course was developed and its effectiveness was studied. This part explains different teaching strategies for imparting Human Rights Education. The constructivist and experiential learning approaches were used to inculcate the human rights culture among student teachers awareness about human rights and their attitude towards human rights. Third part deals with the research work and findings. Experimental research on student teachers was done and the effectiveness of the programme was tested. The Human Rights Education programme for generating awareness about Human Rights and attitude towards human rights was ascertained by considering various moderator variables. The research findings have manifold uses for school teachers, student teachers, curriculum planners in teacher education, all stakeholders of Education and human rights education so as to contribute directly or indirectly creating a peaceful and progressive society.

Doing Sociology in India Disha Publications

Readers of this work will find examinations of the current status and future status for energy sources and technologies, their environmental interactions and the relevant global energy policies. The work begins with an overview of Energy Technologies for a Sustainable Future, which examines the correlation between population, economy and energy consumption in the past, and reviews the conventional and renewable energy sources as well as the management of them to sustain the ever-growing energy demand in the future. The rest of the chapters are divided into 3 parts; the first part of the book, “ Energy Sources, Technologies and Environment ” , consists of 12 chapters, which include research on new energy technologies and evaluation of their environmental effects.

The second part “ Advanced Energy Materials ” includes 7 chapters devoted to research on material science for new energy technologies. The final section titled “ Energy Management, Economics and Policy ” is comprised of 10 chapters about planning, controlling and monitoring energy related processes together with the policies to satisfy the needs of increasing population and growing economy. The chapters are selected works from the International Conference on Energy and Management, which was organized by Istanbul Bilgi University Department of Energy Systems Engineering and PALMET Energy to share the knowledge on the recent trends, scientific developments, innovations and management methods in energy, and held on 5 – 7th June 2014 at Istanbul Bilgi University.
