The book covers recent advances and progress in understanding both the fundamental science of lasers interactions in materials science, as well as a special emphasis on emerging applications enabled by the irradiation of materials by pulsed laser systems. The different chapters illustrate how, by careful control of the processing conditions, laser irradiation can result in efficient material synthesis, characterization,

and fabrication at various length scales from atomically-thin 2D materials to microstructured periodic surface structures. This book serves as an excellent resource for all who employ lasers in materials science, spanning such different disciplines as photonics, photovoltaics, and sensing, to biomedical applications.

Kumar Ketkar • Rohini Hattangadi • Rajkumar Hirani • Bharat Dabholkar A collection of exceptional think pieces by some of the brilliant minds of our time Compiled and edited by noted

scholar Rajan Welukar, Gandhi@150 explores the relevance of Mahatma Gandhi's ideas in today's world and the impact of his philosophy across a wide spectrum of areas such as religion, economics, science, education, the arts and health and development. In this book, the contributors explain how certain Gandhian concepts can be used for our nation's advancement.

For example, 'Gandhian Engineering' can help boost India's progress with its focus on getting more from fewer resources for more people. In addition, the gram swaraj approach alone can stop the mass exodus of youth from villages to cities in search of jobs—a major worry for urban planners and village economies today. These are just a few of the many applicable solutions

based on Gandhi's ideas you will come across in these pages. To celebrate Gandhi's 150th birth anniversary, experts from various fields, such as Anil Kakodkar, RA Mashelkar, Douglas Roche, Ela Gandhi, Tushar Gandhi, Justice RC Chavan, Rajkumar Hirani and Daniel C Taylor among others, have contributed to this remarkable anthology. This book will help you understand why

Gandhi's views are relevant now more than ever. RAJAN WELUKAR, an eminent academician, is the former vice-chancellor of the University of Mumbai, Yashwantrao Chavan Maharashtra Open University and GH Rasoni University. He lives in Mumbai.

This book expands the sociological canon by introducing non-Western and female voices, and subjects the existing canon itself to critique. Including chapters on both the 'founding fathers' of sociology and neglected thinkers it highlights the biases of Eurocentrism and androcentrism, while also offering much-needed correctives to them. The authors challenge a dominant account of the development of sociological theory which would have us believe that it was only Western

European and later North American white males in the nineteenth and early twentieth century who also provides no end of opportunities for improving, expanding, reimagining, and sustaining thought in a creative and systematic manner about the origins and nature of the emerging modernity of their time. This integrated and contextualised account seeks to restructure the ways in which we theorise the emergence of the classical sociological canon. This book's global scope fills a significant lacuna and provides a unique teaching resource to students of classical sociological theory.

The Cloister's Pale Springer

Human beings have the possibility to give meaning to their lives and to create coherence in experiences. Present-day humanism strongly focuses on personal development in relation to others. It is this tension between personal development and advancement of humanization, that is creating the opportunities for the personal development of every world citizen. Humanism is about personal autonomy, moral responsibility, and about solidarity with humanity. The tension between autonomy and social involvement is the core of humanism. Education can support persons in their moral and personal identity development. The authors brought together in this book all address issues of developing autonomy and humanity in educational practices. All the chapters try to link theory and practice. They either make theoretical ideas more practical or they use practical experiences and concerns to rethink theoretical notions. Together the chapters in the book give a broad overview of theoretical foundations, concrete research, and practices in education. The book shows a diversity that can inspire scholars and practitioners in further developing their perspectives. Creating meaning is an essential part of all education. Focusing on the linking of autonomy and humanity is the humanist perspective in it.

Mass Communication in India, Fifth Edition Oxford University Press

As higher education has made deliberate strides in recent decades to become more inclusive and accessible, the number of students from non-traditional backgrounds has increased dramatically. There has been much study of the effects of higher education on previously underserved populations, showing that it can lead to higher lifetime income and higher status. But there has been little research on what happens to those students once they are in a university. This book fills that gap, taking a close look at this issue and drawing on case studies from the United States, the United Kingdom, and Australia to illuminate the problems that face non-traditional students, the resources they and their families are able to draw on, and the ways that administrators and staff can help them succeed. This paperback edition is well suited to postgraduate students and practitioners and alike.

Sociological Theory Beyond the Canon Allyn & Bacon

Investigating the phenomena of technology, science, technique, and mass communication, Piyush Mathur contends that the enterprise of science communication may be misleading vis-à-vis technology—if in part because it frequently coextends with a flawed, but dominant, notion of science that presumptuously implicates technology anyway. Grappling with what authentically constitutes science and the prospective effects of its realization on a global future of mass communication, Mathur explores how various technological forms play specifically into ecologically sensitive mass communication. The result is an eco-communicative theory of technology that includes its classification based upon a set of qualitative principles and a profile of the notion of development. On the whole, though, *Technological Forms and Ecological Communication: A Theoretical Heuristic* brings the fields of philosophy and history of science, philosophy and sociology of technology, communication studies, and development studies into conversation with one another.

Speaking Effectively provides the trainer with a business English book which can be used as supplementary material or as the basis for a short course at the lower-intermediate level to develop fluency and language competence. All of the 14 units are short, easy-to-use and do not require much preparation on the part of the teacher. The three case studies interspersed throughout the book allow the learner the opportunity to use the language acquired in the preceding units in more extended speaking activities. Speaking Effectively is accompanied by a cassette with the tapescripts in the back of the book.
