Given that  
muscles make  
movement  
happen, each  
muscle will

There are three  
types of muscle  
contraction:

Isometric -  
During isometric  
contraction, the  
muscle remains  
the same  
length. While  
performing a  
handstand, many  
of the bodies  
muscles are  
contracting.

Isokinetic -  
Isokinetic  
contraction  
occurs when the  
speed of the  
contraction  
remains constant  
throughout the  
movement. An  
example of this  
can be seen in  
cycling. The legs
