Conceivability Columbia University Press

As one of the most heartbreaking experiences in life, infertility can shatter dreams and crush spirits in its unyielding wake. Almost taboo, this struggle is rarely discussed within many Christian circles, which can leave affected couples with more questions than answers. The Inconceivable Truth provides a new approach for addressing some of the struggles Christian couples face today and the truth of what it is to be unable to conceive. It is the author ' s hope that as you confront some of the same issues she did, her story will help you to make God-honouring decisions and understand better the place of infertility in our lives. To find peace and joy in this difficult season, our counsel must be rooted in the Bible and in Christ. Join Joanna as she shares what God taught her during her family ' s infertility journey. May His book come alive in ways that will excite your soul and draw your heart and eyes upward to Jesus.

Parent Plans Springer

'Honest, funny and, crucially, helpful to anyone who has ever had difficulty conceiving or considered adoption, this is required reading.' Emma Thompson When journalist Rosalind Powell and her husband wanted to start a family, they had no idea of the journey that lay ahead. Encountering fertility issues and gruelling IVF treatment to no avail, but still determined to be parents, they set off on the adoption route. After many false starts and dashed hopes they eventually, and luckily, found their son. How I Met My Son is more than a memoir, it is an invaluable guide to the reality of adoption in the UK. Both joyful and heartbreaking, the path to becoming a parent is laid bare.

The story explores the sadness of infertility, the rigours of IVF, the minefield of social services, the intensity of the assessment process, the difficulties of choosing a child (and being chosen) and the happiness and shock of finally bringing that child home. A candid, compelling and inspirational book about what it means to be a parent of a child that isn't, biologically, your own. 'Whether you have no children, have been through IVF, fostered, adopted or borne biological children, this stunning warts-and-all account of the yearning to parent is a must-read. Powell's experiences, told with such particular and often heart-rending hilarity, speak to the universal questions we all ask of our parents, partners, friends and ultimately of ourselves.' Cate Blanchett

The Subfertility Handbook Tule Publishing Richard and Rosie started trying to conceive after five years of being together but, two and a half years and countless prenatal vitamins and ovulation kits later, there hadn't been even a phantom pregnancy. So began their adventure into IVF, via blood tests, sperm tests, injections and probes, becoming involuntary experts on embryology through failure, despair, persistence and success. After 4 years, 3 different clinics, 2 positive pregnancy tests and 1 miscarriage, they finally had a successful pregnancy. GET A LIFE is the perfect down-to-earth guide for anyone thinking of embarking on fertility treatment. It's two books in one, a book of advice for women and a survival guide for men, each chapter mirrored but with very different experience and advice. IVF is terrifying, awful and extraordinary in equal measures for both partners. GET A LIFE shares Richard and Rosie's ride on the fertility roller coaster, bringing you the funny, emotional and physical sides of IVF. It is an invaluable guide from both perspectives on how to get through the process in one piece.

Readings in Health Care Ethics Rowman & Littlefield

Previously published as part of WHAT'S UP DOWN THERE? Suppose you had a wise, warm, funny best friend—who just happened to be a gynecologist. You're out with the girls for cocktails and the conversation turns to sex, and then to girly parts. One by one, you start asking

her all the questions you've secretly wondered about—and discover that you have a lot in common. If you were to write those questions down, then you'd have FERTILITY, PREGNANCY, AND CHILDBIRTH: A GYNOCOLOGIST ANSWERS YOUR MOST IMPORTANT QUESTIONS, a life-changing little ebook that answers: - How late is too late to get pregnant? - Are there sex acts we should avoid if we're trying to make a baby? Oral sex? Vibrators? Lubricant? Whipped cream? - Is it true that sex can stimulate labor? Is so, will having sex make me deliver early? - Since I got pregnant, I'm as horny as a teenage boy. What's the deal? - Is natural childbirth really worth it? I mean, I'm sure it hurts like the dickens, so why would you do it? Is it really that much better for you and your baby? And so much more! As outrageously funny as it is empowering, this book reveals how to love yourself and your body—and will have you recommending it to every woman you know.

His Best Friend's Baby John Wiley & Sons

Beyond Second Opinions is both an expos é of the risks, errors, and distortions surrounding fertility medicine and an authoritative guide for people seeking treatment. Accessible, comprehensive, and extremely well-informed, this book takes the reader beyond hype to the hard data on diagnoses and

treatments. Judith Steinberg Turiel, a consumer health activist and herself a veteran of fertility treatments, uses the most up-to-date medical literature to shed new light on difficult decisions patients face today and on reproductive questions society must begin to address now. Those who are seeking a more balanced perspective to help them make better, more informed decisions will find a wealth of information about current reproductive interventions—from simple fertility pills to dazzling experimental options—as well as a discussion of the non-medical forces (economic and political) that shape an individual's treatment choices and reproductive outcomes. Despite quantities of information showered upon patients, they remain woefully misinformed; some fertility treatments may actually reduce chances for a successful pregnancy and threaten a patient's health. Turiel looks beyond surface claims to the real information, often uncovering counterintuitive findings and sometimes scandalous revelations. She exposes a realm of unregulated expansion, unscientific experimentation, and recent scandal over stolen embryos. Weaving together first-hand accounts, compelling stories, a range of scientific information, and lively anecdotes, Turiel addresses the persistent gulfs that separate medical professionals and health care consumers. In the process she arms laypeople with what they might not learn about infertility practices from doctors, patient education brochures, and the newspaper. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1998.

Readings in Health Care Ethics provides a wide-ranging selection of important and engaging contributions to the field of health care ethics. Designed as a course text for undergraduate use, the anthology includes fifty-six selections grouped into ten sections. Included are a wide range of the most important essays both on long standing issues in biomedical ethics (such as consent, euthanasia, and research involving human subjects); and on issues that have particularly come to the fore in recent years, such as the allocation of scarce medical resources, and genetic alteration. An extensive introduction provides a accessible general overview of ethical theory for those without previous familiarity with philosophical concepts.

The Trying Game Simon and Schuster

In this anthology of new and classic articles, fifteen noted feminist philosophers explore contemporary ethical issues that uniquely affect the lives of women. These issues in applied ethics include autonomy, responsibility, sexual harassment, women in the military, new technologies for reproduction, surrogate motherhood, pornography, abortion, nonfeminist women and others. Whether generated by old social standards or intensified by recent technology, these dilemmas all pose persistent, 'nagging, ' questions that cry out for answers. Unlike

other anthologies in feminist ethics, this book encourages critical thinking about concrete, contemporary social and moral issues. Each engaging, clearly written article is followed by discussion questions, making the book useful for students of women's studies, philosophy, sociology, and political science

Assisted Reproduction Techniques Harlequin

An engaging guide to navigating the challenges of infertility. How I Met My Son John Wiley & Sons
The “ Jason Bourne of fertility ” (The New York Times Book Review) presents a personal and deeply informative account of one woman's journey through the global fertility industry. On paper, conception may seem like a simple biological process, yet this is often hardly the case. While many would like to have children, the road toward conceiving and maintaining a pregnancy can be unexpectedly rocky and winding. Lawyer Elizabeth Katkin never imagined her quest for children would ultimately involve seven miscarriages, eight fresh IVF cycles, two frozen IVF attempts, five natural pregnancies, four IVF pregnancies, ten doctors, six countries, two potential surrogates, nine years, and roughly \$200,000. Despite her three Ivy League degrees and wealth of resources, Katkin found she was woefully undereducated when it came to understanding and confronting her own difficulties having children. After being told by four doctors she should give up, but without an explanation as to what exactly was going wrong with her body, Katkin decided to look for answers herself. The global investigation that followed revealed that approaches to the fertility process taken in many foreign countries are vastly different than those in the US and UK. In *Conceivability*, Elizabeth Katkin, now a mother of two, exposes eye-opening information about the medical, financial, legal, scientific, emotional, and ethical issues at stake. “ A well-researched, informative, and positive account of a very long journey to motherhood ” (Kirkus Reviews), *Conceivability* sheds light on the often murky and baffling world of conception science. Her book is an invaluable and inspiring text that will be a boon to others navigating the deep and “ choppy waters ” of fertility treatment (Publishers Weekly), and her chronicle of one of the most difficult, painful, rewarding, and loving journeys a woman can take is as informative as it is poignant.

Getting to Baby Simon and Schuster

Marc Sedaka stood by while he and his wife endured endless rounds of drug therapies, sixteen artificial inseminations, ten in-vitro fertilizations, three miscarriages, and, finally, a gestational surrogate (“ womb for rent ”) who carried their twin girls to term. He was as supportive and loving as he could be, but he really wished he'd had a book like *What He Can Expect When She's Not Expecting* during the process. Most books about dealing with infertility are geared toward women, leaving the man to his own devices when it comes to comfort and encouragement (never a good idea). With the help of his own infertility doctor, Sedaka provides straightforward guy-friendly advice on situations such as: What questions you should ask at the consultations. How to help rather than annoy. What kinds of tests you and your wife should expect. How to console a wife who appears inconsolable. How to enjoy procreation sex. Sedaka's accessible, empathetic voice, combined with the fact that he experienced everything he writes about, makes this a must-have book for any infertile couple.

Bioethics Troubador Publishing Ltd

Bioethics: An Introduction to the History, Methods, and Practice, Third Edition provides readers with a modern and diverse look at bioethics while also looking back at early bioethics cases that set ethical standards in healthcare. It is well suited for advanced undergraduate and graduate students who plan to pursue careers in nursing, allied health, or medicine, as well as professionals seeking a comprehensive reference in the field. The authors retain the unique three-pronged approach, discussing the history, the methods, and the practice of bioethics. This approach provides students with a breadth of information, focusing on all sides of the issue, which will allow them to think critically about current bioethical topics. The third edition is updated throughout with new information and cases including, the latest on genetics and reproductive technology, physician-assisted suicide, as well as numerous new cases.

In Vitro Fertilization Jones & Bartlett Publishers

Published in 1998, this book is a collected volume of papers from the first conference of the European Network for Biomedical ethics. The main subject of this conference is the ethical assessment of IVF in view of its concrete application as an infertility treatment and the consideration of possible alternatives for use. Twenty years after the introduction and the establishment of this therapy a more concrete evaluation of its medical indications, social conditions and consequences, the psychological consequences for the women involved and the parent-child relationship becomes possible. The legal and ethical evaluation of the reproduction technology as regards for example the legal and moral status of supernumerary embryos in cryo-conservation has also to be considered in a European

perspective. The ethical evaluation concentrates today on the new evolution that IVF technology takes in relation to the extension of diagnostics possibilities due to genetic research. Little work has been done on the connection between IVF and genetic diagnostics and therapy, so the medical and ethical evaluation of the connecting lines are also included in the book.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

The Inconceivable Truth Bonnier Publishing Ltd.

This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al- ' aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God ' s special gifts to human beings, God ' s revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice — the maqa' sid — which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book

discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

In Vitro Fertilisation in the 1990s DIANE Publishing

This is a book about my bipolar - biracial 20-year marriage. It reveals the reality of a modern day love story that starts from the beginning which takes you on an unbelievable, unexpected ride through the ups and downs of a marriage. The message of the book is that things can happen in one's relationship but we must ask the question we stay or leave based on circumstances.

Nevertheless, sometimes we say ""What Da Fck?"" through this roller coaster we call life.

New York Magazine National Academies Press

The fully revised and updated second edition of this practical handbook provides comprehensive coverage of all aspects of subfertility, including treatment and diagnosis. Each chapter is written by a recognized world expert in the field and, together, they aim to provide state of the art answers to all the problems of subfertility in a single volume. The introductory chapter provides a flow-chart approach to systematic diagnosis and treatment. Clearly written and easy to read, the subsequent chapters describe what questions to ask, how to investigate, and what each treatment requires. With an expanded international team of authors, this new edition also offers new chapters devoted to third party reproduction and in vitro maturation of oocytes. From medical students studying for examinations to consultant physicians, this volume is a 'must-have' reference for anyone dealing with couples who have fertility problems.

She needs a little favour... Polly Martin has given up on love, but not on becoming a mother. She returns briefly to her hometown of Wirralong to proposition her childhood best friend, Seth Ramsay, confident he ' ll agree to be her IVF donor. Seth walks out of their reunion dinner date after Polly ' s clinical and unemotional proposal. How could she think he was the type of man who wouldn ' t take an ongoing interest in his child? A year later, still haunted by Polly ' s question, he seeks her out in Melbourne and finds her heavily pregnant, unemployed, and barely making ends meet. Seth invites Polly back to Wirralong for a weekend only to end up delivering her baby girl early and finding himself more charmed than he could have imagined. As Polly and her newborn recover at Seth ' s house, their friendship is back on, but Seth wants more. He feels like he ' s finally within reach of his dream when the town gossips send Polly fleeing home. And now Polly must ask herself searching questions, including where her new future lies.
