How to Code a Rollercoaster

Del Rey

In this strident, necessary, meticulously researched book Michael Fine shows how the Covid-19 pandemic has thrown the costly failure of the American health care system into bold relief. At over 850,000 deaths and climbing, the US had more deaths than any other nation in the world, and one of the highest per capita death rates. On Medicine as Colonialism shows how the American health care system cannibalizes communities in the US and around the world.

Focusing on how health care profiteers use state 's power and control of health care purchasing to extract resources from communities On Medicine as Colonialism reveals how medicine and health care have become not only antithetical to health but tools of colonialism, that are being used to deconstruct democracy itself.

Rad Families: A Celebration

honors the messy, the painful, the playful, the beautiful, the myriad ways we create families. This is not an anthology of experts, or how-to articles on perfect parenting; it often doesn't even try to provide answers. Instead, the writers strive to be honest and vulnerable in sharing their stories and experiences, their failures and their regrets.

Gathering parents and writers from diverse communities, it explores the process of getting pregnant from trans birth to adoption, grapples with issues of racism and police brutality, probes raising feminists and feminist parenting. It plumbs the depths of empty nesting and letting go. Some contributors are recognizable authors and activists but most are everyday parents working and loving and trying to build a better world one diaper change at a time. It's a book that reminds us all that we are not alone, that community can

help us get through the difficulties, can, in fact, make us better people. It's a celebration, join us! Contributors include Jonas Cannon, Ian MacKaye, Burke Stansbury, Danny Goot, Simon Knaphus, Artnoose, Welch Canavan, Daniel Muro LaMere, Jennifer Lewis, Zach Ellis, Alicia Dornadic, Jesse Palmer, Mindi J., Carla Bergman, Tasnim Nathoo, Rachel Galindo, Robert Liu-Trujillo, Dawn Caprice, Shawn Taylor, D.A. This expanded second edition of Mitzi Waltz ' s Autism: A Social and Medical History offers an in-depth examination of how the condition was perceived before it became a separate area of investigation, and how autism has been conceptualised and treated since. As well as strengthening the existing text, Waltz has added material on a number of topics that have received increased attention since the first edition, including the rise of the anti-vaccination movement, the shift towards genetic and genomic research, and the progress of the autism self-advocacy movement. The author examines these issues through the perspective of what they mean for autistic people, clinicians and society, and looks at the challenges still faced by autistic people. Waltz also looks at the increased autism diagnosis among girls and women, and how autism

has been represented in traditional media and social media. The book includes information from interviews with key researchers, parents of autistic children and people with autism.

What prenatal tests and down syndrome reveal about our reproductive choices When Alison Piepmeier—scholar of feminism and disability studies, and mother of Maybelle, an eight-year-old girl with Down syndrome—died of cancer in August 2016, she left behind an important unfinished manuscript about motherhood, prenatal testing, and disability. In Unexpected, George Estreich and Rachel Adams pick up where she left off, honoring the important research of their friend and colleague, as well as adding

new perspectives to her work. Based on interviews with parents of children with Down syndrome, as well as women who terminated their pregnancies because their fetus was identified as having the condition, *Unexpected* paints an intimate, nuanced picture of reproductive choice in today's world. Piepmeier takes us inside her own daughter's life, showing how Down syndrome is misunderstood, stigmatized, and condemned, particularly in the context of prenatal testing. At a time when medical technology is rapidly advancing, *Unexpected* provides a much-needed perspective on our complex, and frequently troubling, understanding of Down syndrome.

The Mulvaney is blessed by all that makes life sweet. But

something happens on

Valentine's Day, 1976—an incident that is hushed up in the town and never spoken of in the

Mulvaney home—that rends the fabric of their family life...with

tragic consequences. Years later, the youngest son attempts to

piece together the fragments of the Mulvaney's former glory, seeking to uncover and

understand the secret violation that brought about the family's

tragic downfall. Profoundly

cathartic, this extraordinary novel unfolds as if Oates, in

plumbing the darkness of the human spirit, has come upon a source of light at its core. Moving away from the dark tone of her more recent masterpieces, Joyce Carol Oates turns the tale of a family struggling to cope with its fall from grace into a deeply moving and unforgettable account of the vigor of hope and the power of love to prevail over suffering. “ It ’ s the novel closest to my heart....I ’ m deeply moved that Oprah Winfrey has selected this novel for Oprah ’ s Book Club, a family novel presented to Oprah ’ s vast American family. ” —Joyce Carol Oates

Rad Dad: Dispatches from the Frontiers of Fatherhood combines the best pieces from the award-winning zine Rad Dad and from the blog Daddy Dialectic, two kindred publications that have tried to explore parenting as political territory. Both of these projects have pushed the conversation around fathering beyond the safe, apolitical

focus most books and websites stick to; they have not been complacent but have worked hard to create a diverse, multi-faceted space in which to grapple with the complexity of fathering. Today more than ever, fatherhood demands constant improvisation, risk, and struggle. With grace and honesty and strength, Rad Dad ’ s writers tackle all the issues that other parenting guides are afraid to touch: the brutalities, beauties, and politics of the birth experience, the challenges of parenting on an equal basis with mothers, the tests faced by transgendered and gay fathers, the emotions of sperm donation, and parental confrontations with war, violence, racism, and incarceration. Rad Dad is for every father out in the real world trying to parent in ways that are loving, meaningful, authentic, and ultimately revolutionary. Contributors

Include: Steve Almond, Jack Amoureux, Mike Araujo, Mark Andersen, Jeff Chang, Ta-Nehisi Coates, Jeff Conant, Sky Cosby, Jason Denzin, Cory Doctorow, Craig Elliott, Chip Gagnon, Keith Hennessy, David L. Seeing Ezra is the soulful, beautifully written memoir of a mother's fierce love for her autistic son, and a poignant examination of what it means to be "normal." When Kerry Cohen's son Ezra turns one, a babysitter suggests he may be "different," setting her family on a path in which autism dominates their world. As he becomes a toddler and they navigate the often rigid and prescriptive world of therapy, Cohen is unsettled by the evaluations they undergo: At

home, Ezra is playfully expressive, sharing profound, touching moments of connection and intimacy with his mother and other family members, but in therapy he is pathologized, prodded to behave in ways that undermine his unique expression of autism. It soon becomes clear that more is at stake than just Ezra's well-being; Cohen and her marriage are suffering as well. Ezra's differentness, and the strain of pursuing varied therapies, takes a toll on the family—Cohen's husband grows depressed and she pursues an affair—all as she tries to help others recognize and embrace Ezra's uniqueness rather than force him to behave outside his comfort level. It isn't until they abandon the expected, prescriptive notions about love, marriage, and individuality that they are able to come back together as two parents who fiercely love their little boy. Powerful and eye-opening, Seeing Ezra is an inspirational chronicle of a mother's struggle to protect her son from a system that seeks to compartmentalize and "fix"

him, and of her journey toward accepting and valuing him for who he is—just as he is.

Children inevitably turn to their parents for more than just food and security; equally important are assurance, recognition, and interpretation of life. A child develops best in an environment where creativity and discovery are unimpeded by the artificial restrictions of blind faith and dogmatic belief. Parenting without God is for parents, and future parents, who lack belief in a god and are seeking guidance on raising freethinkers and social-justice-aware children in a nation where public dialogue has been controlled by the Christian Right. Dan Arel, activist and critically acclaimed author, has penned a magnificently practical guide to help parents provide their children with the intellectual tools for standing up to attempts at religious proselytism, whether by teachers, coaches, friends, or other family members. Parenting without God is also for the parent activist who is trying to make the world a

better place for all children by first educating their own children about racism, sexism, and all forms of discrimination that serve as barriers to the fundamentals of human dignity and democracy. It ' s for parents who wish for their children to question everything and to learn how to reach their own conclusions based on verifiable evidence and reason. Above all, Arel makes the penetrating argument that parents should lead by example—both by speaking candidly about the importance of secularism and by living an openly and unabashedly secular life. Parenting without God is written with humility, compassion, and understanding. Dan Arel ' s writing conveys the unmistakable impression of a loving father dedicated to redefining the role of parenthood so that it also includes the vitally important task of nurturing every child ' s latent impulse for freedom and autonomy. This second edition has been expanded with new material from the author.

Clinical Observation in Communication Sciences and Disorders is a textbook written for undergraduate students studying communication sciences and disorders (CSD) who are beginning the process of obtaining clinical observation hours. Designed as an introduction to the process of clinical observation, this text takes a global approach in addressing the development of keen observation skills necessary for clinical practice. The book provides a framework for approaching clinical observation and includes exercises for instructors and students exploring the importance of clinical observation and its role in health care services, its historical context, philosophical underpinnings, and instructional strategies. Observation is vital to the CSD field, and this work presents a multimedia guide to clinical observation that has not been

offered until now. Students and instructors are provided a thorough resource to facilitate the learning of, and learning through, observation that students will carry into clinical observation and future clinical practicum. Key Features: *

- * Recordings and videos of clinical studies and observations included on a PluralPlus companion website
- * Activities and exercises that engage the reader firsthand with observation
- * Chapters designed to guide students in developing comfort with self-exploration, reading and applying research that underlies fundamental observational skills, and recognizing the contributions of the individuals and families with whom they will work
- * A broad approach to observation that can be applied and practiced globally
- * A study of observation in CSD that has not been offered before
