I try to leave out the parts that people skip. Elmore Leonard This book is all about writing: it is both a practical and a personal account. When you write a book like this you put yourself on the line: you run the risk of people reading what you have written and saying 'he's saying one thing and doing another'. You stand to break the rules that you set up - quite badly. That is probably not such a terrible thing; besides, that should be part of the process of using this book. As you read it, notice when rules are broken. Check the phrasing, the sentence and paragraph construction, and see whether or not I have stuck to the rules. Then see whether or not the rules would have improved the passage in question. Begin to read books as much for their style, layout and general format as for their content. If you are going to write, you need to see plenty of examples of all of these things - good, bad and indifferent. to write for some time but was always This is a book I have wanted nervous of writing, so here it is: an introduction to some of the ways and means of writing. It is, as I say, personal; I hope it will be useful. A word about sexism and the writing process. I find the use of 'his or her' and its variants clumsy.

This book examines the extraordinary changes that technology brings and how these affect all of us and our families—at home, at school, and at our work places—with profound consequences for society. Twenty-first-century technology opens up fabulous opportunities, but also changes how we relate to each other and warps our sense of time, reality, duty, and privacy. Technologies and time-saving devices make everything happen faster, with the result that we feel busier than ever before. "Free time" seems in danger of extinction. So Much, So Fast, So Little Time: Coming to Terms with Rapid Change and Its Consequences provides fascinating insights about how our changing world is changing our families and our personal relationships; how we travel, behave as consumers, and communicate; and how we entertain ourselves and deal with our anxieties. Written in a popular, accessible style, this book describes seven areas of significant societal change, providing

concrete examples and engaging stories to illustrate how drastically our right-now mindset has shifted our perception and experience of the world. In the last chapter, the author makes some practical suggestions on how to take thoughtful action to respond to the onslaught of inevitable change.

2020 Shirley Jackson Award finalist, Best Collection 2020 Locus Recommended Reading List, Best Story Collection INCLUDES BONUS STORIES AND EXCERPTS "From heartbreaking character studies to exercises in Grand Guignol excess, from scalpel-sharp poetry to sledgehammers of blood-soaked prose, Mike Allen displays not only his own considerable range, but the range of the horror genre as well. Aftermath of an Industrial Accident will surprise and delight you at every turn." —Nathan Ballingrud, author of *Monsterland*, now streaming on Hulu "Allen overflows the tank with nightmare fuel in this collection of 23 stories and poems that showcase his ability to find the monstrous in almost any setting . . . the collection dances through hauntings, carnage, body horror, and psychological chills . . . Readers will be impressed by the variety, intensity, and skilled craftsmanship Allen brings to this collection. These horror shorts are sure to linger in the dark corners of readers' minds." — Publishers Weekly, starred review "An incredible read. This collection of horror and dark fantasy poetry and short fiction needs to be on the shelf of any horror reader." — Cemetery Dance "Allen weds the brute visceral punch of early Clive Barker with the demented whimsy of darker Neil Gaiman." —Craig Laurance Gidney, author of *A Spectral Hue* A Korean War veteran must rely on wits, improvised weapons, and words from the dread Necronomicon to escape the lair of a deranged cult. A ghost cannot communicate how she died, no matter how desperately she tries, while an unconventional ghost hunter incurs the venomous wrath of the Queen of Night. Murderous conspiracies reveal themselves in online video clips, a saint blasphemes as a serial killer prays for mercy, and corrupt families in ancient kingdoms trade blood and souls for leverage over foes. Enduring nightmares for a living can lead to a fate worse than burnout. A gruesome invasion from outside space and time tests courage—and corporate loyalty—past all rational limits. In these twenty-three stories and poems, two-time World Fantasy Award nominee Mike Allen spins twisted narratives, some wound through the fabric of our world, some set in imagined pasts or futures, all plumbing the depths of human darkness. "The consistency, here, is simply excellence," writes Bram Stoker Award finalist and Punktown creator Jeffrey Thomas in his introduction. "You are holding in your hands an overflowing cornucopia of monstrous goodness." "Each tale in *Aftermath of an Industrial Accident* packs a punch that will keep you willingly pinned to the wall." —Christina Sng, author of *A Collection of Nightmares* "Mike Allen habitually upends Lovecraftian tropes with his own brand of cosmic horror." —Laird Barron, author of *Swift to Chase* "Allen demonstrates again and again his masterful ability to infuse cosmic, existential terror into the most intimate, and mundane aspects of our lives, while never failing to point out the self-made horror already there: from his introductory piece that credits Poe as a conjurer of inescapable, psychic horror and a muse-sinister for

Allen, to the title story that force-marches the reader through rising terror, like a tea kettle screaming, for which there is no escape, no sanctuary, even within your own mind." —R. S. Belcher, author of *The Brotherhood of the Wheel* "Allen deftly imbues each world visited with its own special kind of dread." —A. C. Wise, author of *Catfish Lullaby*

This book captures the essence of life in this world with all its whims and fancies and dreams. It takes you through a virtual tour of a common mans life in his own words. Learn from these stories as if they are shared with you, as if over a cup of tea and warm conversation. You will learn history, facts, trivia, and interesting tidbits that will make you appreciate things in general in this worldchildren playing, birds chirping, thunder clapping, then a silence that will set in, never to be broken, unless perhaps in the far pasture of the Milky Way. I meant this book to be entertaining, relaxing, armchair reading, and the stories are such that you can identify with them. Also, I wanted to keep my memories alive. In doing so, you will find some factoids to be chewed on.

A stimulating, eclectic account of new media that finds its origins in old media, particularly the cinema. In this book Lev Manovich offers the first systematic and rigorous theory of new media. He places new media within the histories of visual and media cultures of the last few centuries. He discusses new media's reliance on conventions of old media, such as the rectangular frame and mobile camera, and shows how new media works create the illusion of reality, address the viewer, and represent space. He also analyzes categories and forms unique to new media, such as interface and database. Manovich uses concepts from film theory, art history, literary theory, and computer science and also develops new theoretical constructs, such as cultural interface, spatial montage, and cinematography. The theory and history of cinema play a particularly important role in the book. Among other topics, Manovich discusses parallels between the histories of cinema and of new media, digital cinema, screen and montage in cinema and in new media, and historical ties between avant-garde film and new media.

Beyond Spatial Montage: Windowing, or the Cinematic Displacement of Time, Motion, and Space offers an extended discussion of the morphology and structure of compositing, graphic juxtapositions, and montage employed in motion pictures. Drawing from the history of avant-garde and commercial cinema, as well as studio-based research, here media artist and theorist Michael Betancourt critiques cinematic realism and spatial montage in motion pictures. This new taxonomic framework for conceptualizing linkages between media art and narrative cinema opens new areas of experimentation for today's film editors, motion designers, and other media artists.
