Mythic discourses in the present day show how vernacular heritage continues to function and be valuable through emergent interpretations and revaluations. At the same time, continuities in mythic images, motifs, myths and genres reveal the *longue durée* of mythologies and their transformations. The eighteen articles of *Mythic Discourses* address the many facets of myth in Uralic cultures, from the Finnish and Karelian world-creation to Nenets shamans, offering multidisciplinary perspectives from twenty eastern and western scholars. The mythologies of Uralic peoples differ so considerably that mythology is approached here in a broad sense, including myths proper, religious beliefs and associated rituals. Traditions are addressed individually, typologically, and in historical perspective. The range and breadth of the articles, presenting diverse living mythologies, their histories and relationships to traditions of other cultures such as Germanic and Slavic, all come together to offer a far richer and more developed perspective on Uralic traditions than any one article could do alone.

The book highlights aspects of mediality and materiality in the dissemination and distribution of texts in the Scandinavian Middle Ages important for achieving a general understanding of the emerging literate culture. In nine chapters various types of texts represented in different

media and in a range of materials are treated. The topics include two chapters on epigraphy, on lead amulets and stone monuments inscribed with runes and Roman letters. In four chapters aspects of the manuscript culture is discussed, the role of authorship and of the dissemination of Christian topics in translations. The appropriation of a Latin book culture in the vernaculars is treated as well as the administrative use of writing in charters. In the two final chapters topics related to the emerging print culture in early post-medieval manuscripts and prints are discussed with a focus on reception. Selected as a Most Anticipated title by People, Parade, Bustle, CrimeReads, She Reads, and more! An electrifying work of literary suspense from internationally bestselling author Katrine Engberg, *The Tenant*—heralded as a “stunning debut” by #1 New York Times bestselling author Kathy Reichs—follows two Copenhagen police detectives struggling to solve a shocking murder and stop a killer hell-bent on revenge. When a young woman is discovered brutally murdered in her own apartment with an intricate pattern of lines carved into her face, Copenhagen police detectives Jeppe Korner and Anette Werner are assigned to the case. In short order, they establish a link between the victim, Julie Stender, and her landlady, Esther de Laurenti, who’s a bit too fond of drink and the host of raucous dinner parties with her artist friends. Esther also turns out to be a budding novelist—and when Julie turns up as a murder victim in the still-unfinished mystery she’s writing, the link between fiction and real life grows both more urgent and more dangerous. But Esther’s role in this twisted scenario is not quite as clear as it first seems. Is she the culprit or just another victim, trapped in

a twisted game of vengeance? Anette and Jeppe must dig more deeply into the two women’s pasts to discover the identity of the brutal puppet-master pulling the strings. Evocative and original, *The Tenant* promises “dark family secrets—and a smorgasbord of surprises” (People).

This book explores the judicial treatment of suicides in early modern Sweden, with a focus on the criminal investigation and selective treatment of suicides in the lower courts in the seventeenth and early eighteenth centuries. Riikka Miettinen

shows that reactions and attitudes towards suicides varied considerably despite harsh condemnation by officials. The indictment, investigation, and classification of suspected suicides and the mental state of a person already deceased were challenging, and depended on local co-operation and lay testimonies. Not all suicides were considered alike; a widespread view on the heinousness of suicide was not the same as agreement about specific cases, and did not result in uniform handling of them. The social status and local ties of the deceased influenced the interpretations and responses at the local lower courts and communities. Esteemed local community members had a better defence and greater chance to escape the shameful penalties.

When studying social practices that are regarded as traditional, 'tradition' is usually seen as an element of meaning. Whose meaning is it? Is it a meaning generated by those who study tradition or those who are being studied? In both cases, particular criteria for traditionality are employed, whether these are explicated or not. The individuals, groups of people and institutions that are studied may continue to uphold their traditions or name their practices traditions without having to state in analytical terms their criteria for traditionality. This cannot, however, apply to people who make the study of traditions their profession, especially those engaged in the academic field of the 'science of tradition,' a paraphrase given to folklore studies. Traditions call for explanation, instead of being merely described or used as explanations for apparent repetitions, reiterations, replications, continuations or symbolic linking in social practice, values, meaning, culture, and history. In order to explain the concept of tradition and the category of the traditional, scholars must situate its use in particular historically specific discourses -- ways of knowing, speaking, conceptualisation and representation -- in which social acts receive their meanings as traditional. This book argues that since the concepts of tradition and modern are fundamentally modern, what they aim to and are able to describe, report and denote is epistemologically modern, as that which is regarded as non-modern and traditional is appropriated into modern social knowledge through modern concepts and discursive

means. Modernity cannot represent non-modernity without modern mediation, which therefore makes the representations of non-modernity also modern. Accordingly, the book deals with the modernness of objectifying, representing and studying folklore and oral traditions. The first section focuses on modern and tradition as modern concepts, and the conception of folklore and its study as a modern trajectory. The second section discusses the politics of folklore with regard to nationalism, and the role of folk tradition in the production of nation-state identity in Finland.

Gösta Mittag-Leffler (1846-1927) played a significant role as both a scientist and entrepreneur. Regarded as the father of Swedish mathematics, his influence extended far beyond his chosen field because of his extensive network of international contacts in science, business, and the arts. He was instrumental in seeing to it that Marie Curie was awarded the Nobel Prize twice. One of Mittag-Leffler's major accomplishments was the founding of the journal *Acta Mathematica*, published by Institut Mittag-Leffler and Sweden's Royal Academy of Sciences. Arild Stubhaug's research for this monumental biography relied on a wealth of primary and secondary resources, including more than 30000 letters that are part of the Mittag-Leffler archives. Written in a lucid and compelling manner, the biography contains many hitherto unknown facts about Mittag-Leffler's personal life and professional endeavors. It will be of great interest to both mathematicians and general readers interested in science and culture.

The recent fascination in Finnish folklore studies with popular thought and the values and emotions encoded in oral tradition began with the realisation that the vast collections of the Finnish folklore archives still have much to offer the modern-day researcher. These archive materials were not only collected by scholars, but also by the ordinary rural populace interested in their own traditions, by performers and their audiences. With its myriad voices, this body of source material thus provides new avenues for the researcher seeking to

---

penetrate popular thought. What does oral tradition tell us about the way its performers think and feel? What sorts of beliefs and ideas are transmitted in traditional songs and narratives? Perspectives from the study of mentalities and cultural cognition research provide a framework for investigating these issues. This collection of articles works from the premise that the cultural models which shape mentalities give rise to manifest expressions of culture, including folklore. These models also become embedded in the representations appearing in folklore, and are handed down from one generation to the next. The topics of the book cover age-old myths and world views, concepts of witchcraft and the Devil stretching back to the Middle Ages, and the values and collective emotions of Finnish and Hungarian agrarian communities.
