The Evolution and Future of the Human Animal Lerner Digital™  
A moving, heartwarming memoir about a conservation hero and real-life chimpanzee whisperer—now the subject of the award-winning documentary film *Pant Hoot*. Stany Nyandwi's gift for communicating with chimpanzees is so special that world-renowned primatologist Dr. Jane Goodall has called him a "chimpanzee whisperer." His skills and devotion to these creatures—our closest living relatives, with whom we share 98.7 percent of our DNA—have earned him international awards and sent him on travels within Africa and around the world. But he began life in poverty, born and raised in a dirt-floor, straw-roofed hut in rural Burundi. The *Chimpanzee Whisperer* is the story of his astonishing life journey. It is also an African story. Receiving only an elementary education before he quit school, he suffered injustice and tragic loss because of his ethnic group. He began caring for orphaned and rescued chimps in Burundi. When the country descended into civil war and genocide, he was forced to flee with the chimps and endured long separation from his family. Continuing to work with and learn about chimpanzees in Kenya, Uganda, and later South Africa, he made himself into an incomparable authority. His memoir has adventure, danger, and many unique and touching stories about chimpanzees that show his bond with and understanding of them. As told to award-winning author David Blissett, it reveals a remarkable man who has refused to let circumstances defeat him. Conditioned by hate, wounded by loss, he has lived for love, faith, and compassion, giving new life, as Dr. Jane Goodall writes in her foreword, "to so many chimpanzees whose families, like his own, were torn apart by violence."

**Love and Healing at an Animal Sanctuary** Harvard University Press

From world-renowned scientist Jane Goodall, as seen in the new National Geographic documentary *Jane*, comes a provocative look into the ways we can positively impact the world by changing our eating habits. "One of those rare, truly great books that can change the world." - John Robbins, author of *The Food Revolution* The renowned scientist who fundamentally changed the way we view primates and our relationship with the animal kingdom now turns her attention to an incredibly important and deeply personal issue-taking a stand for a more sustainable world. In this provocative and encouraging book, Jane Goodall sounds a clarion call to Western society, urging us to take a hard look at the food we produce and consume-and showing us how easy it is to create positive change. Offering her hopeful, but stirring vision, Goodall argues convincingly that each individual can make a difference. She offers simple strategies each of us can employ to foster a sustainable society. Brilliant, empowering, and irrepressibly optimistic, **HARVEST FOR HOPE** is one of the most crucial works of our age. If we follow Goodall's sound advice, we just might save ourselves before it's too late.

Patrick McDonnell-beloved, bestselling author-artist and creator of the

Mutts syndicated comic strip--shares the inspiring story of young Jane Goodall, the legendary and inspiring conservationist featured in the hit documentary film *Jane*. In his characteristic heartwarming style, Patrick McDonnell tells the story of the young Jane Goodall and her special childhood toy chimpanzee named Jubilee. As the young Jane observes the natural world around her with wonder, she dreams of "a life living with and helping all animals," until one day she finds that her dream has come true. With anecdotes taken directly from Jane Goodall's autobiography, McDonnell makes this very true story accessible for the very young--and young at heart. One of the world's most inspiring women, Dr. Jane Goodall is a renowned humanitarian, conservationist, animal activist, environmentalist, and United Nations Messenger of Peace. In 1977 she founded the Jane Goodall Institute (JGI), a global nonprofit organization that empowers people to make a difference for all living things.

*The Wild Life of Jane Goodall* Skyhorse

From the time she was a girl, Jane Goodall dreamed of a life spent working with animals. Finally she had her wish. When she was twenty-six years old, she ventured into the forests of Africa to observe chimpanzees in the wild. On her expeditions she braved the dangers with leopards and lions in the African bush. And she got to know an amazing group of wild chimpanzees -- intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own.

*Trailblazers: Jane Goodall* Astra Publishing House

The Development of an Extraordinary Species We human beings share 98 percent of our genes with chimpanzees. Yet humans are the dominant species on the planet -- having founded civilizations and religions, developed intricate and diverse forms of communication, learned science, built cities, and created breathtaking works of art -- while chimps remain animals concerned primarily with the basic necessities of survival. What is it about that two percent difference in DNA that has created such a divergence between evolutionary cousins? In this fascinating, provocative, passionate, funny, endlessly entertaining work, renowned Pulitzer Prize-winning author and scientist Jared Diamond explores how the extraordinary human animal, in a remarkably short time, developed the capacity to rule the world . . . and the means to irrevocably destroy it.

*A Twenty-First-Century Portrait of Our Closest Kin* HMH

Lavishly illustrated with more than eighty full-color photographs, a moving, personal account of the author's findings about the socialization of these endangered animals is intended to increase awareness about the need

to protect the chimpanzees.

"This biography for children will trace Goodall's life, but each chapter will also focus on two or more the chimpanzees that she observed, with information in sidebars about these particular animals. Along with biographical details, the book will explore the ethical issues that surround Goodall's work and show what has changed in our understanding of Great Apes. What do we know today about these animals in terms of language, speech, tool use, and DNA? How has sophisticated technology - GPS systems, Satellite imagery, portable digital microphones - been used to gain new information about animal populations."--

The story of a remarkable woman and her pioneering work.

Untamed Harper Collins

More than anything else, this is a book about love. In this deeply moving account, you will hear about Rambo, a sheep who informs the staff when another animal is in trouble; and Paulie, a former cockfighting rooster who eats lunch with humans; Dino, an old toothless pony who survived a fire; and many more. Alongside these horses, roosters, pigs, sheep, rabbits, cows, and other animals is a staff of loving humans for whom every animal life, even that of a frog rushed to the vet for emergency surgery, has merit. Reading this book can profoundly—and joyously—change your life.

**A Life with Chimps** Crabtree Publishing Company

The New York Times bestselling author of *The Jane Austen Book Club* introduces a middle-class American family that is ordinary in every way but one in this novel that won the PEN/Faulkner Award and was a finalist for the Man Booker Prize. Meet the Cooke family: Mother and Dad,

brother Lowell, sister Fern, and Rosemary, who begins her story in the middle. She has her reasons. "I was raised with a chimpanzee," she explains. "I tell you Fern was a chimp and already you aren't thinking of her as my sister. But until Fern's expulsion...she was my twin, my funhouse mirror, my whirlwind other half and I loved her as a sister." As a child, Rosemary never stopped talking. Then, something happened, and Rosemary wrapped herself in silence. In *We Are All Completely Beside Ourselves*, Karen Joy Fowler weaves her most accomplished work to date—a tale of loving but fallible people whose well-intentioned actions lead to heartbreaking consequences. "A gripping, big-hearted book...through the tender voice of her protagonist, Fowler has a lot to say about family, memory, language, science, and indeed the question of what constitutes a human being."—Khaled Hosseini
