is intended to serve as a text for classroom instruction in undergraduate, introductory courses in Engineering Economics. It also serves as a basic reference for use by practicing engineers in all specialty areas(e.g., chemical, civil, computer, electrical, industrial, and mechanical engineering). The book is also useful to persons engaged in the

activities. Used by engineering students worldwide, this best-selling text provides a sound understanding of the principles, basic concepts, and methodology of engineering economy. Built upon the rich and time-tested teaching materials of earlier editions, it is extensively revised and updated to reflect current trends and issues, with an

emphasis on the economics of engineering design throughout. It provides one of the most complete and up-to-date studies of this vitally important field.

MyEngineeringLab for Engineering Economy is a total learning package that is designed to improve results through personalized learning. MyEngineeringLab is an online homework, tutorial, and assessment program that truly

engages students in learning. It helps students better prepare for class, quizzes, and exams-resulting in better performance in the course-and provides educators a dynamic set of tools for gauging individual and class progress. Managerial Economics and Strategy Pearson Higher Ed For courses in Principles of Economics Acemoglu, Laibson, List: An evidence-based approach to economics

Throughout Economics, authors Daron Acemoglu, David Laibson, and John List use real economic questions and data to help students learn about the world around them. Taking a fresh approach, the authors use the themes of optimization, equilibrium and empiricism to illustrate the power of simple economic ideas, and their ability to explain, predict, and improve what happens in the world. Each chapter begins with an empirical question that is later answered using data in the Evidence-Based Economics feature. As a result of the

text's practical emphasis, students will learn to apply economic principles to guide the decisions they make in their own lives. MyEconLab is not included. Explorations in Economics
Pearson Higher Ed
An essential resource for anyone studying mathematics as part of their economics, management or business course. Mathematics for Economics and Business assumes very little prior knowledge of maths, starting with the basics and gradually building up to more advanced topics, making it suitable for use on both low- and high-level quantitative methods courses. Now in its ninth edition, the book has added even more

examples and practice questions, encouraging students to tackle problems for themselves as they read through each section. Worked examples clearly illustrate the link between maths and the business world and more challenging questions for those with advanced mathematical knowledge are included in starred sections. Detailed solutions to all questions are provided so that students can check their own progress, making it an ideal text for self-study. Pearson MyLab(tm) is the world's leading online self-study, homework, tutorial and

assessment product designed with a single purpose in mind: to improve the results of all higher education students, one student at a time. Please note: The duration of access to a MyLab is set by your instructor for your specific unit of study. To access the MyLab you need a Course ID from your instructor.

Intended primarily for
Managerial Economics courses,
this text also provides practical
content to current and aspiring
industry professionals. Economics
is a powerful tool that can help
managers to manage effectively.
In Managerial Economics Jeffrey
Perloff and James Brander use
real-world issues and examples
from actual markets to show
future managers how economic
principles can be used in business
decisions. In text examples and
boxed mini-cases use actual data
to illustrate how to use basic
models. For example, to illustrate
rivalry in oligopolistic markets,
the authors look at rivalry
between United and American

Airlines and between Coke and Pepsi. Mini-case examples include why American Apparel is vertically integrated and why upscale manufacturers limit the number of designer hand-bags a customer is allowed to buy. To help future managers learn to solve new problems, Perloff and Brander repeatedly demonstrate problem-solving through in-text Q&As. Each Q&A poses an important managerial or economic issue and demonstrates how to solve it using a step-by-step approach.
