Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just

by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii) refined and elaborated in workshops, and then (iii) scaled by analyzing the

judgments of one hundred teachers on the English language proficiency of the learners in their classes. *Speakout Upper Intermediate* LONGMAN University Success Reading is designed for English language learners preparing for mainstream academic environments. using a half dozen words. When the online storytelling magazine SMITH asked readers to submit six-word memoirs, they proved a whole, real life can be told this way too. The results are fascinating, hilarious, shocking, and moving. From small sagas of bittersweet romance (“Found true love, married someone else”) to proud achievements and stinging regrets (“After Harvard, had baby with crackhead”), these terse true tales relate the diversity of human experience in tasty bite-sized pieces.
