### Landmark Papers in General Surgery Creative Education

Landmark Papers in General Surgery will give surgeons, surgical trainees and other healthcare professionals an expert appraisal of key papers, and fast access to the evidence base behind current clinical practice in General Surgery. Each chapter draws together a fascinating selection of the most important clinical trials across every subspecialty within General Surgery, as selected and appraised by a panel of experts. Organized according to a common format, each discussion offers a clear structure by which to appraise the medical literature. Following a background summary of each trial, experts discuss the impact of the research and critique the methods used, giving the reader rapid understanding of the paper's place within the wider field of research. This emphasis on the tools of critical appraisal is enhanced by an introductory chapter equipping the reader with the skills required to knowledgeably appraise a research paper. For clinicians needing to keep abreast of the vast scope of medical research, this book will prove an interesting and timesaving resource, but it will also appeal to allied health professionals keen to improve the depth of their understanding of surgery. By bringing together the evidence base with expert guidance on critical appraisal, higher surgical trainees preparing for the academic and specialty sections of the FRCS exit examination will also find the text invaluable as a means of consolidating and nuancing their knowledge.

### Introduction to Clinical Skills McGraw Hill Professional

The patient interview is at the heart of psychiatric practice. Listening and interviewing skills are the primary tools the psychiatrist uses to obtain the information needed to make an accurate diagnosis and then to plan appropriate treatment. The American Board of Psychiatry and Neurology and the Accrediting Council on Graduate Medical Education identify interviewing skills as a core competency for psychiatric residents. The Psychiatric Interview: Evaluation and Diagnosis is a new and modern approach to this topic that fulfils the need for training in biopsychosocial assessment and diagnosis. It makes use of both classical and new knowledge of psychiatric diagnosis, assessment, treatment planning, and doctor – patient collaboration. Written by world leaders in education, the book is based on the acclaimed Psychiatry, Third Edition, by Tasman and Kay et al., with new chapters to address assessment in special populations and formulation. The psychiatric interview is conceptualized as integrating the patient ' s experience with psychological, biological, and environmental components of the illness. This is an excellent new text for psychiatry residents at all stages of their training. It is also useful for medical students interested in psychiatry and for practicing psychiatrists who may wish to refresh their interviewing skills.

### Surgical Palliative Care Independently Published

Palliative care has become increasingly important across the spectrum of healthcare, and with it, the need for education and training of a broad range of medical practitioners not previously associated with this field of care. Part of the Integrating Palliative Care series, this volume on surgical palliative care guides readers through the core palliative skills and knowledge needed to deliver high value care for patients with life-limiting, critical, and terminal illness under surgical care. Chapters explore the historical, philosophical, and spiritual principles of surgical palliative care, and follow the progression of the seriously ill surgical patient's journey from the pre-operative encounter, to the invasive procedure, to the post-operative setting, and on to survivorship. An overview of the future of surgical palliative care education and research rounds out the text. Surgical Palliative Care is an ideal resource for surgeons, surgical nurses, intensivists, and other practitioners who wish to learn more about integrating palliative care into the surgical field.

### First Aid for the USMLE Step 1 2020, Thirtieth edition McGraw-Hill Education / Medical

Colin Austin, Professor of Greek at Cambridge University 1998 – 2008, was one of the world ' s foremost experts in the reconstruction and interpretation of Greek comedy. When he died in August 2010, he was working towards a new edition of Menander for the series Oxford Classical Texts, for which he had completed only the shorter pieces: Dis Exapaton, Encheiridion, Georgos, Heros, Karchedonios, Kitharistes, Koneiazomenai, Leukadia, Perinthia, Phasma and Theophoroumene. The present volume contains the papyri and book fragments of these eleven plays, edited by Colin Austin. It has been prepared for publication by Richard Hunter and Peter Parsons. The Ultimate Guide To Choosing a Medical Specialty John Wiley & Sons

This important new verse translation of the extant works and major fragments of Callimachus includes a full Introduction, covering the poet's life and times, the range of his achievements, and the difficulties in the way of appreciation. It does not offer, as other translations do, a mere selection of fragments but presents them as integral parts of the poetry books in which they originally figured, as these can be reconstructed in the light of modern research. Each fragment is introduced in relation to what precedes and follows it, enabling students and general readers, for the first time ever, to assess what Callimachus was like in his most important productions. In addition to this introductory help, the Notes take up individual points of difficulty, all proper names and adjectives are explained in the Glossary, and comparative tables facilitate identification of the translated fragments in the standard editions.

The Biopsychosocial Formulation Manual McGraw Hill Professional

Based on George Engel ' s model, The Biopsychosocial Formulation Manual presents ways to help psychiatry residents and students effectively gather and organize patient data to arrive at a complete mental health history in a limited timeframe. While most current models only take one factor into account, Campbell and Rohrbaugh emphasize and analyze three essential components (biological, social, and psychological). The process of identifying pertinent data for each component of the biopsychosocial formulation is explicated in detail. A separate section outlines how to use the biopsychosocial formulation to generate treatment recommendations. This volume includes a complete package for practicing the biopsychosocial method; this easy-to-use guide includes a data record sheet and downloadable resources to facilitate organization and assessment, appealing to both the psychiatric professional and the trainee.
