"Locus of Authority argues that every issue facing today's colleges and universities, from stagnant degree completion rates to worrisome cost increases, is exacerbated by a century-old system of governance that desperately requires change. While prior studies have focused on boards of trustees and presidents, few have looked at the place of faculty within the governance system. Specifically addressing faculty roles in this structure, William G. Bowen and Eugene M. Tobin ask: do higher education institutions have what it takes to reform effectively from within? Bowen and Tobin use case studies of four very different institutions--the University of California, Princeton University, Macalester College, and the City University of New York--to demonstrate that college and university governance has capably adjusted to the necessities of the moment and that governance norms and policies should be assessed in the context of historical events. The authors examine how faculty roles have evolved since colonial days to drive change but also to stand in the way of it. Bowen and Tobin make the case that successful reform depends on the artful consideration of technological, financial, and cultural developments, such as the explosion in online learning. Stressing that they do not want to diminish faculty roles but to facilitate their most useful contributions, Bowen and Tobin explore whether departments remain the best ways through which to organize decision making and if the concepts of academic freedom and shared governance need to be sharpened and redefined. Locus of Authority shows that the consequences of not addressing college and university governance are more than the nation can afford"--

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Keys to College Success is an established first year experience textbook, designed for use with students taking courses related to the college transition and student success, and featuring a tried-and-true college-career-life connection and emphasis on thinking skills and problem-solving. This ninth edition adds a COVID-19 update -- a ten-page frontmatter section with up-to-the-minute information on digital and distributed learning as well as wellness and self-management strategies in the time of COVID-19. Update topics include synchronous and asynchronous learning elements, navigating technology and course websites, coping with stress in a time of crisis, and more. This text is built around a risk and reward theme, showing students how risking action to grow, thrive, and contribute can lead to the rewards of learning, meaningful employment, and community involvement. Inspiring case

studies open and close each chapter and show how a real person faced and surmounted a challenge by taking a calculated risk. Thinking skills coverage is another text-wide framework; comprehensive content with research references lend credibility and perspective to concepts, targeted exercises that explore personally relevant situations in context, and sustained focus throughout each topic. The text is tailored to the four-year program experience; acknowledging global economic change and instability, Keys to Success frames the four-year college experience in practical, work-relevant ways even as it supports the value of a liberal education. New coverage of resources, topics, and research, including work by Robert Sternberg, Carol Dweck, and Martin Seligman, support concepts. The twelve chapters cover all major student success topics -- adjusting to college; goals, time, and stress management; emotional and physical wellness; personality and learning preferences; critical, creative, and practical thinking; reading, research, and writing; note taking, memory, and studying; test taking; people, resources, and opportunities; planning for career success; mathematical and financial literacy; and diversity and communication. Exercises and features incorporate coaching language and intent, building accountability for the student, guiding the student to create personally relevant work, and asking powerful questions that encourage reflection and the development of self-knowledge.

Keys to College Success sets the standard for connecting academic success to success beyond school, showing students how to apply strategies within college, career, and life. This Eighth edition retains Keys' tried-and-true emphasis on thinking skills and problem solving, re-imagined with two goals in mind: One, a risk and reward framework that reflects the demands today's students face, and two, a focus on student experience specific to four-year schools with a more extensive research base and increased metacognition. Keys to College Success helps students take ownership, develop academic and transferable skills, and show the results of commitment and action so they are well equipped with the concentration, commitment, focus, and persistence necessary to succeed. MyStudentSuccessLab (www.mystudentsuccesslab.com) helps students to 'Start strong, Finish stronger' by acquiring the skills they need to succeed for ongoing personal and professional development. Teaching & Learning Experience: Strategies for College, Career, and Life Success Keys to College Success provides the established KEYS set of tools for success — an understanding of how coursework connects to career and life goal achievement, and analytical, creative, and practical thinking coverage that empowers a range of cognitive ability. This program provides:

- Personalized Learning with MyStudentSuccessLab: Whether face-to-face or online, MyStudentSuccessLab helps students build the skills they need through peer-led video interviews, interactive practice exercises, and activities that provide academic, life, and professionalism skills.
- College Connection to Career and Life Goals: Infused with a fresh focus on risk and reward, showing that the reward of success in the modern world demands a risk of vision and persistent effort over time. It raises the bar to show students that they must risk action to grow, thrive, and contribute in order to make their college investment pay off in gainful employment, meaningful work, and community involvement.
- Thinking Skills coverage: Comprehensive content with research references lend credibility and perspective to concepts, targeted exercises that explore personally relevant situations in context, and sustained focus throughout each topic.
- Tailored to the Four Year Program experience: Acknowledges global economic change and instability and hones in on student concerns about employability skills and debt management so the four-year college experience is framed in practical, work-relevant ways even as it supports the value of a liberal education. New coverage of resources, topics, and research support concepts.
