Wheeler Thackstons lively new translation of *The Jahangirnama*, co-published with the Freer/Arthur M. Sackler Gallery of the Smithsonian Institution, presents an engaging portrait of an intriguing emperor and his flourishing empire. The Emperor Jahangir is probably best know in the West as being the father of Shahjahan, who built the Taj Mahal. His reign was one of great prosperity, and his passion

for art and nature encouraged a flowering that some say rivaled European art during the rule of the Medicis. In penning his memoirs, Jahangir followed a tradition begun by his great-grandfather, the Emperor Babur. Jahangirs memoirs, however, provide not only the history of his reign, but also his reflections on art, politics, and private details about his family including the suicide of one of his wives and selections of poetry written by members of his harem. One of Jahangirs stories describes his astonishment at witnessing the fall of a

meteorite, an event that so amazed him that he ordered that a dagger be made from its metal. This book includes a selection of exquisite full-color paintings, drawings, and objects that specifically illustrate the passages they accompany--including a photograph of the Emperors treasured dagger. A lover of jewels, nature, hunting, drinking, and opiates, Jahangir carried the Mughal empire to artistic and political heights. Refreshingly candid and frank, this splendidly illustrated edition of Jahangir's memoirs is a thoroughly absorbing profile of an emperor and the zenith of his empire.

How the Racers Ski Wizards of the Coast From the New York Times bestselling author of Upheaval, a fun and wide-ranging exploration of why human sexuality is so different from other animals', and how it made us who we are To us humans, the sex lives of animals seem weird. But it's our own sex lives that are truly bizarre. We are the only social species to insist on carrying out sex privately. Stranger yet, we have sex at any time, even during periods of infertility, such as pregnancy or post-menopause. A human female doesn't

know her precise time of fertility and certainly doesn't advertise it to human males by the striking color changes, smells, and sounds used by other female mammals. Why do we differ so radically in these and other important aspects of our sexuality from our closest ancestor, the apes? Why does the human female, virtually alone among mammals, go through menopause? Why does the human male stand out as one of the few mammals to stay with the female he impregnates, to help raise the children that he sired? Why is the human penis so unnecessarily large? There is no one better qualified than Jared Diamond to explain the evolutionary forces that operated on our ancestors to make us so different sexually. With wit and a wealth of fascinating examples, *Why Is Sex Fun?* shows how our sexuality, as much as our large brains or upright posture, led to human's rise in the animal kingdom. *Proceedings of the 1st International Conference on Sustainable Waste Management through Design* John Wiley & Sons

fundamentally reshaping Latino families. Drawing on two waves of interviews with undocumented young adults, Enriquez investigates how immigration status creeps into the most personal aspects of everyday life, intersecting with gender to constrain family formation. The imprint of illegality remains, even upon obtaining DACA or permanent residency. Interweaving the perspectives of US citizen romantic partners and children, Enriquez illustrates the multigenerational punishment that limits the upward mobility of Latino families. *Of Love and Papers* sparks an intimate understanding of contemporary US immigration policies and their enduring consequences for immigrant families.

This document sets out the strategy to transform the business of government through increased and better use of technology. It is directed at three key areas: (1) the transformation of public services for the benefit of citizens, businesses, taxpayers and front-line staff; (2) the efficiency of the corporate services and infrastructure of government organizations; (3) the steps necessary to achieve effective delivery of technology for government. To achieve this, services must be designed around the citizen or business, not the provider. Government must move to a shared services culture, releasing efficiencies by standardisation, simplification and sharing. And there must be more professionalism in the planning, delivery, management, skills and governance of IT in government. A detailed action plan to implement the strategy will be approved by the Chief Information Officers' Council and the Service Transformation Board, and published before the end of this financial year. Comments on the strategy (by 3 February 2006) are welcomed: [itstrategyprojectteam@cabinet-office.x.gsi.gov.uk](mailto:itstrategyprojectteam@cabinet-office.x.gsi.gov.uk); Strategy Team, eGovernment Unit, Cabinet Office, 3rd Floor, Stockley House, 130 Wilton Road, London SW1V 1LQ (tel 020 7276 63160)

The bestselling author of *Collapse and Guns, Germs and Steel* surveys the history of human societies to answer the question: What can we learn from traditional societies that can make the world a better place for all of us? "As he did in his Pulitzer Prize-winning *Guns, Germs, and Steel*, Jared Diamond continues to make us think with his mesmerizing and absorbing new book." Bookpage Most of us take for granted the features of our modern society, from air travel and

telecommunications to literacy and obesity. Yet for nearly all of its six million years of existence, human society had none of these things. While the gulf that divides us from our primitive ancestors may seem unbridgeably wide, we can glimpse much of our former lifestyle in those largely traditional societies still or recently in existence. Societies like those of the New Guinea Highlanders remind us that it was only yesterday—in evolutionary time—when everything changed and that we moderns still possess bodies and social practices often better adapted to traditional than to modern conditions. *The World Until Yesterday* provides a mesmerizing firsthand picture of the human past as it had been for millions of years—a past that has mostly vanished—and considers what the differences between that past and our present mean for our lives today. This is Jared Diamond's most personal book to date, as he draws extensively from his decades of field work in the Pacific islands, as well as evidence from Inuit, Amazonian Indians, Kalahari San people, and others. Diamond doesn't romanticize traditional societies—after all, we are shocked by some of their practices—but he finds that their solutions to universal human problems such as child rearing, elder care, dispute resolution, risk, and physical fitness have much to teach us. Provocative, enlightening, and entertaining, *The World Until Yesterday* is an essential and fascinating read.

They may shave their heads, don simple robes, and renounce materialism and worldly desires. But the women seeking enlightenment in a Buddhist nunnery high in the folds of Himalayan Kashmir invariably find themselves subject to the tyrannies of subsistence, subordination, and sexuality. Ultimately, Buddhist monasticism reflects the very world it is supposed to renounce. Butter and barley prove to be as critical to monastic life as merit and meditation. Kim Gutschow lived for more than three years among these women, collecting their stories, observing their ways, studying their lives. Her book offers the first ethnography of Tibetan Buddhist society from the perspective of its nuns. Gutschow depicts a gender hierarchy where nuns serve and monks direct, where monks bless the fields and kitchens while nuns toil in them. Monasteries may retain historical endowments and significant political and social power, yet global flows of capitalism, tourism, and feminism have begun to erode the balance of power between monks and nuns. Despite the obstacles of being considered impure and inferior, nuns engage in everyday forms of resistance to

pursue their ascetic and personal goals. A richly textured picture of the little known culture of a Buddhist nunnery, the book offers moving narratives of nuns struggling with the Buddhist discipline of detachment. Its analysis of the way in which gender and sexuality construct ritual and social power provides valuable insight into the relationship between women and religion in South Asia today.
