Of Love and Papers DigiCat

A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Of Love and Papers explores how immigration policies are fundamentally reshaping Latino families. Drawing on two waves of interviews with undocumented young adults, Enriquez investigates how immigration status creeps into the most personal aspects of everyday life, intersecting with gender to constrain family formation. The imprint of illegality remains, even upon obtaining DACA or permanent residency. Interweaving the perspectives of US citizen romantic partners

and children, Enriquez illustrates the multigenerational punishment that limits the upward mobility of Latino families. Of Love and Papers sparks an intimate understanding of contemporary US immigration policies and their enduring consequences for immigrant families.

The September 2014 elections in Fiji was one of the most anticipated in the history of the country, coming after eight years of military rule and under a radically new constitution that introduced a system of proportional representative (PR) and without any reserved communal seats. The election was won overwhelmingly by FijiFirst, a party formed by 2006 coup leader Frank Bainimarama. He subsequently embarked on a process of shifting the political configuration of Fijian politics from inter-ethnic to trans-ethnic mobilisation. The shift has not been easy in

terms of changing people ' s perceptions and may face some challenges in the longer term, despite Bainimarama ' s clear victory in the polls. Ethnic consciousness has the capacity to become re-articulated in different forms and to seek new opportunities for expression. This book explores these and other issues surrounding the 2014 Fiji elections in a collection of articles written from varied political, intellectual and ideological positions.

From the author of No.1 international bestseller Collapse, a mesmerizing portrait of the human past that offers profound lessons for how we can live today Visionary, prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers Guns, Germs and Steel and

Collapse. Now he returns with another epic - and groundbreaking - journey into our rapidly receding past. In *The World Until Yesterday*, Diamond reveals how traditional societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history - until virtually yesterday, in evolutionary terms - and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems, from childrearing to conflict resolution to health, and discovers we have much to learn from traditional ways of life. He unearths remarkable findings - from the reason why modern afflictions like diabetes, obesity and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of multilingualism. Panoramic in scope and thrillingly original, *The World Until Yesterday* provides an enthralling first-hand picture of the human past that

also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy-bestseller *Guns, Germs, and Steel*, which was named one of *TIME*'s best non-fiction books of all time, and *Collapse*, a #1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology and history, among others.

Since 1958 the Maritime Administration

has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with

Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J.

To us humans the sex lives of many animals seem weird. In fact, by comparison with all the other animals, we are the ones with the weird sex lives. How did that come to be? Just count our bizarre ways. We are the only social species to insist on carrying out sex privately. Stranger yet, we have sex at any time, even when the female can't be fertilized (for example, because she is already pregnant, post-menopausal, or between fertile

cycles). A human female doesn't know her precise time of fertility and certainly doesn't advertise it to human males by the striking color changes, smells, and sounds used by other female mammals. Why do we differ so radically in these and other important aspects of our sexuality from our closest ancestor, the apes? Why does the human female, virtually alone among mammals go through menopause? Why does the human male stand out as one of the few mammals to stay (often or usually) with the female he impregnates, to help raise the children that he sired? Why is the human penis so unnecessarily large? There is no one better qualified than Jared Diamond—renowned expert in the fields of physiology and evolutionary biology and award-winning author—to explain the evolutionary forces that operated on our ancestors to make us sexually different. With wit and a wealth of fascinating examples, he explains how our sexuality has been as crucial as our large brains and upright posture in our rise to human status.

'Reader's Digest' Repair Manual Penguin UK
This document sets out the strategy to transform the business of government through increased and better use of technology. It is directed at three key areas: (1) the transformation of public services for the benefit of citizens, businesses, taxpayers and front-line staff; (2) the efficiency of the corporate services and infrastructure of government organizations; (3) the steps necessary to achieve effective delivery of technology for government. To achieve this, services must be designed around the citizen or business, not the provider. Government must move to a shared services culture, releasing efficiencies by standardisation, simplification and sharing. And there must be more professionalism in the planning, delivery, management, skills and governance of IT in government. A detailed action plan to implement the strategy will be approved by the Chief Information Officers' Council and the Service Transformation Board, and published before the end of this financial year. They may shave their heads, don simple robes,
and renounce materialism and worldly desires.
But the women seeking enlightenment in a
Buddhist nunnery high in the folds of
Himalayan Kashmir invariably find themselves
subject to the tyrannies of subsistence,
subordination, and sexuality. Ultimately,
Buddhist monasticism reflects the very world it
is supposed to renounce. Butter and barley
prove to be as critical to monastic life as merit
and meditation. Kim Gutschow lived for more
than three years among these women,
collecting their stories, observing their ways,

studying their lives. Her book offers the first
ethnography of Tibetan Buddhist society from
the perspective of its nuns. Gutschow depicts a
gender hierarchy where nuns serve and monks
direct, where monks bless the fields and kitchens
while nuns toil in them. Monasteries may retain
historical endowments and significant political
and social power, yet global flows of capitalism,
tourism, and feminism have begun to erode the
balance of power between monks and nuns.
Despite the obstacles of being considered
impure and inferior, nuns engage in everyday
forms of resistance to pursue their ascetic and
personal goals. A richly textured picture of the
little known culture of a Buddhist nunnery, the
book offers moving narratives of nuns struggling
with the Buddhist discipline of detachment. Its
analysis of the way in which gender and
sexuality construct ritual and social power

provides valuable insight into the relationship between women and religion in South Asia today.
