This booklet contains typical midterm and final exams that you may encounter in any Calculus I course (for non-Math majors) at just about any university in North America. Calculus I course typically covers the following topics: limits of functions, continuity, derivatives, related rates, maxima and minima (local and global/absolute), the Extreme Value Theorem, the Mean Value Theorem (MVT), indefinite integrals, and the Fundamental Theorem of Calculus. If you are preparing for a Calculus exam, or are reviewing the material from Calculus I, or are thinking about taking this course, this booklet will be quite useful. Note that it is expected that you solve the midterm and final exams in this booklet within one and two hours, respectively. You should first attempt all problems on your own and then check your answers using the respective answer key. You should not be looking at solutions before that. This is the best way for you to learn. Good luck!
