 Finite model theory, as understood here, is

an area of mathematical logic that has developed in close connection with applications to computer science, in particular the theory of computational complexity and database theory. One of the fundamental insights of mathematical logic is that our understanding of mathematical phenomena is enriched by elevating the languages we use to describe mathematical structures to objects of explicit study. If mathematics is the science of patterns, then the media through which we discern patterns, as well as the structures in which we discern them, command our attention. It is this aspect of logic which is most prominent in model theory, " the branch of mathematical logic which deals with the relation between a formal language and its interpretations " . No wonder, then, that mathematical logic, and finite model theory in particular, should find manifold applications in computer science: from specifying programs to querying databases, computer science is rife with phenomena whose understanding requires close attention to the interaction between language and structure. This volume gives a broad overview of some central themes of finite model theory: expressive power, descriptive complexity, and zero – one laws, together with selected applications to database theory and artificial intelligence, especially constraint databases and constraint satisfaction problems. The final chapter provides a concise modern introduction to modal logic, which emphasizes the continuity in spirit and technique with finite model theory.
[APC Question Bank and Sample Papers in Mathematics for Class 12 - Arya Publishing Company](#) Oswaal Books
 PREFACE This book is specially written for students preparing for the GCE O Level Examination in Mathematics Syllabus (4016). It consists of 10 revision exercises, each comprising Paper 1 and Paper 2, based on the LATEST syllabus. The format and weightage of the questions follow those of the specimen examination papers issued by the Examination Board closely. Investigative and problem-solving questions are included. New Examination Format Paper 1 consists of about 21 to 26 compulsory short questions worth a total of 80 marks. The duration of the paper is 2 hours. Paper 2 consists of 10 to 11 questions of varying marks and lengths testing more on higher order thinking skills. Candidates must answer ALL questions. Calculators may be used in both papers. The weightage for both papers, however, will be equal, each accounting for 50% of the examination. It is hoped that this book will help students to gain confidence and be fully equipped for their forthcoming examinations.
