John Calvin Allen,
professionally known as J. C.,
worked as a photographer for
Purdue University from
1909-1952, and operated his
own photography business
until his death in 1976. The J.
C. Allen photographs
represent a historical account
of the transition from pioneer

practices to scientific methodologies in agriculture and rural communities. During this major transitional period for agriculture, tractors replaced horses, hybrid corn supplanted open-pollinated corn, and soybeans changed from a novelty crop to regular rotation on most farms. During this time, purebred animals with better genetic pedigrees replaced run-of-the-mill livestock, and systematic disease prevention in cattle, swine, and poultry took place. Allen's photographs also document clothing styles, home furnishings, and the items people thought important as they went about their daily lives. Looking closely at tractors, livestock, wagons, planters, sprayers, harvesting equipment, and crops gives one a sense of the changing and fast-paced world of agriculture at that time. This volume contains over 900 picturesque images, most never-before-

seen, of men, women, and children working on the farm, which remain powerful reminders of life in rural America at the turn of the twentieth century. As old farmhouses and barns fall victim to age, Allen photographs are all that remain. While those people and times no longer exist today, they do remain "alive" because of the preservation of that history on film. A camera in his hands and an eye for photography allowed Allen to create indelible visual histories that continue to tell the story of agriculture and rural life from long ago.

Factors Affecting the Efficiency of the Mechanical Corn Picker Penguin

This antiquarian volume contains a comprehensive guide to the various types of machinery used in corn

picking and shelling. It offers detailed descriptions of the machinery in question, along with handy information on how they are best used, problems that may be encountered during their operation, and a wealth of other information conducive to successful corn picking. Complete with detailed illustrations and helpful graphs and tables, this text will be of considerable value to farmers with an interest in the subject, and it is not to be missed by collectors of antiquarian literature of this ilk. The chapters of this book include: 'Types of Machines', 'Functional Elements of Corn Harvesters', 'Gathering Devices and Snapping Units', 'Types of Snapping Rolls', 'Adjustment of Snapping Rolls', 'Trash Removal', 'Husking Units', 'Adjustment of Husking Unit', 'Shelling and Cleaning Unit', 'Field Losses with Corn Harvesters', etcetera. We are proud to republish this vintage text, now complete with a new introduction on agricultural tools and machinery.

Memories of Life on the Farm Lindhardt og Ringhof
 The timeless and practical advice in The Magic of Thinking Big clearly demonstrates how you can:
 Sell more Manage better
 Lead fearlessly Earn more
 Enjoy a happier, more fulfilling life With applicable and easy-to-implement

insights, you ' ll discover:
Why believing you can
succeed is essential How to
quit making excuses The
means to overcoming fear
and finding confidence How
to develop and use creative
thinking and dreaming Why
making (and getting) the
most of your attitudes is
critical How to think right
towards others The best
ways to make “ action ” a
habit How to find victory in
defeat Goals for growth, and
How to think like a leader
"Believe Big, ” says
Schwartz. “ The size of your
success is determined by the
size of your belief. Think
little goals and expect little
achievements. Think big
goals and win big success.
Remember this, too! Big
ideas and big plans are often
easier -- certainly no more
difficult - than small ideas
and small plans."

Purdue University Press
Filmatized in 2013 and
the official recipient of
three Oscars, Solomon
Northup's powerful slave
narrative 'Twelve Years a
Slave' depicts Nortup's
life as he is sold into
slavery after having spent
32 years of his life living
as a free man in New
York. Working as a
travelling musician,
Northup goes to
Washington D.C, where
he is kidnapped, sent to
New Orleans, and sold to
a planter to suffer the
relentless and brutal life
of a slave. After a dozen
years, Northup escapes
to return to his family and
pulls no punches, as he
describes his fate and
that of so many other
black people at the time.
It is a harrowing but vitally

important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Metal Read Books Ltd
Provocative, challenging, and fun, The Ideal Problem Solver offers a sound, methodical approach for resolving problems based on the IDEAL (Identify, Define, Explore, Act, Look) model. The authors suggest new strategies for enhancing creativity, improving memory, criticizing ideas and generating alternatives, and communicating more effectively with a wider range of people. Using the results of laboratory research previously available only in a piece-meal fashion or in scientific journals, Bransford and Stein discuss

such issues as Teaming new information, overcoming blocks to creativity, and viewing problems from a variety of perspectives.

The Magic of Thinking Big Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In Good Strategy/Bad Strategy, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.”

He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007 – 08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, Good Strategy/Bad Strategy stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.
