I recently purchased the Nakamichi RE-10 off of eBay for a total of \$152.50 (shipping included) by virtue of getting the last bid in at the last second. This included the correct remote. I am nothing but happy with this purchase. All these reviews complaining about fan noise - well my unit produces ZERO fan noise.

The Nakamichi SR-3A is one of the first receivers licensed to use the Stasis audio-amplifier topology developed by Threshold Corp. The Stasis circuit was designed to provide completely stable, low-distortion output without using overall negative feedback. It does this by combining a very low-distortion, low-output impedance amplifier with a

high-impedance, high-cur-rent "bootstrap" amplifier in a single output stage.
