You are about to become obsolete. You think you are special, unique, and that whatever it is that you are doing is impossible to replace. You are wrong. As we speak, millions of algorithms created by computer scientists are frantically running on servers all over the world, with one sole purpose: do whatever humans can do, but better. That is the argument for a phenomenon called technological unemployment, one that is pervading modern society. But is that really the case? Or is it just a futuristic fantasy?

What will become of us in the coming years, and what can we do to prevent a catastrophic collapse of society? Robots Will Steal Your Job, But That's OK: how to survive the economic collapse and be happy explores the impact of technological advances on our lives, what it means to be happy, and provides suggestions on how to avoid a systemic collapse.

Chilling and taut, NAMELESS, introduces a fresh and exciting twist on the deadly game of cat and mouse. By virtue of one impulsive and deeply human, but all too grave mistake, a good and decent man finds himself pitted against the embodiment of evil and threatened with losing everything and everyone he loves and values; including the pristine reputation he has endeavored all his adult life to establish. FBI Special Agent in Charge Daniel Falcone unwittingly steps onto

course for a head-on collision with a frighteningly brilliant psychotic serial killer, whose harrowing childhood abuse and neglect left him devoid of humanity and salivating for revenge. Framed for a brutal murder on a commercial cruise ship, and fighting for the right to raise his sons and clear his name, Falcone races against the clock and struggles to keep his eyes on the prize, even while his profound guilt and self-loathing threaten to destroy him faster than his maniacal adversary.

The Sex Myth Little, Brown

One person wades through a seemingly unconnected series of events--a methodical mass killing in Pennsylvania, a missing girl in California, and the possible death of a couple in Montana--on the way to a confrontation with the Straw Men.

That Will Change Your Life Forever will teach you the seven most important keys for growing nearer to Him. *The Failure of the American Baptist Culture* Penguin
A fantastical reimagining of the American West which draws its influence from steampunk, the American western tradition, and magical realism The world is only half made. What exists has been carved out amidst a war between two rival factions: the Line, paving the world with industry and claiming its residents as slaves; and the Gun, a cult of terror and violence that cripples the population with fear. The only hope at stopping them has seemingly disappeared—the Red Republic that once battled the Gun and the Line, and almost won. Now they're just a myth, a bedtime story parents tell their children, of hope. To the west lies a vast, uncharted world, inhabited only by the legends of the immortal and powerful Hill People, who live at one with the earth and its elements. Liv Alverhusen, a doctor of the new science of psychology, travels to the edge of the made world to a spiritually protected mental institution in order to study the minds of those broken by the Gun and the Line. In its rooms lies an old general of the Red Republic, a man whose shattered mind just may hold the secret to stopping the Gun and the Line. And either side will do anything to understand how. The Anthology of Babel HarperCollins

Discover the definitive history of DARPA, the Defense Advanced Research Project Agency, in this Pulitzer Prize finalist from the author of the New York Times bestseller *Area 51*. No one has ever written the history of the Defense Department's most secret, most powerful, and most controversial military science R&D agency. In the first-ever history about the organization, New York Times bestselling author Annie Jacobsen draws on inside sources, exclusive

interviews, private documents, and declassified memos to paint a picture of DARPA, or "the Pentagon's brain," from its Cold War inception in 1958 to the present. This is the book on DARPA -- a compelling narrative about this clandestine intersection of science and the American military and the often frightening results.

Symbaroum - Thistle Hold - Wrath of the Warden Weidenfeld & Nicolson

In *Red Dynamite*, Carl R. Weinberg argues that creationism's tenacious hold on American public life depended on culture-war politics inextricably embedded in religion. Many Christian conservatives were convinced that evolutionary thought promoted immoral and even bestial social, sexual, and political behavior. The "fruits" of subscribing to Darwinism were, in their minds, a dangerous rearrangement of God-given standards and the unsettling of traditional hierarchies of power.

Despite claiming to focus exclusively on science and religion, creationists were practicing politics. Their anticommunist campaign, often infused with conspiracy theory, gained power from the fact that the Marxist founders, the early Bolshevik leaders, and their American allies were staunch evolutionists. Using the Scopes "Monkey" Trial as a starting point, Red

Dynamite traces the politically explosive union of Darwinism and communism over the next century. Across those years, social evolution was the primary target of creationists, and their "ideas have consequences" strategy instilled fear that shaped the contours of America's culture wars. By taking the anticommunist arguments of creationists seriously, Weinberg reveals a neglected dimension of antievolutionism and illuminates a source of the creationist movement's continuing strength. Why everything the media tells us about sex is wrong ... Is there any truth to the epidemic of sex addiction? Are our children really getting sexualised younger? Are men the only ones who like porn? Brooke Magnanti looks at all these questions and more - and proves that perhaps we've all been taking the answers for granted. Brooke Magnanti is no stranger to controversy. As Belle de Jour she enthralled and outraged the nation in equal measure. Now her real identity is out in the open, Brooke's background as a scientist and a researcher can come to bear in her fascinating investigation into the truth behind the headlines, scandals and moral outrage that fill the media (and our minds) when it comes to sex. Using her entertaining and informed voice, Brooke strips away the hype and looks at the science behind sex and the panic behind public policy. Unlike so many media column inches, Brooke uses verifiable academic research. This is fact not fiction; science not supposition. So sit back, open your mind and prepare to be shocked ...

Deadly Secrets Tangled Lies Woven truths Incapable. Awkward. Artless. That's what the other girls whisper behind her back. But sixteen-year-old Adelize Lewys has

a secret: She wants to fail. Gifted with the ability to weave time with matter, she's exactly what the Guild is looking for, and in the world of Arras, being chosen to work the looms is everything a girl could want. It means privilege, eternal beauty, and being something other than a secretary. It also means the power to manipulate the very fabric of reality. But if controlling what people eat, where they live, and how many children they have is the price of having it all, Adeline isn't interested. Not that her feelings matter, because she slipped and used her hidden talent for a moment. Now she has one hour to eat her mom's overcooked pot roast. One hour to listen to her sister's academy gossip and laugh at her dad's jokes. One hour to pretend everything's okay. And one hour to escape. Because tonight, they'll come for her.

The Truth about Crime Harper Collins

In this book, renowned anthropologists Jean and John L. Comaroff make a startling but absolutely convincing claim about our modern era: it is not by our arts, our politics, or our science that we understand ourselves—it is by our crimes. Surveying an astonishing range of forms of crime and policing—from petty thefts to the multibillion-dollar scams of too-big-to-fail financial institutions to the collateral damage of war—they take readers into the disorder of the late modern world. Looking at recent transformations in the triangulation of capital, the state, and governance that have led to an era where crime and policing are ever more complicit, they offer a powerful meditation on the new forms of sovereignty, citizenship, class, race, law, and political economy of representation that have arisen. To do so, the Comaroffs draw on their vast knowledge of South Africa, especially, and its

struggle to build a democracy founded on the rule of law out of the wreckage of long years of violence and oppression. There they explore everything from the fascination with the supernatural in policing to the extreme measures people take to prevent home invasion, drawing illuminating comparisons to the United States and United Kingdom. Going beyond South Africa, they offer a global criminal anthropology that attests to criminality as the constitutive fact of contemporary life, the vernacular by which politics are conducted, moral panics voiced, and populations ruled. The result is a disturbing but necessary portrait of the modern era, one that asks critical new questions about how we see ourselves, how we think about morality, and how we are going to proceed as a global society.

The Pentagon's Brain MDPI

A powerful story of war in our time, of love of country, the experience of tragedy, and a platoon at the center of it all. This is a story that starts off close and goes very big. The initial part of the story might sound familiar at first: it is about a platoon of mostly nineteen-year-old boys sent to Afghanistan, and an experience that ends abruptly in catastrophe. Their part of the story folds into the next: inexorably linked to those soldiers and never comprehensively reported before is the U.S. Department of Defense's quest to build the world's most powerful biometrics database, with the ability to identify, monitor, catalog, and police people all over the world. *First Platoon* is an American saga that illuminates a transformation of society made possible by this new technology. Part war story, part legal drama, it is about identity in the age of identification. About humanity—physical bravery, trauma, PTSD, a yearning to do right and good—in the age of

biometrics, which reduce people to iris scans, fingerprint scans, voice patterning, detection by odor, gait, and more. And about the power of point of view in a burgeoning surveillance state. Based on hundreds of formerly classified documents, FOIA requests, and exclusive interviews, *First Platoon* is an investigative exposé by a master chronicler of government secrets. *First Platoon* reveals a post-9/11 Pentagon whose identification machines have grown more capable than the humans who must make sense of them. A Pentagon so powerful it can cover up its own internal mistakes in pursuit of endless wars. And a people at its mercy, in its last moments before a fundamental change so complete it might be impossible to take back.

"One doesn't have to be a panjandrum of Communications to realize that television does something to us," Michael Arlen (former TV critic of *The New Yorker*) writes in the Introduction to *Living-Room War*. He continues, "Television has a transforming effect on events. It has a transforming effect on the people who watch the transformed events-it's just hard to know what that is." *Living-Room War* is Arlen's valiant-and entertaining-attempt to figure out exactly what exactly television does to us. This timeless collection of essays provides a poetic look at 1960s television culture, ranging from the Vietnam war to *Captain Kangaroo*, from the 1968 Democratic convention to televised sports.
