In 1990, a congressional subcommittee warned of financial knaves and buccaneers in the insurance industry-unlicensed and largely unregulated companies that operate out of countries like Antigua and the Cayman Islands and sell hundreds of millions of dollars in worthless insurance policies to unsuspecting Americans every year. Increasingly, when a fire, car accident, or medical emergency strikes, policyholders suddenly find themselves victims of a global con game as phone calls are not returned and claim settlements fall to materialize, resulting in financial ruin if not physical harm. Global Pirates is a critical investigation of international insurance fraud. Robert Tillman portrays the often surreal world of the burgeoning offshore insurance industry; a world in which sophisticated white-collar criminals operate beyond the reach of government regulators to set up elaborately orchestrated scams that drain illegal profits out of the \$3 trillion U.S. insurance market. He also describes how the new global economy allows these scam artists to take advantage of rapidly changing financial markets and the regulatory environments that surround them. Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.
