My book began as a very small idea in my head to help keep my personal life more organized. And, as it grew, it became apparent that maybe I wasn't the only person in the world that wanted to keep their records in one area. So, as it grew and grew, it became a book called "KNOW IT ALL - The Book About You". It should allow you to keep pertinent information close at hand.

There is a chapter for hopefully, anything that you wish to keep track of. Some categories are detail and unlike myself, you might not want to spend the required time on entering information. But, in my own book after I have entered information it has proven itself to be a valuable record of the "goings-on" in my life.

Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

How to Start a Title Insurance Company

In 1990, a congressional subcommittee warned of financial knaves and buccaneers in the insurance industry-unlicensed and largely unregulated companies that operate out of countries like Antigua and the Cayman Islands and sell hundreds of millions of dollars in worthless insurance policies to unsuspecting Americans every year. Increasingly, when a fire, car accident, or medical emergency strikes, policyholders suddenly find themselves

victims of a global con game as phone calls are not returned and claim settlements fall to materialize, resulting in financial ruin if not physical harm. He also describes how the new global economy allows these scam artists to take advantage of rapidly changing financial markets and the regulatory environments that surround them. Drawing on congressional hearings, co
