The Joint Royal Colleges Ambulance Liaison Committee guidelines are the essential resource for paramedics. The 2019 edition of the book has been brought up to date with the latest evidence and developments in clinical practice. JRCALC combines expert advice with practical guidance to help paramedics in their challenging roles with the overall objective of improving patient care. Key updates are: • Resuscitation and cardiac arrest. The pathophysiology of cardiac arrest, checklist use and pulseless electrical activity is discussed extensively within the context of every day out of hospital practice. A new guideline on tracheostomy and laryngectomy is included, alongside clinical skills photographs. • Consent and patient confidentiality. The guideline is brought up to date with the Data Protection Act 2018 following the General Data Protection Regulations. • Mental health presentation: crisis, distress and disordered behaviour. A reviewed guideline supports the clinician with practical help on the assessment and management of different mental health illnesses. • Major, complex and high risk Incidents. A revision by the National Ambulance Resilience Unit covers poisons, rail incidents and police incapacitants. • New medicines are included: Activated charcoal, duodote and morphine sulfate for end of life care. • Other reviews and updates include: head injury, hyperventilation syndrome, stroke, respiratory illness in children and acute coronary syndrome.

A Practical Guide to Pediatric Emergency Medicine Jones & Bartlett Learning

The extraordinary story of an unjustly forgotten group of Black men in Pittsburgh who became the first paramedics in America, saving lives and changing the course of emergency medicine around the world Until the 1970s, if you suffered a medical crisis, your chances of survival were minimal. A 9-1-1 call might bring police or even the local funeral home. But that all changed with Freedom House EMS in Pittsburgh, a group of Black men who became America's first paramedics and set the gold standard for emergency medicine around the world, only to have their story and their legacy erased—until now. In American Sirens, acclaimed journalist and paramedic Kevin Hazzard tells the dramatic story of how a group of young, undereducated Black men forged a new frontier of healthcare. He follows a rich cast of characters that includes John Moon, an orphan who found his calling as a paramedic; Peter Safar, the Nobel Prize-nominated physician who invented CPR and realized his vision for a trained ambulance service; and Nancy Caroline, the idealistic young doctor who turned a scrappy team into an international leader. At every turn, Freedom House battled racism—from the community, the police, and the government. Their job was grueling, the rules made up as they went along, their mandate nearly impossible—and yet despite the long

odds and fierce opposition, they succeeded spectacularly. Never-before revealed in full, this is a rich and troubling hidden history of the Black origins of America's paramedics, a special band of dedicated essential workers, who stand ready to serve day and night on the line between life and death for every one of us.
