Delegates and friends, we are very pleased to extend to you a warm welcome to this, the 12th International Conference on Knowledge-Based and Intelligent Information and Engineering Systems organised by the Faculty of Electrical Engineering and Computing at the University of Zagreb, in association with KES International. For over a decade, KES International has provided an annual wide-spectrum intelligent systems conference for the applied artificial intelligence research community. Having originated in Australia and been held there during 1997 – 99, the conference visited the UK in 2000, Japan in 2001, Italy in 2002, the UK in 2003, New Zealand in 2004, Australia in 2005, the UK in 2006, Italy in 2007, and now in Zagreb, Croatia in 2008. It is planned that KES 2009 will be held in Santiago, Chile before returning to the UK in 2010. The KES conference is a sure and regularly attracts several hundred delegates. As it encompasses a broad range of intelligent systems topics, it provides delegates with an opportunity to mix with researchers from other groups and learn from them. The conference is linked to the International Journal of Intelligent and Knowledge-Based Systems, published by IOS Press under KES editorship. Extended and enhanced versions of the best papers presented at the KES conference may be published in the Journal. In addition to the annual wide-range intelligent systems conference, KES has run successful symposia in several specific areas of the discipline. Agents and Multi-Agent Systems is a popular area of research.

Beer is a beverage with more than 8000 years of history, and the process of brewing has not changed much over the centuries. However, important technical advances have allowed us to produce beer in a more sophisticated and efficient way. The proliferation of specialty hop varieties has been behind the popularity of craft beers seen in the past few years around the world. Craft brewers interpret historic beer with unique styles. Craft beers are undergoing an unprecedented period of growth, and more than 150 beer styles are currently recognized.

As the 1950s dawned, General Motors focused its industrial might on producing revolutionary rather than evolutionary cars with the ultimate goal to become the clear market leader in the automotive industry. To accomplish this goal, the company designed, developed, and consistently released innovative automotive technology. During the decade, Chevrolet introduced the small-block V-8, automatic transmission, air-conditioning, power steering, and many other innovations that made the cars faster, more comfortable, and safer. All of the pieces had fallen into place. General Motors had astute leadership, a brilliant engineering team, forward-thinking stylists, a massive manufacturing infrastructure, and the capability to produce cutting-edge technology. With unbridled optimism and exuberance to meet the demands of the booming U.S. economy of the 1950s, the company designed, developed, and delivered an unprecedented number of breakthrough technologies, and established the blueprint for the modern automobile. Automotive historian and veteran author David Temple goes behind the scenes to reveal how these technologies were designed, manufactured, and installed on Chevrolet's fine portfolio of cars: the Corvette, 1955-1957 Bel Air, Nomad, Impala, and many more. Inside General Motors, many dedicated and talented leaders who were

determined to make Chevrolet cars the best on the market. Vice President of Styling Harley Earl and his team designed the 1952 Corvette concept car for the Motorama show. After receiving numerous accolades, it was rushed into production. Design chief Bill Mitchell used his design acumen and creative vision as he led his team to style the 1955-1957 Bel-Air. Zora Arkus-Duntov worked tirelessly and transformed the Corvette from a touring car into a genuine sports car. Ed Cole and his engineers overcame many challenges to develop the compact, efficient, and powerful Chevy small-block V-8, which continued in production for decades. Chevrolets of the 1950s retraces the design, development, and production of these cars, but it also covers innovative vital components that were installed in them. If you have been looking for the inside story on GM's arguably greatest decade, the models, and the technology it produced, you have found it.

Children's book awards have mushroomed since the early twentieth-century and especially since the 1960s, when literary prizing became a favored strategy for both commercial promotion and canon-making. There are over 300 awards for English-language titles alone, but despite the profound impact of children's book awards, scholars have paid relatively little attention to them. This book is the first scholarly volume devoted to the analysis of Anglophone children's book awards in historical and cultural context. With attention to both political and aesthetic concerns, the book offers original and diverse scholarship on prizing practices and their consequences in Australia, Canada, and especially the United States. Contributors offer both case studies of particular awards and analysis of broader trends in literary evaluation and elevation, drawing on theoretical work on canonization and cultural capital. Sections interrogate the complex and often unconscious ideological work of prizing, the ongoing tension between formalist awards and so-called identity-based awards — all the more urgent in light of the "We Need Diverse Books" campaign — the ever-morphing forms and parameters of prizing, and scholarly practices of prizing. Among the many awards discussed are the Pura Belpré Medal, the Inky Awards, the Canada Governor General Literary Award, the Printz Award, the Best Animated Feature Oscar, the Phoenix Award, and the John Newbery Medal, giving due attention to prizes for fiction as well as for non-fiction, poetry, and film. This volume will interest scholars in literary and cultural studies, social history, book history, sociology, education, library and information science, and anyone concerned with children's literature.

In the pages of Chevrolet Pickups, you'll find a legendary tale of how Chevrolet's line of trucks evolved from cars with beds to the sophisticated luxurious trucks of modern times. Mueller's text includes the rise of the Depression-era trucks that made Chevrolet the number one manufacturer of light pickups, and Chevy's 30-year run in that top spot. Mueller explains how the leaders and engineers at Chevrolet made the company's truck line such a dominant force — and goes in-depth on many specific models that had enormous impact on the pickup truck industry. "The complete history of Chevrolet trucks is covered, with side-trips that shed light on the GMC counterparts, competitive brands, and the ElCamino and Corvair pickups." Packed with photographs of beautifully restored pickup trucks, "Chevrolet Pickups tells the history of one of the (20th) century's greatest accomplishments."
