Photographer Brian Kelley has impulsively archived the rarely seen treasures over the past three years, uncovering a design portfolio with little to no credit to their respective designers. The growing collection displays a progressive design approach, from more typographic-driven covers, to the proliferation of duotone print production, culminating in the Unigridd system developed by Italian designer Massimo Vignelli in the 1970s.

Two leaders of the National Park Service provide a front-row seat to the disastrous impact of partisan politics over the past fifty years—and offer a bold vision for the parks' future. The US National Parks, what environmentalist and historian Wallace Stegner called America's "best idea," are under siege. Since 1972, partisan political appointees in the Department of the Interior have offered two conflicting views of the National Park Service (NPS): one vision emphasizes preservation and science-based decision-making, and another prioritizes economic benefits and privatization. These politically driven shifts represent a pernicious, existential threat to the very future of our parks. For the past fifty years, brothers Jonathan B. and T. Destry Jarvis have worked both within and outside NPS as leaders and advocates. National Parks Forever interweaves their two voices to show how our parks must be protected from those who would open them to economic exploitation, while still allowing generations to explore and learn in them. Their history also details how Congress and administration appointees have used budget and staffing cuts to sabotage NPS's ability to manage the parks and even threatened their existence. Drawing on their experience, Jarvis and Jarvis make a bold and compelling proposal: that it is time for NPS to be removed from the Department of the Interior and made an independent agency, similar to the Smithsonian Institution, giving NPS leaders the ability to manage park resources and plan our parks' protection, priorities, and future.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

The Office of Strategic Services, the forerunner of the Central Intelligence Agency, was founded in 1942 by William 'Wild Bill' Donovan under the direction of President Roosevelt, who realized the need to improve intelligence during wartime. A rigorous recruitment process enlisted agents from both the armed services and civilians to produce operational groups specializing in different foreign areas including Italy, Norway, Yugoslavia and China. At its peak in 1944, the number of men and women working in the service totaled nearly 13,500. This intriguing story of the origins and development of the American espionage forces covers all of the different departments involved, with a particular emphasis on the courageous teams operating in the field. The volume is illustrated with many photographs, including images from the film director John Ford who led the OSS Photographic Unit and parachuted into Burma in 1943.

NACTO's Urban Bikeway Design Guide quickly emerged as the preeminent resource for designing safe, protected bikeways in cities across the United States. It has been completely re-designed with an even more accessible layout. The Guide offers updated graphic profiles for all of its bicycle facilities, a subsection on bicycle boulevard planning and design, and a survey of materials used for green color in bikeways. The Guide continues to build upon the fast-changing state of the practice at the local level. It responds to and accelerates innovative street design and practice around the nation.
