In this age of climate change, killer germs, and obesity, it's easy to feel as if we've fallen out of synch with the global ecosystem. This ecological anxiety has polarized a new generation of Americans: many are drawn to natural solutions and organic lifestyles, while others rally around high-tech development and industrial efficiencies. Johnson argues that both views, when taken to extremes, can be harmful, even deadly. Johnson, raised in the crunchy-granola epicenter of Nevada City, California, lovingly and rigorously scrutinizes his family's all-natural mindset, a quest that brings him into the worlds of an outlaw midwife, radical doctors, renegade farmers and one hermit forester. Along the way, he uncovers paradoxes at the heart of our ecological condition: Why, even as medicine improves, are we becoming less healthy? Why are more American women dying in childbirth? Why do we grow fatter the more we diet? Why have so many attempts to save the environment backfired? In *All Natural\**--a sparkingly intelligent, wry, and scrupulously reported narrative--Johnson teases fact from faith and offers a rousing and original vision for a middle ground between natural and technological solutions that will assuage frustrated environmentalists, perplexed parents, and confused consumers alike.

The book covers 107 herbs and their medical uses in the treatment of diseases. It is divided into two parts- the first describes, in detail, 66 important herbs with strong healing powers and curative properties and the second describes, in brief, 41 herbs with comparatively milder properties. In each part herbs have been arranged alphabetically, according to their English names, as well as by trade names, where they are more popular by the trade name. While there are numerous books on herbs, the distinctive feature of this book is its reasonably comprehensive information about herbs, especially their uses in the treatment of various diseases.

Illuminates the far-reaching harms of believing that natural means "good," from misinformation about health choices to justifications for sexism, racism, and flawed economic policies. People love what 's natural: it 's the best way to eat, the best way to parent, even the best way to act—naturally, just as nature intended. Appeals to the wisdom of nature are among the most powerful arguments in the history of human thought. Yet Nature (with a capital N) and natural goodness are not objective or scientific. In this groundbreaking book, scholar of religion Alan Levinovitz demonstrates that these beliefs are actually religious and highlights the many dangers of substituting simple myths for complicated realities. It may not seem like a problem when it comes to paying a premium for organic food. But what about condemnations of "unnatural" sexual activity? The guilt that attends not having a "natural" birth? Economic deregulation justified by the inherent goodness of "natural" markets? In *Natural*, readers embark on an epic journey, from Peruvian rainforests to the backcountry in Yellowstone Park, from a "natural" bodybuilding competition to a "natural" cancer-curing clinic. The result is an essential new perspective that shatters faith in Nature 's goodness and points to a better alternative. We can love nature without worshipping it, and we can work toward a better world with humility and dialogue rather than taboos and zealotry.

Herbs that Heal DK Publishing (Dorling Kindersley)

Fifty common pet ailments and the natural methods and remedies optimal to support their treatment are arranged in alphabetical order. The book includes a thorough discussion of several natural healing modalities and how they are used for pets. The methods of treatment include nutrition, naturopathy, vitamins and minerals, herbs, homeopathy, acupuncture/acupressure, flower essences, and gemstones. Each method is discussed for each of the fifty illnesses. Many people use natural healing for themselves, but wonder how to use it for their dogs and cats. This book is a comprehensive answer to that question. Use it with Diane Stein's books *Natural Healing for Dogs and Cats* and *The Holistic Puppy*.

304 color pages, paperback, improved print quality, and a lot more plant identification details. This unique book is written by Dr. Nicole Apelian, an herbalist with over 20 years of experience working with plants, and Claude Davis, a wild west expert passionate about the lost remedies and wild edibles that kept previous generations alive. The Lost Book of Herbal Remedies has color pictures of over 181 healing plants, lichens, and mushrooms of North America (2-4 pictures/plant for easy identification). Inside, you'll also discover 550 powerful natural remedies made from them for every one of your daily needs. Many of these remedies had been used by our forefathers for hundreds of years, while others come from Dr. Nicole's extensive natural practice. This book was made for people with no prior plant knowledge who are looking for alternative ways to help themselves or their families. This lost knowledge goes against the grain of mainstream medicine and avoids just dealing with symptoms. Instead, it targets the underlying root cause and strengthens your body's natural ability to repair itself. With the medicinal herbal reference guide included, it's very easy to look up your own condition and see exactly which herbs and remedies can help. Let me just offer you a small glimpse of what you'll find inside: On page 145 learn how to make a powerful "relieving" extract using a common backyard weed. This plant acts directly on the central nervous system to help with all kinds of pain and discomfort. You'll also discover the most effective natural antibiotic that still grows in most American backyards (page 150). Turn to page 43 for the natural protocol Dr. Nicole is recommending for a wide range of auto-immune conditions, after falling prey to MS herself at age 29. I could go on and on because this book contains no less than 800+ other medicinal plants and natural remedies.

Rapid economic development has been a boon to human well-being, but comes at a significant cost to the fertile soils, forests, coastal marshes, and farmland that support all life on earth. If ecosystems collapse, so eventually will human civilization. One solution is inclusive green growth--the efficient use of natural resources. Its

genius lies in working with nature rather than against it. Green Growth That Works is the first practical guide to bring together pragmatic finance and policy tools that can make investment in natural capital both attractive and commonplace. Pioneered by leading scholars from the Natural Capital Project, this valuable compendium of proven techniques can guide agencies and organizations eager to make green growth work anywhere in the world.
