"HOW THESE SIMPLE HERBS WILL ENABLE YOU TO MASTER YOUR HEALTH!" Herbs are available everywhere vegetation is. Mankind and animals alike turn to herbs for healing. When medicine was modernized, people began to shun herbalists. Many years after conventional medicine came to be, people are beginning to go back to herbs. Researchers are racing to document the herbs in use in countries like India and china before time runs out. With deforestation and aging of herbalists, it's only a matter of time before this knowledge becomes extinct. Herbal traditions have been preserved through passing down from parents and grandparents to their children. With the advancement of technology, this knowledge can now be passed to people all over the world without time or space barriers. This book begins by explaining what herbal medicine is and why it matters. This is followed by a description of the

In the last few decades, people all across the planet have come to a realization - many of the products that we use everyday are made from harmful manmade chemicals. This extends to the repellents that we use for insects and other pests. While effective at thwarting off nature's critters, the long term effects of some early manmade pesticides and herbicides are just coming into the light. We have seen the harmful effects from years of these dangerous manmade chemicals. From an increase in cancer rates to a shocking rise in the number of reported cases

of autism, our modern world has provided great wonders that all too frequently are harmful for our body. The insect and bug repellents that are being sold today are wholly unnecessary. There long existed proven methods to repelling pests that do not rely on harmful chemicals. Using common ingredients from nature and around your home, this book serves as a guide for creating sprays and ointments that will keep bugs away from you and your home, without you having to worry about the after effects. The methods to repel insects in this book absolutely work. I have tested them myself and refined their formulas many times over the last five years. I come to you now with an answer, one that will solve repelling outdoor pests while still being an entirely natural solution. Start reading today and protect yourself from both harmful manmade chemicals and nature's pests. In This Book You Will Find: A brief overview of the benefits of natural bug and insect repellents. Natural and proven methods of repelling bugs, insects, arachnids, and other critters. Formulas that have been used personally, by me, and been tweaked for years to produce the best possible results. 31 proven methods for repelling just about every type of bug or insect. We rely on chemical cures to keep our bodies free from disease and our farms free from bugs and weeds. While human and agricultural health are rarely considered together, both are based on the same ecology, and both are being threatened by organisms that have evolved to resist our antibiotics and pesticides. Fortunately, scientists are finding new solutions that work with, rather than against, nature. There are viruses that bust apart bacteria; insect pheromones that throw crop-destroying moths into a misguided sexual frenzy; plant genes edited to protect against disease; and a resurgence of the ancient practice of fecal transplants. In this hopeful book, Monosson

offers a fascinating look into the future of natural defenses.
