The Organic Gardener's Handbook of Natural Pest and Disease Control CRC Press

In The Vegetable Garden Pest Handbook, you'll find the simple,

straightforward resources and tools you need to identify common pests of edible gardens and manage them without the use of synthetic chemical pesticides. Climate change and newly introduced insect pests are changing the world of gardening. Pests that once produced a single generation per year are now producing two or even three, and accidentally imported pest insects have no natural predators to keep them in check. These leaf-munching critters can cause significant damage in short order, reducing your yields and costing you time and money, especially if your garden is out of balance or your plants are stressed and vulnerable. Whether you're a new or seasoned gardener, author and garden pro Susan Mulvihill shows you how to handle pest issues by growing healthier plants, properly identifying the culprit, and nurturing the overall ecosystem of the garden. With easy-to-use charts, you'll learn how to identify common vegetable garden pests based on both the damage they cause and their physical appearance. DIY pest-control projects, coupled with up-to-date info on the best natural products, physical pest-control tricks, and tips for managing pests with the use of traps and barriers, all lead to a garden where beneficial insects and pollinators are preserved while pest populations are kept in check. Learn how to: Get rid of squash bugs with minimal effort Screen out root maggots Keep cutworms at bay Nurture the good bugs that help control tomato hornworms Tackle an infestation of mites, thrips, or whiteflies Send cucumber beetles packing Limit cabbage worms with a simple, inexpensive trick Learn about the best earth-friendly product controls for home vegetable gardeners Identifying and controlling common vegetable garden pests has never been a favorite task of gardeners, but with Susan's help, positive results are easier than you think!

Natural Pest Control - Simple Tips And Tricks To Keep Your Backyard And Plants Bug Free Anchor Books

In the last few decades, people all across the planet have come to a realization - many of the products that we use everyday are made from harmful manmade chemicals. This extends to the repellents that we use for insects and other pests. While effective at thwarting off nature's critters, the long term effects of some early manmade pesticides and herbicides are just coming into the light. We have seen the harmful effects from years of these dangerous manmade chemicals. From an increase in

cancer rates to a shocking rise in the number of reported cases of autism, our modern world has provided great wonders that all too frequently are harmful for our body. The insect and bug repellents that are being sold today are wholly unnecessary. There long existed proven methods to repelling pests that do not rely on harmful chemicals. Using common ingredients from nature and around your home, this book serves as a guide for creating sprays and ointments that will keep bugs away from you and your home, without you having to worry about the after effects. The methods to repel insects in this book absolutely work. I have tested them myself and refined their formulas many times over the last five years. I come to you now with an answer, one that will solve repelling outdoor pests while still being an entirely natural solution. Start reading today and protect yourself from both harmful manmade chemicals and nature's pests. In This Book You Will Find: A brief overview of the benefits of natural bug and insect repellents.
