The cultural rights of minorities are frequently discussed in political and public forums: the socio-legal literature emphasizes these rights and focuses on how they can be protected. This singular book deals, for the first time, with the cultural rights of the majority. With more than 230 million immigrants worldwide, majority groups increasingly feel a need to protect their culture. Liberal theory and human rights law recognize the rights of minority groups to maintain their unique cultural identity, yet assume that majority groups have neither a need for a similar right nor a moral basis for defending them. The Cultural Defense of Nations moves beyond these assumptions by asking two simple but important questions: is the cultural continuity of majority groups a legitimate purpose to restrict immigration; and is the immigrant's cultural background a legitimate criterion to restrict immigration? Changing patterns of contemporary immigration have motivated a new trend in liberal democracies: proactive immigration and naturalization policies designed to defend the culture of majority groups. This trend is fed by fears of immigration - some justified, some paranoid - which explain the rise of extreme right-wing parties in the West. The book reveals a troubling trend in liberal states, which, ironically, in order to protect liberalism, violate the very same values, and presents a liberal theory of cultural defense that distinguishes between justifiable and unjustifiable attempts of majority groups to protect their culture. It constructs liberal standards by which majority groups can welcome immigrants without fundamentally changing their cultural heritage, forsaking their liberal traditions, or gliding into extreme nationalism. The Cultural Defense of Nations presents a timely, thought-provoking thesis in one of the greatest challenges facing liberalism today the cultural rights of majority groups.

This book explores the concept of citizenship, and the role that organizations

can or do play in its creation, stimulation and control. Offering multiple organizational perspectives (private and public organisations) and their relation to several types of output (citizenship, poverty, profit, employability), this work presents a rich collection of philosophical thoughts and practices on the subject of citizenship within and without the organizational context. Particular attention is given to this human aspect, an element of unpredictability, a gut feeling, the unknown... something immeasurable that plays a part in human relations and how they organize themselves. Citizenship in Organizations casts new light on the impact of organizations to the notion of citizenship.

"Despite Canada's claim to be a gender equitable nation, militarism continues to function in ways that protect inequality." -from the Introduction Little has been done to examine, critique, and challenge the ways ingrained societal ideas of

militarism and gender influence lifelong learning patterns and practices of Canadians. Editor Nancy Taber and ten other contributors explore reasons why Canadian educators should be concerned with how learning, militarism, and gender intersect. Readers may be surprised to discover how this reaches beyond the classroom into the everyday lessons, attitudes, and habits that all Canadians are taught, often without question. Pushing the boundaries of education theory, research, and practice, this book will be of particular interest to feminist, adult, and teacher educators and to scholars and students of education, the military, and women's and gender studies. Contributors: Mark Anthony Castrodale, Gillian L. Fournier, Andrew Haddow, Cindy L. Hanson, Laura Lane, Jamie Magnusson, Robert C. Mizzi, Shahrzad Mojab, Snežana Ratkovi?, Roger Saul, Nancy Taber.

This book investigates judicial deference to the administration in judicial review, a concept and legal practice that can be found to a greater or lesser degree in every constitutional system. In each system, deference functions differently, because the positioning of the judiciary with regard to the separation of powers, the role of the courts as a mechanism of checks and balances, and the scope of judicial review differ. In addition, the way deference works within the constitutional system itself is complex, multi-faceted and often covert. Although judicial deference to the administration is a topical theme in comparative administrative law, a general examination of national systems is still lacking. As such, a theoretical and empirical review is called for. Accordingly, this book presents national reports from 15 jurisdictions, ranging from Argentina, Canada and the US, to the EU. Constituting the outcome of the 20th General Congress of the International Academy of Comparative Law, held in Fukuoka, Japan in July 2018, it offers a valuable and unique resource for the study of comparative administrative law.

This book is an interdisciplinary examination of several interconnecting aspects of migrant communities in the context of contemporary conflict and security. The book illustrates that within this globalised world, migrants have become key actors, living in the spaces between states, as well as within them. Arguing that migrants and their descendants are vital and complex constituencies for the achievement of security in this global age, the volume uses

a number of case studies, including Palestinian, Sri Lankan, Irish and Somali diaspora communities, to explore the different ways that such groups intersect with issues of security, and how these attitudes and behaviours have evolved in the context of political transnationalism and the global economy. Comparative and econometric studies of migration can provide a wide lens but at times fail to capture the depth and complexity of these communities and attitudes within them. At the same time, empirically focused studies are often case-specific and, while rich in local detail, lack comparative breadth or the ability to make connections and see irregularities across a number of contexts that might be of interest to scholars beyond that specific area. This book connects these literatures together more thoroughly. In particular, it demonstrates that political, cultural, economic and social factors all play important roles in helping us understand the actual (and potential) roles of migrant communities in conflict and the establishment of sustainable security within contemporary society. Lastly, given this context, the book seeks to examine the challenges and opportunities that exist, for such a sustainable security strategy to be developed. This book will be of much interest to students of migration and diaspora communities, peace and conflict studies, security studies and ethnic conflict.

Citizenship, Race, and the Law Cambridge University Press

This book, in its second edition, introduces readers to the economics of immigration, which is a booming field within economics. The main themes and objectives of the book are for readers to understand the decision to migrate, the impacts of immigration on markets and government budgets and the consequences of immigration policies in a global context. Our goal is for readers to be able to make informed economic arguments about key issues related to immigration around the world. This book applies economic tools to the topic of immigration to answer questions like whether immigration raises or lowers the standard of living of people in a country. The book examines many other consequences of immigration as well, such as the effect on tax revenues and government expenditures, the effect on how and what firms decide to produce and the effect on income inequality, to name just a few. It also examines questions like what determines whether people choose to move and where they decide to go. It even examines how immigration affects the ethnic diversity of restaurants and financial markets. Readers will learn how to apply economic tools to the topic of immigration. Immigration is frequently in the news as more people move around the world to work, to study and to join family members. The economics of immigration has important policy implications. Immigration policy is controversial in many countries. This book explains why this is so and equips the reader to understand and contribute to policy debates on this important topic.

Civic Education in the Twenty-First Century Springer

Over the past decade, a global convergence in

migration policies has emerged, and with it a new, mean-spirited politics of immigration. It is now evident that the idea of a settler society, previously an important landmark in understanding migration, is a thing of the past. What are the consequences of this shift for how we imagine immigration? And for how we regulate it? This book analyzes the dramatic shift away from the settler society paradigm in light of the crisis of asylum, the fear of Islamic fundamentalism, and the demise of multiculturalism. What emerges is a radically original take on the new global politics of immigration that can explain policy paralysis in the face of rising death tolls, failing human rights arguments, and persistent state desires to treat migration as an economic calculus.

Reforming the UK's Citizenship Test Harvard University Press

This handbook questions, debates and subverts commonly held assumptions about disability and citizenship in the global postcolonial context. Discourses of citizenship and human rights, so elemental to strategies for addressing disability-based inequality in wealthier nations, have vastly different ramifications in societies of the Global South, where resources for development are limited, democratic processes may be uncertain, and access to education, health, transport and other key services cannot be taken for granted. In a broad range of areas relevant to disability equity and transformation, an eclectic group of contributors critically consider whether, when and how citizenship may be used as a lever of change in circumstances far removed from UN boardrooms in New York or Geneva. Debate is polyvocal, with voices from the South engaging with those from the North, disabled people with nondisabled, and activists and politicians intersecting with researchers and theoreticians. Along the way, accepted wisdoms on a host of issues in disability and international development are enriched and problematized. The volume explores what life for disabled people in low and middle income countries tells us about subjects such as identity and intersectionality, labour and the global market, family life and intimate relationships, migration, climate change, access to the digital world, participation in sport and the performing arts, and much else.

Fear of the Family offers a comprehensive postwar history of guest worker migration to the Federal Republic of Germany, particularly from Greece, Turkey, and Italy. It analyzes the West German government's policies formulated to get migrants to work

in the country during the prime of their productive years but to try to block them from bringing their families or becoming an expense for the state.

What does political science tell us about important real-world problems and issues? And to what extent does and can political analysis contribute to solutions? Debates about the funding, impact and relevance of political science in contemporary democracies have made this a vital and hotly contested topic of discussion, and in this original text authors from around the world respond to the challenge. A robust defence is offered of the achievements of political science research, but the book is not overly sanguine given its sustained recognition of the need for improvement in the way that political science is done. New insights are provided into the general issues raised by relevance, into blockages to relevance, and into the contributions that the different subfields of political science can and do make. The book concludes with a new manifesto for relevance that seeks to combine a commitment to rigour with a commitment to engagement.

Uses poststructuralist theory to connect inclusion, exclusion and identity, using real-world case studies from British culture, politics and law. Lasse Thomassen applies a fresh, poststructuralist approach to reconcile the theoretical and practical issues surrounding inclusion, exclusion and representation. He opens up debates and themes including Britishness, race, the nature and role of Islam in British society, homelessness and social justice. Thomassen argues that the politics of inclusion and identity should be viewed as struggles over how these identities are represented. He develops this argument through careful analysis of cases from the last four decades of British multiculturalism, including public debates about the role of religion in British society, Gordon Brown and David Cameron's contrasting versions of Britishness, legal cases about religious symbols and clothing in schools, and the Nick Hornby novel *How to Be Good*.
