This manual provides the information necessary for successful homoeopathic treatment and prevention of many common infectious contagious diseases. Beyond that, the information herein provides an avenue for the treatment of disease without the use of vaccination. Often the decision not to vaccinate is backed by a mere 'hunch' or 'gut feeling' that vaccination may not be good for oneself or our children. Armed with the knowledge of homeopathy, not only will one be able to successfully treat the disease in question, but also the decision not to vaccinate will be validated by the wealth of information presented in these chapters. Overview Introduction to homeopathic philosophy Some of the adverse effects of vaccination on the immune system Homeopathic treatment of vaccine injury Individual chapters pertaining to the symptom development of infectious contagious disease Recommendations for homeopathic prevention and treatment for each disease

Homeopathy and Mental Health Care Oxford University Press

A look at the future of medicine based on cutting-edge stem cell research • Shares Dr. Biava ' s groundbreaking research on stem cell differentiation stage factors (SCDSFs) as a cellular “ reprogramming ” treatment for cancer and other degenerative diseases • Explains how SCDSFs restore communication between cells and the epigenetic code, the information that programs the normal function and growth of every living cell • Explores how the universe operates like a cosmic information-network and how this new scientific worldview will shape the future of healing and medicine The universe is not a mechanical system of matter--it operates like a cosmic network that runs on and is connected by information. Information “ in-forms ” and underlies all of the physical world, including the human body. In this book, Pier Mario Biava, M.D., and Ervin Laszlo, Ph.D., show how this “ information ” worldview can be applied to healing and medicine and, specifically, how it underlies a revolutionary new approach to cancer and disease treatment, one that works directly with the epigenetic code--the information that programs the function and growth of every living cell. The authors explain how tumor growth and cellular dysfunction are manifestations of disconnections in the information network of an organism. Unveiling Dr. Biava ' s groundbreaking research on

stem cell differentiation stage factors (SCDSFs), they explain how SCDSFs work directly as epigenetic regulators to reconnect aberrant cells to the body's information network and reset them to their original function--in the case of cancer cells transforming them from malignant to benign, from dysfunction back to normalcy and health. Dr. Biava's research on SCDSFs--derived from Zebrafish embryos, which have a very high percentage of proteins identical with those of human beings--has shown good success in reprogramming and inhibiting cancer cells in clinical trials with patients with advanced liver cancer, as well as success in in vitro studies with 7 different human tumor lines. SCDSFs have also shown promise in the treatment of chronic diseases such as psoriasis and neurodegenerative diseases. This research will also allow the development of new treatments for Alzheimer's, Parkinson's, and multiple sclerosis. Unveiling the holistic future of medicine, the authors show how we will no longer need to approach the treatment of cancer and other degenerative diseases as a "fight," but as a restoration of our cells' original programming. With the advent of Information Medicine, we now have the power to program ourselves to heal.

Integrative Addiction and Recovery offers an authentic model of comprehensive integrative modalities germane and specific to the field of addiction and recovery treatment. Although many treatment services for addiction include "holistic," "alternative," or "integrative" in their descriptions, they contain no substantive programs or services consistent with the mind, body, spirit paradigm contained within the integrative approach to health and healing. Consequently, many patients do not have the opportunity to benefit from the true spirit of an integrative approach within the discipline of addiction and recovery medicine. This book sets the standard for a bona fide integrative approach for others to follow, providing information that is immediately useful in clinical practice and rigorously evidence-based. Authored by world-class experts in the field of addiction medicine, Integrative Addiction and Recovery presents both scientific and holistic data regarding a wide variety of holistic and conventional approaches to the treatment of substance abuse and behavioral addictions. Its chapters cover both conventional and holistic treatment and provide background for each of the major classes of drugs of abuse, including opiates, alcohol, tobacco, stimulants, sedative-hypnotics, hallucinogens and marijuana. It also includes chapters on the topics of food addiction and behavioral addictions such as gambling and shopping. The authors explore the major holistic modalities, providing background and theory in areas like acupuncture, Traditional Chinese Medicine, Homeopathy, Aromatherapy, and Ayurvedic Medicine, while

at the same time providing spiritual approach chapters on Shamanism and Ibogaine, as well as more conventional issues with a holistic view including Co-Occurring Disorders and Psychosocial Treatment, and Group Support. The very complex issue of chronic pain and addiction is also addressed, along with relapse prevention strategies.
