developing models. Identify  
Dependent and Controlled  
Variables: A dependent  
variable is the variable that  
is being observed during an  
experiment.

*Nature of Science Study Guide*

Science is based on the premise that our senses, and extensions of those senses through the use of instruments, can give us accurate information about the Universe. Science follows very specific "rules" and its results are always subject to testing and, if necessary, revision.

Scientists study \_\_\_\_\_ – collections of structures, cycles, and processes that relate to and interact with each other. . Science is divided into \_\_\_\_\_ main branches that study different systems. 1. \_\_\_\_\_ science studies living things and how they interact.

---

2. Earth and space systems are studied in \_\_\_\_\_ science.

### **The Nature of Science--Study Guide**

a statement made in advance that expresses the results that will be obtained from testing a hypothesis if the hypothesis is supported; the expected outcome if a hypothesis is accurate. hypothesis. a testable prediction, often implied by a theory. inductive reasoning.

#### Study Guide Chapter 1 The Nature of Science

Don't fret, and certainly don't delete them (that's a big science no-no). There are ways to work around it. For example, if our data start off a long way from (0, 0), the good ol' axis break tells our graph viewer that some values are missing but that they aren't really relevant, so we won't miss them.

Nature of Science Study Guide Biol& 100 Learning Objectives Differentiate between inductive and deductive logic. Discuss the nature of science with specific emphasis on what constitutes a scientific theory. Discuss the design of a controlled study. Discuss appropriate interpretation of data, especially interpretation of graphs. Discuss peer-reviewed literature and the

role of media in scientific literacy.

[Printable Fifth Grade Science Worksheets and Study Guides.](#)

The goal of science is to learn about the natural world.

- Science distinguishes itself from other bodies of knowledge by using logical arguments and empirical evidence to gain knowledge about the natural world.
- Science is based on assumptions about the universe.

Nature Of Science Study Guide

Printable SCIENCE Worksheets and Study Guides.

SCIENCE is a way of learning about what is in the natural world, how the natural world works, and how the natural world became to be the way it is. Science relies on testing ideas with evidence gathered from the natural world. Science can lead to technological advances, as well as helping us learn about enormously important and useful topics, such as our health, the environment, and natural hazards.
