New England Reformers Ralph Waldo

Emerson Ralph Waldo Emerson (May 25,

1803 - April 27, 1882) was an American

essayist, lecturer, and poet who led the

transcendentalist movement of the

mid-19th century. He was seen as a

champion of individualism and a prescient

critic of the countervailing pressures of

society, and he disseminated his thoughts

through dozens of published essays and

more than 1,500 public lectures across

the United States. Emerson gradually

moved away from the religious and social

beliefs of his contemporaries, formulating

and expressing the philosophy of

transcendentalism in his 1836 essay

"Nature." Following this work, he gave a

speech entitled "The American Scholar" in

1837, which Oliver Wendell Holmes Sr.

considered to be America's "intellectual

Declaration of Independence." Emerson

wrote most of his important essays as

lectures first and then revised them for

print. His first two collections of essays,

Essays: First Series (1841) and Essays:

Second Series (1844), represent the core

of his thinking. They include the well-

known essays "Self-Reliance," "The Over-

Soul," "Circles," "The Poet" and

"Experience." Together with "Nature,"

these essays made the decade from the

mid-1830s to the mid-1840s Emerson's

most fertile period. Emerson wrote on a

number of subjects, never espousing fixed

philosophical tenets, but developing

certain ideas such as individuality,

freedom, the ability for humankind to

realize almost anything, and the

relationship between the soul and the

surrounding world. Emerson's "nature"

was more philosophical than naturalistic:

"Philosophically considered, the universe

is composed of Nature and the Soul."

Emerson is one of several figures who

"took a more pantheist or pandeist

approach by rejecting views of God as

separate from the world." He remains

among the linchpins of the American

romantic movement, and his work has

greatly influenced the thinkers, writers

and poets that followed him. When asked

to sum up his work, he said his central

doctrine was "the infinitude of the private

man." Emerson is also well known as a

mentor and friend of Henry David

Thoreau, a fellow transcendentalist.

Emerson was born in Boston,

Massachusetts, on May 25, 1803, a son of

Ruth Haskins and the Rev. William

Emerson, a Unitarian minister. He was

named after his mother's brother Ralph

and his father's great-grandmother

Rebecca Waldo. Ralph Waldo was the

second of five sons who survived into

adulthood; the others were William,

Edward, Robert Bulkeley, and Charles.

Three other children-Phebe, John Clarke,

and Mary Caroline-died in childhood.

Emerson was entirely of English ancestry,

and his family had been in New England

since the early colonial period. We are

delighted to publish this classic book as

A fresh and more capacious reading of the Western religious tradition on nature and creation, Thinking Nature and the Nature of Thinking puts medieval Irish theologian John Scottus Eriugena (810 – 877) into conversation with American philosopher Ralph Waldo Emerson (1803 – 1882). Challenging the biblical stewardship model of nature and histories of nature and religion that pit orthodoxy against the heresy of pantheism, Willemien Otten reveals a line of thought that has long made room for nature's agency as the coworker of God. Embracing in this more elusive idea of nature in a world beset by environmental crisis, she suggests, will allow us to see nature not as a victim but as an ally in a common quest for re-attunement to the divine. Putting its protagonists into further dialogue with such classic authors as Augustine, Maximus the Confessor, Friedrich Schleiermacher, and William James, her study deconstructs the idea of pantheism and paves the way for a new natural theology.
