Masculinity and Femininity Henry Holt

Discover the pioneering days of spearfishing and scuba diving, read about the sport's early spearmen and women and the founding fathers of scuba diving in Australia. This book takes you month by month from 1917 to 1997, through the good and bad times, the discoveries, the tragedies, the undersea explorations, as well as instructor organizations, diving achievers, and a number of important events which together comprise the history of underwater diving in Australia. Within the pages of this book is a large section dealing with the Chronicle of Sport Diving, events reported as though they had recently happened, recapturing all the important occurrences that took place during 80 years since Alex Wickham first speared fish in Sydney Harbour. Special features include newspaper reports of early spearfishing, the establishment of the first spearfishing association in 1948 and the appearance of the first home-made scuba regulator. There are thrilling and sometimes tragic stories of shark attacks. A woman skin diver was lost at sea for nearly three days and nights, and survived. There is the story of Australia's first and so far only world champion spearfisherman and that of two scuba divers who swam with a white pointer shark for half an hour in open water, yet were not attacked by the beast, the devastating deaths of four scuba divers in a sinkhole at Mt. Gambier, the rapid advance of underwater technology in Australia and much more. This is the only book of its kind dealing with the history of spearfishing and scuba diving in this country. For some, it will bring back old memories, for others a readable and authoritative history of spearfishing and scuba diving in Australia. For every diver, man or woman, it cannot fail to stir emotions as it recaptures exciting and historical events. At the end of the Second World War, a Frenchman, Michel Calluaud brought plans of the Gagnan-Cousteau regulator to Australia and he built one of the first in the world here. Australians could then use this equipment for work and pleasure and it has furthered their knowledge of life in the sea. As we push beyond the boundary of seashores and venture further under water we begin to discover many things that were once beyond our grasp and it is the aqualung that has enabled us to journey beyond the confinements of land. THE HISTORY OF SPEARFISHING AND SCUBA DIVING IN AUSTRALIA not only deals with the scuba diving, but also, as the title suggests, with a wealth of information concerning spearfishing and related underwater activities.

Hollywood detective Toby Peters does a job for one of Tinseltown's finest It's been four years since security guard Toby Peters got fired from the Warner Brothers lot for breaking a screen cowboy's arm. Since then he's scratched out a living as a private detective--missing persons and bodyguard work, mostly--but now his old friends, the Warners, have a job for him. Someone has mailed the studio a picture of Errol Flynn caught in a compromising position with a very young girl. Although Flynn insists it's a fake, the studio is taking no chances. Toby is to deliver the blackmailer \$5,000 and return with the photo negative. It should be simple, but Flynn, a swashbuckler on and off the screen, has a way of making things complicated. Though he isn't impressed by movie stars, if Toby Peters isn't careful he may end up dying for one. Codex Fej é rv á ry-Mayer Human Kinetics

In this visionary book, written by six internationally recognized Global Teacher Prize finalists, the authors create a positive and hope-filled template for the future of education. They address the hard moral, ethical and pedagogical questions facing education today so that progress can serve society, rather than destroying it from within our classrooms. This blueprint for education finally brings forward what has always been missing in education reform: a strong collective narrative with authentic examples from teachers on the front line. It is a holistic, personalized approach to education that harnesses the disruptions of the Fourth Industrial Revolution to better shape the future for the next generation, and ensure that every child can benefit from the ongoing transformations. A great read for anyone who has an interest in educating our youth for these uncertain times, highlighting why teachers will always matter.

Many societies assign sharply distinguished roles to men and women. Personality differences, as well as physical differences, between men and women are used to justify these different sex roles, and women are seen as more emotionally and interpersonally sensitive than men, while men are said to be more competent, achievement oriented, and assertive than women. A widely held view is that not only do men and women differ but that possession of "masculine" characteristics precludes possession of "feminine" characteristics. This bipolar conception has led to the definition of masculinity and femininity as opposites. Acceptance of this idea has caused social scientists and laypersons to consider men and women who possess cross-sex personality characteristics as less emotionally healthy and socially adjusted than those with sex-appropriate traits. Previous research by the authors and others, done almost exclusively with college students, has shown, however, that masculinity and femininity do not relate negatively to each other, thus supporting a dualistic rather than a bipolar conception of these two psychological dimensions. Spence and Helmreich present data showing that the dualistic conception holds for a large number of groups, varying widely in age, geographical location, socioeconomic status, and patterns of interest, whose psychological masculinity and femininity were measured with an objective instrument, the Personality Attributes Questionnaire, devised by the authors. Many individuals are shown to be appropriately sex-typed; that is, men tend to be high in masculinity and low in femininity and women the reverse. However, a substantial number of men and women are androgynous—high in both masculine and feminine characteristics—while some are not high in either. Importantly, the authors find that androgynous individuals display more self-esteem, social competence, and achievement orientation than individuals who are strong in either masculinity or femininity or are not strong in either. One of the major contributions of the work is the development of a new, multifaceted measure of achievement motivation (the Work and Family Orientation Questionnaire), which can be used successfully to predict behavior in both males and females and is related to masculinity and femininity in both sexes. In addition to investigating the correlates of masculinity and femininity, the authors attempt to isolate parental factors that contribute to the development of these characteristics and achievement motivation. The book includes analyses of data from students on their perception of their parents, which enable the authors to examine the influence of parental masculinity and femininity and parental behaviors and child-rearing attitudes on the development of masculinity and femininity and achievement motivation characteristics in their children. The important implications of these findings for theories of sex roles, personality development, and achievement motivation are examined.

A Reader of Substantive and Theoretical Contributions University of Texas Press

This volume initiates a new series of books on maritime or underwater archaeology, and as the editor of the series I welcome its appearance with great excitement. It is appropriate that the first book of the series is a collection of articles intended for graduate or undergraduate courses in underwater archaeology, since the growth in academic opportunities for students is an important sign of the vitality of this subdiscipline. The layman will enjoy the book as well. Academic and public interest in shipwrecks and other submerged archaeological sites is indicated by a number of factors. Every year there are 80 to 90 research papers presented at the Society for Historical Archaeology's Conference on Historical and Underwater Archaeology, and the Proceedings are published. Public interest is shown by extensive press coverage of shipwreck investigations. One of the most important advances in recent years has been the passage of the Abandoned Shipwreck Act of 1987, for the first time providing national-level law concerning underwater archeological sites. The legislation has withstood a number of legal challenges by commercial treasure salvors, a very hopeful sign for the long-term preservation of this nonrenewable type of cultural resource. The underwater archaeological discoveries of 1995 were particularly noteworthy. The Texas Historical Commission discovered the Belle, one of La Salle's ships, and the CSS Hunley was found by a joint project of South Carolina and a private nonprofit organization called NUMA.

An Insider's Guide to Becoming a Better Diver

This book is designed to be a physician's guide for those interested in diving and hyperbaric environments. It is not a detailed document for the erudite researcher; rather, it is a source of

information for the scuba-diving physician who is searching for answers put to him by his fellow nonmedical divers. Following the publication of *The Underwater Handbook: A Guide to Physiology and Performance for the Engineer* there were frequent requests for a companion volume for the physician. This book is designed to fill the void. Production of the book has been supported by the Office of Naval Research and by the Bureau of Medicine and Surgery, Research and Development Command, under Navy Contract No. N000014-78-C-0604. Our heartfelt thanks go to the many authors without whose contributions the book could not have been produced. These articles are signed by the responsible authors, and the names are also listed alphabetically in these preliminary pages. Every chapter was officially reviewed by at least one expert in the field covered and these reviewers are also listed on these pages. Our thanks go to them for their valuable assistance. We are grateful to Marthe Beckett Kent for editing Chapter III. Our thanks also go to Mrs. Carolyn Paddon for typing and retyping the manuscripts, and to Mrs. Catherine Coppola, who so expertly handled the many fiscal affairs.
