About this book (summarized translation of Madarijus-Salikin) itself seems to have two visions. One vision in the form of the writings of Ibn Qayyim and another vision is a critique or correction of the contents of the book Manazilus-Sa'irin. Madarijus-Salikin book was written by Shaykhul-Islam who was diligent in explaining the truth and spreading religion. Madarijus-Salikin book is one of the best books by Ibn Qayyim. I have referred to its summary in French and Indonesian languages and also its translation in English while preparing this book. Hope it is beneficial.

As your employer, the Navy is obligated by law to provide you with a safe and healthy work environment. Shipboard life, shipyard industrial activities, and aviation maintenance areas, especially, are inherently dangerous. We must keep our crewmembers, as well as civilian workers, healthy and ready to perform their missions. The Navy has conducted safety and occupational health programs for many years. Historically, general and

off-duty safety has been an element of the overall Navy safety program managed by Navy line functions. The Bureau of Medicine and Surgery (BUMED) conducts the occupational health program element.

This volume in the NATO Science for Peace and Security Series contains the papers of the Advanced Training Course (ATC) 'Legal Aspects of Combating Terrorism'. The purpose of this course was to support NATO on defence issues related to terrorism and united experts from various disciplines to give participants an understanding of how the various dimensions of the laws and their application fit together. In addition to the lectures that can be found in this book, the course was divided into three modules: the legal response to terrorism in general terms; combating terrorism using lawful means; and harmonizing the Law of Armed Conflict (LAC), national laws and NATO in the fight against terrorism. One of the main questions dealt with in this work is whether, in the face of the new threat, terrorism should still be countered through the ordinary means of criminal law, or whether there should be a significant shift in enforcement methods, including a less multilateral approach to decision-making and an increased use of military force.
