Civil engineer Samuel C. Florman's *The Civilized Engineer* is aimed at both those observing and commenting externally on engineering, and the practicing engineer—to reveal something of the art behind great engineering achievements, and to stimulate debate upon the author's hypothesis that "in its moment of ascendance, engineering is faced with the trivialization of its purpose and the debasement of its practice."

**NEW YORK TIMES BESTSELLER** • The extraordinary story of the World War II air, land, and sea campaign that brought the U.S. Navy to the apex of its strength and marked the rise of the United States as a global superpower Winner, Commodore John Barry Book Award, Navy League of the United States • Winner, John Lehman Distinguished Naval Historian Award, Naval Order of the United States With its thunderous assault on the Mariana Islands in June 1944, the United States crossed the threshold of total war. In this tour de force of dramatic storytelling, distilled from extensive research in newly discovered primary sources, James D. Hornfischer brings to life the campaign that was the fulcrum of the drive to compel Tokyo to surrender—and that forever changed the art of modern war. With a close focus on high commanders, front-line combatants, and ordinary people, American and Japanese alike, Hornfischer tells the story of the climactic end of the Pacific War as has never been done before. Here are the epic seaborne invasions of Saipan, Tinian, and Guam, the stunning aerial battles of the Great Marianas Turkey Shoot, the first large-scale use of Navy underwater demolition teams, the largest banzai attack of the war, and the daring combat operations large and small that made possible the strategic bombing offensive culminating in the atomic strikes on Hiroshima and Nagasaki. From the seas of the Central Pacific to the shores of Japan itself, *The Fleet at Flood Tide* is a stirring, authoritative, and cinematic portrayal of World War II 's world-changing finale. Who paved the way for the Marines, the Army, and the Air Force in World War II? The United States Naval Construction Battalion, better known as Seabees. Through their knowledge of the construction trades, the Seabees literally built the way for the war to be won. The "Enola Gay," the B-29 that dropped the atomic bombs over Japan and ended World War II, took off and landed on the Tinian Island airstrip built by Seabees. Think of it-no ports or harbors to unload ships, no airstrips to land on, no bridges to span the waterways. Where would we have been without these industrious veterans? Relive the experiences of the Seabees as they speak in their own words. Travel with them as young men just entering the service. Follow along as they reflect on the war with humor and poignancy. Become inspired with their insight and advice for today's world. Then you, too, will come to understand the meaning of the Seabee slogan, Can Do. If there wasn't a way, they would surely find one. As inscribed on the Seabee Memorial in Washington, D.C., "The Difficult We Do At Once, The Impossible Takes A Bit Longer."

This volume in the NATO Science for Peace and Security Series contains the papers of the Advanced Training Course (ATC) ' Legal Aspects of Combating Terrorism '. The purpose of this course was to support NATO on defence issues related to terrorism and united experts from various disciplines to give participants an understanding of how the various dimensions of the laws and their application fit together. In addition to the lectures that can be found in this book, the course was divided into three modules: the legal response to terrorism in general terms; combating terrorism using lawful means; and harmonizing the Law of Armed Conflict (LAC), national laws and NATO in the fight against terrorism. One of the main questions dealt with in this work is whether, in the face of the new threat, terrorism should still be countered through the ordinary means of criminal law, or whether there should be a significant shift in enforcement methods, including a less multilateral approach

to decision-making and an increased use of military force.

Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.
