on 02/27/12 11:25pm I'm looking at a couple of new

thirty three foot Class A motorhomes that are powered by a Navistar MaxxForce 7 diesel. I would like to get opinions on this engine from those who have experience with it and/or who know anything about it.

MaxxForce 7

In MaxxForce 7 guise, the engine produces between 200 – 230 hp (149 – 172 kW) and 580 – 620 lb ft (786 – 841 N m) of torque. [3] For the

2010 model year, Navistar has upgraded the MaxxForce 7 with dual compound turbochargers, giving it a new power range at 220 – 300 hp (164 – 224 kW) at 2600 rpm and 520 – 660 lb ft (705 – 895 N m) of torque at 1600 – 2200 rpm. [4]

Navistar Settles Class Action Over Faulty MaxxForce Engines
I have driven about 4 Navistar Maxxforce 7 diesels in IC full size school buses. They are a constant hassel re the

EGR and DPF system. Especially bad in typical Central Canada winter weather. The hyper EGR only emissions cleaning system causes unburnt diesel oil to wash past the piston rings contaminating the crankcase lube oil. Maxxforce 7 fuel in oil - MHH AUTO - Page 1
Navistar/MaxxForce Engine Overview. On September 27, 2012, Navistar announced that it was dropping its MaxxForce 15-liter heavy-duty diesel engine in favor of the Cummins ISX15, and that its 13-liter heavy-duty

diesel engine would continue to be built but would utilize selective catalyst reduction(SCR) technology instead of its, once prominent, exhaust gas recirculation-only(EGR) engine.

The MaxxForce 7 is a V8 and as you saw in the video has a lot of hardware attached to the basic block with the

remote mounted Bendix air compressor included. 3 of these buses have had failed high pressure fuel pumps. The engine oil gets diluted and reduces oil pressure. [Navistar/MaxxForce Engine Overview - Miller Weisbrod, LLP](#) Ford ended its relationship with Navistar due to a multitude of engine problems. Since 1994 Navistar had built every Ford V-8 Power Stroke engine used in Ford 's F-Series. But Ford discontinued their Navistar

built diesel V-8 diesel and in 2010 replaced the Navistar diesel with a new 6.7-liter diesel V-8 that Ford designed in-house. Navistar Maxxforce 7 Engine Problems hello guys, we just got in a truck with a 2012 Maxxforce 7 engine that constantly makes oil (fuel in oil). this is a common and known problem for Maxxforce 7 engines. yet Navistar fails to acknowledge and release a fix. i have a copy of all the work that has been

performed at the dealer to attack this issue, ECM flashes and oil changes seem to be their most favorite "repair" which never works. Navistar VT engine - Wikipedia After running some tests we found a low compression problem on the # 2 cylinder. This has happened to a few of the maxxforce 7 diesel engines in our fleet already. The lack of compression caused

by excessive engine wear turned into an engine replacement which luckily for us was covered by warranty. Goodbye Maxxforce - Daily Diesel Dose Maxxforce EGR issues INTERNATIONAL MAXXFORCE SUCKS!!!! Base Engine 7 Cooling System EGR Coolant Tubes There are several changes in the 2010 MaxxForce® 7 engine cooling system. The first is coolant flow through the EGR cooler. Two tubes route coolant from the front

cover to the EGR cooler and back. The forward tube is the supply to the cooler, and the rear is the return.

A class-action lawsuit filed July 10 by three trucking companies against Navistar-International echoes claims of similar lawsuits filed this week: The truck and engine maker knew its EGR-only...

The lawsuit claims that the engines could not handle the heat and pressure they generate, causing exhaust leaks and EGR cooler failures. Although this lawsuit does not apply solely to the MaxxForce 7 engine, the class action suit included any MaxxForce International engine purchased between 2008 and 2013. Most claims in the suits

involve early engine failures and breach of security laws by the manufacturer.
