Cambridge International a Level Information Technology Student's Book Prentice Hall

The Civil War is one of the most commonly studied topics in curriculum, but this book brings a fresh, interesting take. Bright illustrations, fast fact side bars, and a compelling narrative will enrapture your students. The epic struggle of the American Civil War witnessed the use of all the lethal tools of warfare then in existence. This well-documented narrative explores hand-held firearms, artillery, infantry and cavalry tactics, naval warfare,

espionage and terror, and the effectiveness of the strategies of the two sides.

Everyday Economics Baker Books
NOW A NATIONAL BESTSELLER New York Times bestselling authors Dan Abrams and David Fisher bring to life the incredible story of one of America's most publicized—and most surprising—criminal trials in history. No crime in history had more eyewitnesses. On November 24, 1963, two days after the killing of President Kennedy, a troubled nightclub owner named Jack Ruby quietly slipped into the Dallas police station and assassinated the assassin, Lee Harvey Oswald. Millions of Americans witnessed the killing on live television, and yet the event would lead to questions for years to come. It also would

help to spark the conspiracy theories that have continued to resonate today. Under the long shadow cast by the assassination of America's beloved president, few would remember the bizarre trial that followed three months later in Dallas, Texas. How exactly does one defend a man who was seen pulling the trigger in front of millions? And, more important, how did Jack Ruby, who fired point-blank into Oswald live on television, die an innocent man? Featuring a colorful cast of characters, including the nation's most flamboyant lawyer pitted against a tough-as-Texas prosecutor, award-winning authors Dan Abrams and David Fisher unveil the astonishing details behind the first major trial of the television century. While it was Jack Ruby who appeared

before the jury, it was also the city of Dallas and the American legal system being judged by the world.

Critical Care Transport Krause Publications

More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for

many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

Perfect Digestion McGraw Hill Professional

"It is beautiful to look at, hard to reach, and terribly difficult to climb. Winds of 200 kilometres per hour or more scream across it day and night, while the temperature falls to -20°C or lower. Every year, some who try to climb the highest mountain in the world do not return. But for a century

people have been coming to climb Everest - some alone, some in groups, but all with a dream of going to the highest place in the world. This is their story"--Back cover.

Financial Trading and Investing Haynes Publications

Fins Are Forever Jones & Bartlett Learning

Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, Critical Care Transport thoroughly prepares medical

professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway

management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.

Financial Trading and Investing, Second Edition, delivers the most current information on trading and market microstructure for undergraduate and master's students. Without demanding a background in econometrics, it explores alternative markets and highlights recent regulatory developments, implementations, institutions and debates. New explanations of controversial trading tactics (and blunders), such as high-frequency trading, dark liquidity pools, fat fingers, insider trading, and flash orders emphasize links between the history of financial regulation and events in financial markets. New sections on valuation and hedging techniques, particularly with respect to fixed income and derivatives markets, accompany

updated regulatory information. In addition, new case studies and additional exercises are included on a website that has been revised, expanded and updated. Combining theory and application, the book provides the only up-to-date, practical beginner's introduction to today's investment tools and markets. Concentrates on trading, trading institutions, markets and the institutions that facilitate and regulate trading activities Introduces foundational topics relating to trading and securities markets, including auctions, market microstructure, the roles of information and inventories, behavioral finance, market efficiency, risk, arbitrage, trading technology, trading regulation and ECNs Covers market and technology advances and innovations, such as execution

also trading, Designated Market Makers (DMMs), Supplemental Liquidity Providers (SLPs), and the Super Display Book system (SDBK)

The Illustrated Encyclopedia of American Trucks and Commercial Vehicles Douglas & McIntyre Limited

From how the current crisis happened to the role of banks to how money works, this book addresses complex ideas in an easy to understand Q&A format with lively prose. With examples throughout from personal finance issues such as how to negotiate the best price for a car, and should you buy a warranty for a new computer, to big picture questions that affect our national and global economy such as: What is deflation and inflation? How does monetary policy really work? How does a corporation actually go bankrupt?
