Gambling monkeys, dancing zombies and mountain lions on treadmills are just a few projects exposed in Wastebook 2014 - highlighting \$25 billion in Washington's worst spending of the year.Wastebook 2014 - the report Washington doesn't want you to read -reveals the 100 most outlandish government expenditures this year, costing taxpayers billions of dollars."With no one watching over the vast bureaucracy, the problem is not just what Washington isn't doing, but what it is doing." Dr. Coburn said. "Only someone with too much of someone else's money and not enough accountability for how it was being spent could come up some of these projects." "I have learned from these experiences that Washington will never change itself. But even if the politicians won't stop stupid spending, taxpayers always have the last word."Congress actually forced federal agencies to waste billions of dollars for purely parochial, political purposes.For example, lawmakers attached a rider to a larger bill requiring NASA to build a \$350 million launch pad tower, which was mothballed as soon as it was completed because the rockets it was designed to test were scrapped years ago. Similarly, when USDA attempted to close an unneeded sheep research station costing nearly \$2 million every year to operate, politicians in the region stepped in to keep it open.Examples of wasteful spending highlighted in "Wastebook 2014" include:• Coast guard party patrols - \$100,000• Watching grass grow - \$10,000• State department tweets @ terrorists - \$3 million• Swedish massages for rabbits - \$387,000• Paid vacations for bureaucrats gone wild - \$20 million• Mountain lions on a treadmill - \$856,000• Synchronized swimming for sea monkeys - \$50,000• Pentagon to destroy \$16 billion in unused ammunition -- \$1 billion• Scientists hope monkey gambling unlocks secrets of free will - \$171,000• Rich and famous rent out their luxury pads tax free - \$10 million• Studying "hangry" spouses stabbing voodoo dolls - \$331,000• Promoting U.S. culture around the globe with nose flutists - \$90 million

The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the

world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

United States Army Aviation Digest

This tool documents key but enduring aspects of how the Navy implements the Planning, Programming, Budgeting, and Execution process so that action officers and Navy leaders can successfully navigate and effectively contribute to the process.

Storage and Handling of Hazardous Material

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

Learn how to train your dog exactly as the U.S. military trains its canine soldiers. This manual is the Department of Defense's principle source of information on care, conditioning, and training of our nation's Military Working Dogs - such as "Cairo," the canine who served in the raid that killed Bin Laden. From basics, such as "HEEL" and "STAY" to negotiating obstacle courses, to tracking, searching, and even attacking . . . this manual shows readers how our military trains their dogs to be the best trained canines in the world. Contents include: * Veterinary Training Priorities * Principles of Conditioning and Behavior Modification * Patrol Dog Training * Clear Signals Training Method * Deferred Final Response * Detector Dog Training Validation * The Military Working Dog (WMD Program) * Facilities and Equipment * And more...

The Army Lawyer

The purpose of the ordnance corps is to support the development, production, acquisition and sustainment of equipment- including weapons systems and munitions- and to provide explosive ordnance disposal (EOD), during peace and war, to provide superior combat power to the United States (U.S.) Army. The ordnance corps has a rich and robust history of supporting the force dating back from the American Revolution to present day. The future of our nation and Army will continue to be engaged in an era of "persistent conflict" a period of protracted confrontation among states, non-state, and individual actors increasingly willing to use violence to achieve their political and ideological ends. The ordnance corps must evolve and remain the indispensable sustainment warfighting function in order for the Army to successfully execute simultaneous and protracted operations.
