Indian Navy is one of the most prestigious naval forces in the world, responsible for safeguarding our country above and below the surface of the ocean. Indian Navy Entrance Test or INET is a national-level entrance exam conducted for selection of Officers in various branches/entries of Indian Air Force such as Executive, Educational and Technical. Selected candidates are granted Permanent Commission (PC) and Short Service Commission (SSC) and undergo

training at the Indian Naval Academy (INA) Ezhimala, Kerala. The exam is conducted twice a year and is open for unmarried male and female candidates.

Alexander Milne was the pre-eminent naval administrator of the Victorian Royal Navy, spending eighteen years at the Admiralty between 1847 and 1876, over six of them as First Naval Lord. His

administrative career coincided exactly with the greatest technological upheaval in warfare at sea since sails supplanted oars, and he played an important role in almost every step of the Navy's transformation from sail to steam, wood to iron, and in the equally critical processes of devising a modern system of recruiting and training enlisted personnel, and evolving a coherent strategy suitable for a steam-powered fleet. This collection is drawn from a rich documentary record of Milne's and the Board's labours during the late 1840s and 1850s. It also encompasses Milne's earlier sea service, furnishing a unique glimpse of the maritime policing operations of the Navy during the Pax Britannica.

The critical link between psychology and the military is important to

---

recruiting, training, socializing, assigning, employing, deploying, motivating, rewarding, maintaining, managing, integrating, retaining, transitioning, supporting, counseling, and healing military members. These areas are hardly distinct, and the chapters in The Oxford Handbook of Military Psychology have contents that cross these boundaries. Collectively, the topics covered in this volume describe the myriad ways in which modern psychology influences warfare and vice versa. The extensive topics included come from within the areas of clinical, industrial/organizational, experimental, engineering, and social psychology. The contributors are top international experts in military psychology -- some uniformed soldiers, others academics and clinicians, and others civilian employees of the military or other government agencies. They address important areas in which the science and practice of psychology supports military personnel in their varied and complex missions. Among the topics addressed here are suitability for service, leadership, decision making, training, terrorism, socio-cultural competencies, diversity and cohesion, morale, quality-of-life, ethical challenges, and mental health and fitness. The focus is the ways in which psychology promotes the decisive human dimension of military effectiveness. Collectively, the 25 topical chapters of this handbook provide an overview of modern military psychology and its tremendous influence on the military and society as a whole.
