Boilermaking, Level 1 Prentice Hall

Welcome to the world of construction! You are joining the eight million Americans who have chosen a career in this lucrative field. Construction is one of the nation's largest industries, offering excellent opportunities for high earnings, career advancement, and business ownership. NCCER and Pearson are pleased to present the fourth edition of Core Curriculum: Introductory Craft Skills. This full-color textbook now includes nine modules for building foundation skills in construction. To help entry-level craftworkers step up their awareness of materials handling techniques and equipment, NCCER brings you "Introduction to Materials Handling." We are also excited to provide a revised "Basic Safety" module that now aligns to OSHA's 10-hour program. - Preface.

Pipefitting Level 2 Prentice Hall

This book explores California's prison system in the context of vocational education reform. For prisons in the early twenty-first century, ideologies of evidence-based management meant that reform efforts to change the purpose of prisons from punishment to rehabilitation through vocational education required "evidence" to justify policy prescriptions. Yet who determines what constitutes evidence? In political environments, solutions are typically pre-conceived, which means that the nature of the evidence collected is also preconceived. As a result, key assumptions about outcomes are often wished away to show improvement and be accountable. Through a detailed analysis interspersed with stories from the authors' experiences "behind the wall"

among California's prison population, the authors challenge the nature of evidence-based research as used in the prison environment. In the process they describe the thorny problems facing reformers.

A Critical Perspective on Evidence-Based Reform Prentice Hall

Welcome to the world of construction! Construction is one of the largest industries, offering excellent opportunities for high

earnings, career advancement, and business ownership. Work in

construction offers a great variety of career opportunities. People

with many different talents and educational backgrounds -- skilled

craftspersons, managers, supervisors, and superintendents -- find

job opportunities in construction and related fields. As you will

learn throughout your training, many other industries depend

upon the work you will do in construction. From houses and office

buildings to factories, roads, and bridges -- everything begins with

construction. -- Preface

Core Curriculum Prentice Hall

The Core Curriculum covers physiology, chemistry, psychology of renal failure, life on dialysis, and technology including water treatment, safe cannulation, and equipment. It helps teach new dialysis technicians and nurses to be capable and compassionate care providers who understand what to do & why.
