Pearson

Welcome to the world of construction! Construction is one of the largest industries, offering excellent opportunities for high earnings, career advancement, and business ownership. Work in construction offers a great variety of career opportunities. People with many different talents and educational backgrounds -- skilled craftspersons, managers, supervisors, and superintendents -- find job opportunities in construction and related fields. As you will learn throughout your training,

many other industries depend upon the work you will do in construction. From houses and office buildings to factories, roads, and bridges -- everything begins with construction. --

Sprinkler Fitting Level 1 Prentice Hall

This book explores California’s prison system in the context of vocational education reform. For prisons in the early twenty-first century, ideologies of evidence-based management meant that reform efforts to change the purpose of prisons from punishment to rehabilitation through vocational education required “evidence” to justify policy prescriptions. Yet who

determines what constitutes evidence? In political environments, solutions are typically pre-conceived, which means that the nature of the evidence collected is also preconceived. As a result, key assumptions about outcomes are often wished away to show improvement and be accountable. Through a detailed analysis interspersed with stories from the authors’ experiences “behind the wall” among California’s prison population, the authors challenge the nature of evidence-based research as used in the prison environment. In the process they describe the thorny problems facing reformers.
