Surgery Certified (NCCT)This 98-page review book offers a comprehensive review to prepare for your National Certified Tech in Surgery (TS-C (NCCT)) certification test. It features a brief outline of test content including categories to expect and an approximate percentage of each category on the exam. The book also contains review questions that have been divided into eight different categories for you to review. Answers to the questions are posted at the end of each chapter. The questions featured in this review book are general questions about being a Tech in Surgery and will not necessarily be included on the certification exam.National Certified Medical Assistant Exam Secrets Study Guide
In the last ten years the pediatric neurosurgeon has witnessed a real revolution in the diagnosis and treatment of pediatric hydrocephalus, the most frequently encountered condition in everyday clinical practice. The evolution of MRI and the advent of neuroendoscopic surgery have resuscitated the interest in the classification, etiology and pathophysiology of hydrocephalus. The book offers an updated overview on the recent progress in this field, and a new approach to hydrocephalus: the reader will find in it a modern and new presentation of an old disease, where genetics, endoscopy, cost-effectiveness analyses and many other aspects of the various therapies are extensively discussed. The volume will be useful not only for neurosurgeons, but for all specialists interested in the various aspects of hydrocephalus: pediatricians, radiologists, endocrinologists, pathologists and geneticists.
Acute Ischemic Stroke Springer Science & Business
There ' s no better way to get ready for your Medical Assisting certification exam! With some 2,500 practice questions and customized online tests, Elsevier ' s Medical Assisting Exam Review, 5th Edition provides complete preparation for all six certification exams — the CMA, RMA, CMAS, CCMA, CMAA, and CMAC. An illustrated, outline format makes it easy to review key medical assisting concepts and competencies, including anatomy and physiology, medical terminology, diseases and disorders, and administrative and clinical tasks. Written by medical assisting educator Deborah Holmes, this review includes answers and rationales for each question to help you strengthen any weak areas and prepare effectively for your certification exam.
UNIQUE! Six certification exams are covered: the CMA (AAMA), RMA (AMT), CMAS (AMT), CCMA (NHA), CMAA (NHT), and CMAC (AMCA). Convenient, easy-to-follow outline format provides at-a-glance review of the subject areas typically found on certification exams for Medical Assisting. Complete test preparation includes three pretests — administrative, clinical, and general — as well as a comprehensive posttest, with answers and rationales for all questions. Study tips and test-taking strategies provide advice and insight into preparing effectively for your certification exam. Hundreds of additional practice questions are included on the Evolve companion website, along with flash cards and A&P animations, to boost your exam readiness and test-taking confidence. NEW! 2,500 questions — including 550 all-new questions — include answers, rationales, and mapping to six exam blueprints (CMA, RMA, CMAS, CCMA, CMAA, and CMAC). NEW content includes coverage of the Affordable Care Act, ICD-10, electronic office systems, vaccination updates, and more. NEW! Online test generator allows you to focus your practice on any topic and to create timed simulated exams. NEW! Records Management chapter tackles both paper management and Electronic Health Records, emphasizing the most up-to-date electronic ways to manage records. UPDATED! High-quality illustrations reinforce your understanding of medical assisting content and include photos of clinical equipment and supplies.

Operations ... and also includes 1 FULL practice test, so that you will be ready on test day.

Secrets of the CST Exam Cambridge University Press
For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application. Learn more. Note: You are purchasing a standalone product; MyLab Nursing does not come packaged with this content. Students, if interested in purchasing this title with MyLab Nursing, ask your instructor to confirm the correct package ISBN and Course ID. If you would like to purchase both the physical text and MyLab Nursing search for: 0134874439 / 9780134874432 Child Health Nursing Plus MyNursingLab with Pearson eText -- Access Card Package Package consists of: 0134624726 / 9780134624723 Child Health Nursing 013486946X / 9780134869469 MyNursingLab with Pearson etext -- Access Code -- for Child Health Nursing NHA Phlebotomy Exam Study Guide Elsevier Health Sciences This open access book offers an essential overview of brain, head and neck, and spine imaging. Over the last few years, there have been considerable advances in this area, driven by both clinical and technological developments. Written by leading international experts and teachers, the chapters are disease-oriented and cover all relevant imaging modalities, with a focus on magnetic resonance imaging and computed tomography. The book also includes a synopsis of pediatric imaging. IDKD books are rewritten (not merely updated) every four years, which means they offer a comprehensive review of the state-of-the-art in imaging. The book is clearly structured and features learning objectives, abstracts, subheadings, tables and take-home points, supported by design elements to help readers navigate the text. It will particularly appeal to general radiologists, radiology residents, and interventional radiologists who want to update their diagnostic expertise, as well as clinicians from other specialties who are interested in imaging for their patient care.

Surgical Technology - Text, Workbook, and Surgical Instrumentation Package McGraw Hill Professional
Deliver the best patient care before, during, and after surgery with this straightforward, step-by-step guide to surgical skills and operating room procedures. It provides comprehensive coverage of all the updated AST Core Curriculum, 6th Edition components - health care sciences, technological sciences, patient care concepts, surgical technology, and surgical procedures. A mentoring approach makes even complex skills and techniques easy to understand. User-friendly features such as full-color illustrations, chapter outlines and summaries, review questions, critical thinking exercises, and technique boxes help you focus on the most important concepts and make it easier to retain and recall critical information. Chapter objectives correspond to the latest AST Core Curriculum objectives to ensure you have access to the most reliable information in the operating room. Enhanced critical thinking scenarios at the end of each chapter help you strengthen your critical thinking and clinical decision-making skills and highlight practical applications of key concepts. Additional information on special populations, including bariatric, pregnant, physically or mentally challenged, isolation, trauma, language barrier, and substance abuse patients, highlights important considerations for the surgical technologist regarding transfer, preparation, and procedure set up.Expanded coverage of surgical lasers keeps you up to date with the latest technology so you can effectively assess the function, assembly, use, and care of equipment in the surgical suite. Elsevier's Medical Assisting Exam Review - E-Book Cambridge University Press
Neurointervention is a fast-growing subspecialty, and recent trials have demonstrated its role in ischaemic and haemorrhagic stroke. This has generated tremendous interest among interventional neuroradiology, neurology and neurosurgery communities. Nevertheless, formal teaching programmes that provide the required experience are limited, and many early career practitioners are not exposed to the crucial technical details essential to safely performing the procedure before they start practising independently. The book presents 100 characteristic case studies to illustrate the salient technical and clinical issues in decision-making and problem solving during the procedure. This book conveys the “ real-world ” issues and solutions that are not addressed in detail in most books. As such it is a practical teaching book with useful “ tips and tricks ” on how to handle specific challenging situations, and is particularly useful for fellows in neurointervention training programmes..

Ophthalmology McGraw Hill Professional
"Surgical Technology Review: Certification and Professionalism was written as a review text for the certification exams for surgical technology, the National Board on Surgical Technology and Surgical Assisting (NBSTSA) Certification Examination for surgical technology (CST) and the Tech in Surgery - Certified (TS-C) exam administered by the National Center for Competency Testing (NCCT). The text is constructed in an outline format for ease of review and organization. The intent of the book is to provide a summary review for students to peruse the content outlines and assess their knowledge of a subject area by completing multiple-choice questions for each section of the outline"--
Geriatric Urology Mometrix Media LLC
Geriatric Urology outlines important topics in the care of elderly urology patients. The first section covers the biology of aging, the genitourinary system and disease screening including urologic conditions serving as warning signs of other disorders. Section two covers geriatric syndromes and urology including frailty, polypharmacy, dementia, wound healing, osteoporosis and endocrinology. Urologic conditions in older adults are explored in detail including urinary incontinence, pelvic organ prolapse, urinary tract infection, nocturia, and benign prostate diseases. Other topics covered include obtaining informed consent, development of advance directives, palliative medicine and care of the dying patient. Geriatric Urology is of great value to urologists, geriatricians, internists, residents and family practitioners.
Imaging of Foreign Bodies Springer Science & Business Media
This book brings together both a review and updates in clinical and research areas. The chapters will be of interest to a wide audience. On one hand, the review and update of clinical practices will interest students and residents, on the other, cutting edge research chapters will be of interest to the researchers in the field. The book is divided into four parts: 1) Review and Updates in Diagnostic Testing, 2) Updates in Anterior Segment Diseases, 3) Updates in Posterior Segment Diseases, and 4) Updates in Research in Ophthalmology, Optometry and Vision Science. The chapters are written by experts and individuals with special interests in topics with a focus on clinical application and translational benefit to eye care.
