This is an ethnographic study of the Vidya Bharati chain of schools in India which are run by a Hindu nationalist organization called the Rashtriya Swayamsevak Sangh (RSS). The first study of its kind, this volume is an important narrative on the role and impact of textbooks in modern India. Despite having limited resources (they are run on a tight budget) and

being based on a radical ideology that derives from a 'Hindu' nationalist agenda, the Vidya Bharati schools have achieved considerable success in the free market of private education and have grown to over 12,000 schools within 40 years. They are an important example of the interlinkage between ideology and nationalism in contemporary India. The author analyses school structure, curriculum, teaching quality, institutional goals, and ideology in an effort to identify reasons behind Vidya Bharati's success and to show through his field research that a combined strategy of pragmatism blended with ideology has allowed the schools to become highly sought-after. This analysis then asks broader questions about the failures of the public education system in India.

This comprehensive handbook introduces the reader to the education system in India in terms of its structural features, its relations with society and culture, and the debates that have shaped the present-day policy ethos. The book provides an overview of major debates that have shaped India's education systems, as well as the significant issues within higher and school education, education studies, and policies. Expert scholars provide a lucid analysis of complex themes such as the equity, access, and the quality of education. The volume also examines legal provisions and policies shaping the distribution structure and curricular issues in major areas of knowledge, as well as the provision of schools for the marginalised, economically weak, and people with disabilities. This new edition includes an analysis of

---

the private sector's participation in higher education and the technical and vocational education and training systems in India. This handbook will serve as a valuable resource and guide to educators and public policy practitioners seeking information about India's contemporary educational challenges. It will also be useful to scholars and researchers of education, public policy and administration, sociology, and political studies, as well as think-tanks, the media, policy-makers, and NGOs.

democracy has been under siege over textbooks in the 1970s, and from religious extremism in the furore over the Babri Masjid in the 1990s, to the another critical part of the world. As Nussbaum reveals in this penetrating look at India today, the forces of the Hindu right pose a disturbing threat to its democratic traditions and secular state. Nussbaum's long-standing professional relationship with India makes her an excellent guide to its recent history.

The writing of history in India has been fraught with controversies. From the storm

flaring up of religious sentiments over 'beef-eating' and the Ram Sethu, this book provides a synoptic view of teaching and writing of history in post-colonial India. Michael Gottlob explores historical research and teaching as important components contributing to the development of a national identity and ideas of citizenship in post-colonial India. He shows how the urge to decolonize and recover the self has given rise to several approaches that attempt to 'reclaim' Indian history from its colonial past. The book discusses diverse areas like methodological research and public use of history; cultural identity and diversity; nationalism and communalism; and social movements and deconstructs their far-reaching implications in contemporary India. It also

examines the role of women, Dalits, and Adivasis to understand their position in the multicultural reality of India.

The Social Contract Arihant Publications India limited First published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

**Two Treatises of Government** Oswaal Books and Learning Private Limited

Most studies on nations and nationalism argue that history, or more precisely a 'common past', is crucial for the process of national identity building. However, the existence of one or more concurrent narratives for the construction of this identity is often not accounted for, and there are cases where the 'common past' or a 'collective memory' is no longer shared. This book centres on the construction, elaboration and negotiation of the narratives that have become official history in India. These narratives influence politics and the representation of the nation. Depending on the chosen

---

definition of the nation, over 160 million Muslim Indians are either included or excluded from the nation, and considered as 'foreigners from inside'. The author shows that beyond the antagonism of two representations of history, two conceptions of the Indian nation - secular and Hindu nationalist - confronted each other during the history textbook controversy between 1998 and 2004. The diverging elements of the two discourses are underlined, and surprising similarities are uncovered. Yet, in contemporary India this convergence remains overshadowed in political debates as the definition of the political has been shaped by the opposition between these two visions of the nation. This book analyzes and questions the conception of the school textbook as a tool of national construction and more generally highlights the complexity of the link between

historiography, nation-state and nation-building.

The volume provides critical insights into approaches adopted by curricula, textbooks and teachers around the world when teaching about the past in the wake of civil war and mass violence, discerning some of the key challenges and opportunities involved in such endeavors. The contributors discuss ways in which history teaching has acted as a political tool that has, at times, been guilty of exacerbating inter-group conflicts. It also highlights history teaching as an important component of reconciliation attempts, showcasing examples of curricular reform and textbook revision after conflict, and discussing how the contestations and difficulties surrounding such processes were addressed in different post-conflict societies.
