Newton's Philosophiae Naturalis Principia Mathematica provides a coherent and deductive presentation of his discovery of the universal law of gravitation. It is very much more than a demonstration that 'to us it is enough that gravity really does exist and act according to the laws which we have explained and abundantly serves to account for all the motions of the celestial bodies and the sea'. It is important to us as a model of all mathematical physics. Representing a decade's work from a distinguished physicist, this is the first comprehensive analysis of Newton's Principia without recourse to secondary sources. Professor Chandrasekhar analyses some 150 propositions which form a direct chain leading to Newton's formulation of his universal law of gravitation. In each case, Newton's proofs are arranged in a linear sequence of equations and arguments, avoiding the need to unravel the necessarily convoluted style of Newton's connected prose. In almost every case, a modern version of the proofs is given to bring into sharp focus the beauty, clarity, and breath-taking economy of Newton's methods. Subrahmanyam Chandrasekhar is one of the most reknowned scientists of the twentieth century, whose career spanned over 60 years. Born in India, educated at the University of Cambridge in England, he served as Emeritus

Morton D. Hull Distinguished Service Professor of Theoretical Astrophysics at the University of Chicago, where he has been based from 1937 until his death in 1996. His early research into the evolution of stars is now a cornerstone of modern astrophysics, and earned him the Nobel Prize for Physics in 1983. Later work into gravitational interactions between stars, the properties of fluids, magnetic fields, equilibrium ellipsoids, and black holes has earned him awards throughout the world, including the Gold Medal from the Royal Astronomical Society in London (1953), the National Medal of Science in the United States (1966), and the Copley Medal from the Royal Society (1984). His many publications include Radiative transfer (1950), Hydrodynamic and hydromagnetic stability (1961), and The mathematical theory of black holes (1983), each being praised for its breadth and clarity. Newton's Principia for the common reader is the result of Professor Chandrasekhar's profound admiration for a scientist whose work he believed is unsurpassed, and unsurpassable.

NCERT Solutions for Class 9 Science Chapter 10 Gravitation Oswaal Books and Learning Private Limited

1. 'NCERT Solutions' a unique book containing Questions-Answers of NCERT Textbook based questions. 2. The present edition of Class 8th Science provide solutions to Textbook questions. 3. It is divided into 18 chapters, covering the syllabi of Science for Class VIII. 4. Comprehensive solutions help students to learn the concepts enhances thinking abilities. 5. Book covers the text matter into reading notes format covering all definitions, key words, important points, etc. 6. The book gives detailed well explained solutions to all the exercises. 7. It contains simplified text material in the form of quick reading notes. NCERT Textbooks play an immense role in developing student's understanding and knowledge about a subject and the concepts or topics covered under a particular subject. Keeping in mind this immense importance and significance of the NCERT Textbooks in mind, Arihant has come up with a unique book containing Questions-Answers of NCERT Textbook based questions. This book containing solutions to NCERT Textbook questions has been designed for the students studying in Class VIII following the NCERT Textbook for Science. The present book has been divided into 18 Chapters namely Crop Production Management, Microorganisms: Friend Foe, Synthetic Fibres & Plastics, Materials: Metals & Non-Metals, Coal & Petroleum, Combustion & Flame, Conservation of Plants & Animals, Cell: Structure Functions, Reproduction in Animals, Reaching the Age of Adolescence, Force Pressure, Friction, Sound, Chemical Effects of Electric Current,

Some Natural Phenomena, Light, Stars the Solar System and Pollution of Air & Water, covering the syllabi of Science for Class VIII. This book has been worked out with an aim of overall development of the students in such a way that it will help students define the way how to write the answers of the Science textbook based questions. The book covers selected NCERT Exemplar Problems which will help the students understand the type of questions and answers to be expected in the Class VIII Science Examination. Through comprehensive solutions, the students can learn the concepts which will enhance their thinking & learning abilities. For the overall benefit of the students, along with the solutions the book also covers the text matter of NCERT textbooks in easy reading notes format covering all definitions, key words, important points, etc. The book also contains Intext Questions, Paheli & Boojho Questions, Chapter End Exercises along with Selected NCERT Exemplar Problems. For the overall benefit of students the book has been designed in such a way that it not only gives solutions to all the exercises but also gives detailed explanations which will help the students in learning the concepts and will enhance their thinking and learning abilities. As the book has been designed strictly according to the NCERT Textbook of Science for Class VIII and contains simplified text material in the form of quick reading notes and answers to all the questions in lucid language, it for sure will help the Class VIII students in an effective way for Science.

Keeping in mind the immense importance and significance of the NCERT Textbooks for a student, Arihant has come up with a unique book containing only and all Question-Answers of NCERT Textbook based questions. This book has been designed for the students studying in Class IX following the NCERT Textbook of Science. The present book has been divided into two parts covering the syllabi of Science into Term I and Term II. Term-I covers chapters namely Improvement in Food Resources, Matter in Our Surroundings, Is Matter around us Pure, The Fundamental Unit of Life, Tissues, Motion, Force & Laws of Motion and Gravitation. Term-II section covers Atoms & Molecules, Structure of Atom, Diversity in Living Organisms, Why Do We Fall Ill, Work & Energy, Sound and Natural Resources. This book has been worked out with an aim of overall development of the students in such a way that it will help students define the way how to write the answers of the textbook based questions. This book has answer to each & every question covered in the chapters of the textbook for Class IX Science. Also each chapter in the book begins with a summary of the chapter which will help in effective understanding of the theme of the chapter and to make sure that the students will be able to answer all popular questions concerned to a particular chapter whether it is Long Answer Type or Short Answer Type Question. The book has been designed systematically in the simplest manner for easy comprehension of the chapters and their themes. The book also covers selected NCERT Exemplar Problems which will help the students understand the type of questions and answers to be expected in the actual Class IX Science CBSE Board Examination. As the book has been designed strictly according to the NCERT Textbook of Science for Class IX and provides a thorough and complete coverage of the textbook based questions, it for sure will help the Class IX students in an effective way for Science.
