The search for the biblical Philistines, one of
ancient Israel ' s most storied enemies, has
long intrigued both scholars and the public.
Archaeological and textual evidence
examined in its broader eastern
Mediterranean context reveals that the
Philistines, well-known from biblical and
extrabiblical texts, together with other related

groups of “ Sea Peoples, ” played a
transformative role in the development of new
ethnic groups and polities that emerged from
the ruins of the Late Bronze Age empires. The
essays in this book, representing recent
research in the fields of archaeology, Bible,
and history, reassess the origins, identity,
material culture, and impact of the Philistines
and other Sea Peoples on the Iron Age
cultures and peoples of the eastern
Mediterranean. The contributors are Matthew

Synoptic textbooks have played a major role in the intellectual advancement of U.S. curriculum studies. William F. Pinar argues for

a new synoptic text, summarizing recent and relevant research in the academic disciplines toward the subjective and social reconstruction of the public sphere that is the school classroom. Such a reconceptualization of curriculum development enables teachers to complicate the classroom conversations they themselves will lead. Subsequent essays demonstrate the thematic and methodological forms such curriculum development might take. Kiplinger's Personal Finance Springer Science & Business Media This collection of essays from world-renowned scholar Hans

Walter Gabler contains writings from a decade and a half of retirement spent exploring textual criticism, genetic criticism, and literary criticism. In these sixteen stimulating contributions, he develops theories of textual criticism and editing that are inflected by our advance into the digital era; structurally analyses arts of composition in literature and music; and traces the cultural implications discernible in book design, and in the canonisation of works of literature and their authors. Distinctive and ambitious, these essays move beyond the concerns of the community of critics

and scholars. Gabler responds innovatively to the issues involved and often endeavours to re-think their urgencies by bringing together the orthodox tenets of different schools of textual criticism. He moves between a variety of topics, ranging from fresh genetic approaches to the work of James Joyce and Virginia Woolf, to significant contributions to the theorisation of scholarly editing in the digital age. Written in Gabler's fluent style, these rich and elegant compositions are essential reading for literary and textual critics, scholarly editors, readers of James Joyce, New Modernism specialists,

and all those interested in textual scholarship and digital editing under the umbrella of Digital Humanities. Emerging Infectious Diseases ZML Corp LLC

Text and Controversy from Wyclif to Bale reflects and develops Anne Hudson's pioneering work in textual criticism and religious controversy from the late medieval period to the Reformation. Written by newly emergent as well as internationally recognised scholars, the volume explores the wide spectrum of religious thought and practices

between c.1360 and c.1560. Many essays, following the methodology of Anne Hudson's scholarship, engage in the close study of manuscripts and archival holdings, disclosing new material and offering significant re-evaluation of documentary evidence and neglected texts. At a time of urgent calls for the reform of the Church, both in Britain and in mainland Europe, the voices of heresy can not always be distinguished from those of orthodox critics. Anne Hudson's coinage of the term 'grey area' to describe the indeterminate boundary between radical orthodoxy and heterodoxy provides the lead for

investigations into theological debate, devotional habits, and censorship. The volume significantly redefines our understanding of texts, history, and controversies from Wyclif to Bale.

"As . . . newer approaches [to biblical criticism] become more established and influential, it is essential that students and other serious readers of the Bible be exposed to them and become familiar with them. That is the main impetus behind the present volume, which is offered as a textbook for those who wish to go further than the approaches covered in *To Each Its Own Meaning* by exploring more

recent or experimental ways of reading." from the introduction This book is a supplement and sequel to *To Each Its Own Meaning*, edited by Steven L. McKenzie and Stephen R. Haynes, which introduced the reader to the most important methods of biblical criticism and remains a widely used classroom textbook. This new volume explores recent developments in, and approaches to, biblical criticism since 1999. Leading contributors define and describe their approach for non-specialist readers, using examples from the Old and New Testament to help illustrate their discussion. Topics include cultural criticism, disability studies, queer criticism, postmodernism, ecological criticism,

new historicism, popular culture, postcolonial criticism, and psychological criticism. Each section includes a list of key terms and definitions and suggestions for further reading.

The textbook begins with a chapter on exclusivism, inclusivism, particularity and pluralism, and one on interfaith. Each chapter explains the history, rationale and workings of the various approaches. Moreover, each is divided into sub-sections dealing with various forms of each approach, so that each may be

appreciated in its individuality, i.e. the chapter on 'Inclusivism' will include sections on 'fulfilment theology' 'anonymous Christians', etc. The second part of this textbook deals with attitudes towards different faiths, considering the problems and relations that exist with Christian approaches to each. It will deal with the world's major faiths as well as primal religions and new religious movements. The introduction and conclusion will deal with some central themes that run throughout, in particular, the questions of the Trinity and concepts of salvation. In each section reference will be made to the key texts discussed in the Reader which accompanies this (9780334041155), however, the work may be read as a stand alone text.
