Public housing estates are disappearing from London's skyline in the name of regeneration, while new mixed-tenure developments are arising in their place. This richly illustrated book provides a vivid interdisciplinary account of the controversial urban policy of demolition and rebuilding amid London's housing crisis and the polarisation between the city's have-nots and have-lots. Drawing on extensive fieldwork and interviews with over 180 residents living in some of the capital's most deprived areas, Watt shows the dramatic ways that estate regeneration is reshaping London, fuelling socio-spatial inequalities via state-led gentrification. Foregrounding resident experiences and perspectives both before and during regeneration, he examines class, place belonging, home and neighbourhood, and argues that the endless regeneration process results in degeneration,

Over several generations villagers of Dominica have been shifting from Patwa, an Afro-French creole, to English, the official language.

Despite government efforts at Patwa revitalization and cultural heritage tourism, rural caregivers and teachers prohibit children from speaking Patwa in their presence.

Drawing on detailed ethnographic fieldwork and analysis of video-recorded social interaction in naturalistic home, school, village and urban settings, the study explores this paradox and examines the role of children and their social worlds. It offers much-needed insights into the study of language socialization, language shift and Caribbean children's agency and social lives, contributing to the burgeoning interdisciplinary study of children's cultures. Further, it demonstrates the critical role played by children in the transmission and transformation of linguistic practices, which ultimately may determine the fate of a language.
