Over several generations villagers of Dominica have been shifting from Patwa,

an Afro-French creole, to English, the official language. Despite government efforts at Patwa revitalization and cultural heritage tourism, rural caregivers and teachers prohibit children from speaking Patwa in their presence. Drawing on detailed ethnographic fieldwork and analysis of video-recorded social interaction in naturalistic home, school, village and urban settings, the study explores this paradox and examines the role of children and their social worlds. It offers much-needed insights into the study of language socialization, language shift and Caribbean children's agency and social lives, contributing to the burgeoning interdisciplinary study of children's cultures. Further, it demonstrates the critical role played by children in the transmission and

transformation of linguistic practices, which ultimately may determine the fate of a language.

In this first MaxCoder guide, Charles Max Wood shares with you the secrets behind finding your dream developer job. Whether you're a recent bootcamp graduate or a veteran programmer, it's often difficult to find a job you love. If you're unhappy with your current work opportunities or are having trouble finding your first or next programming job, this book will walk you through the process of not only find a job, but a job you'll love going to every day. Early in his career, Charles Max Wood found that he could either work a job he loved for a year before they downsized or laid people off or he could stay in jobs he hated forever. Realizing this, he began researching companies before applying to see if they were a fit. This book contains the techniques and tricks he learned for

identifying great companies to work for and then working through the people and systems he could find to put himself in front of the right people to get that next job. In many cases, he'd end up being interviewed for a job before it even got listed on job sites. Over the next several years, he coached dozens of other developers and helped them get placed in terrific companies working on technologies they enjoyed with people that challenged them doing work that mattered. Through his coaching, he realized that he couldn't help everyone one-on-one, so he put his approach into the book you hold in your hand.

A legendary figure in the realms of public policy and academia, John Gilderbloom is one of the foremost urban-planning researchers of our time, producing groundbreaking studies on housing markets, design, location, regulation, financing, and community building. Now, in *Invisible City*, he turns his eye to fundamental questions regarding housing for the elderly, the disabled, and the poor. Why is it that some locales can offer affordable, accessible, and attractive housing, while the large

majority of cities fail to do so? Invisible City calls for a brave new housing paradigm that makes the needs of marginalized populations visible to policy makers. Drawing on fascinating case studies in Houston, Louisville, and New Orleans, and analyzing census information as well as policy reports, Gilderbloom offers a comprehensive, engaging, and optimistic theory of how housing can be remade with a progressive vision. While many contemporary urban scholars have failed to capture the dynamics of what is happening in our cities, Gilderbloom presents a new vision of shelter as a force that shapes all residents.
