Managing contractors is a guide for small to medium-sized companies in the chemical industry, but it will also be of use to other industries and larger companies. Safe working with contractors presents a challenge, but being a smaller company has its advantages. You can be more flexible in your approach and decisions can be made more quickly. Lines of communication are shorter, usually there are not too many people involved and it is easier to

know who is around. In this guidance we aim to help you understand what you need to do and give sound practical advice for action. Working together helps everyone to work safely. This second edition brings guidance and references up to date.

Health and Safety: Risk Management is the clearest and most comprehensive book on risk management available today. This newly revised fifth edition takes into account new developments in legislation, standards and good practice. ISO 45001, the international health and safety management system standard, is given comprehensive treatment, and the latest ISO 9004 and ISO 19011 have also been addressed. The book is divided into four main parts. Part 1.1 begins with a basic introduction to the techniques of health and safety risk management and continues with a description of ISO 45001. Part 1.2 covers basic human factors including how the sense organs work and the psychology of the individual. Part 2.1 deals with more advanced techniques of risk management including advanced

incident investigation, audit and risk assessment, and Part 2.2 covers a range of advanced human factors topics including human error and decision making. This authoritative treatment of health and safety risk management is essential reading for both students working towards degrees, diplomas and postgraduate or vocational qualifications, and experienced health and safety professionals, who will find it invaluable as a reference.

This booklet provides advice and guidance to employers for assessment of their activities under the Control of Substances Hazardous to Health Regulations 1988 (COSHH). It replaces COSHH Assessments: A Step by Step Guide to Assessment and the Skills Needed for it published by HSE when COSHH was first introduced. This guidance takes note of the experience in assessment that has been gained since 1988 and the new requirement for regular review. The principles of assessment have not changed since COSHH first appeared, but this booklet illustrates them with extensive examples.

New EU Physical Agents Directives on Noise and Vibration will be incorporated into UK law by February 2006. Explicit action levels for vibration will be introduced, while the action levels for noise will be drastically cut. In order to comply with these Directives, companies need to assess noise and vibration levels and provide necessary protection for their employees. They are also required to monitor and if necessary reduce noise and vibration risks. Managing Noise and Vibration at Work introduces noise and both hand-arm and whole-body vibration by explaining what they are and how they can affect the body, drawing out the similarities and differences between the hazards. It provides clear explanations of the requirements of the EU Directives and explains how to fulfill them. Practical information on measurement, making noise and vibration assessments, and approaches to controlling risk help the reader to understand the issues of noise and vibration exposure in the workplace. The text is supported by information and diagrams of measuring equipment, advice on how to plan a survey, worked examples of necessary calculations, and charts and diagrams that can be used in place of the calculations. Suitable hearing and vibration protection is detailed. Case studies help to set the subject in context and highlight common errors and pitfalls. The book fully covers the syllabuses of the Institute of Acoustics' certificate courses in Workplace Noise Assessment and Management of Occupational Exposure to Hand-arm Vibration. It will also be of use to those studying for the Diploma in Acoustics and Noise Control. For those studying for the NEBOSH Diploma in Health and Safety, this book satisfies modules 1E and 2E. As the Institute

of Acoustics syllabuses are based on the Health and Safety Executive's guidelines, the book will also be a useful up-to-date reference for: risk managers; Health and Safety advisors and managers; occupational hygienists; environmental health officers; and HSE inspectors, especially in the Construction, Manufacturing, Agriculture and Forestry sectors. Tim South is a Senior Lecturer in Acoustics at the School of Health and Human Sciences at Leeds Metropolitan University, and a member of the Institute of Acoustics' Education Committee. He teaches the Institute of Acoustics courses for the Certificate of Competence in Workplace Noise Assessment, the Certificate in the Management of Occupational Exposure to Hand-arm Vibration, and also the Institute's Diploma in Acoustics and Noise Control. He has extensive consultancy experience in workplace noise assessments, hand-arm vibration and whole-body vibration exposure assessments.
