<p>NEBOSH Certificate in Environmental Management, which is a qualification aimed primarily at those in business who influence the environmental performance of their organisation by the decisions that they make as managers or the actions that they take as operators. This book aims to provide an introduction to the main areas of concern and how the challenges can be addressed. This new edition takes account of recent changes in international guidance and legislation and the recent update of the International Standard in Environmental</p>	<p>Management ISO 14001. The contents are important for businesses that wish to stay within the law and avoid adverse publicity. It explains how the concept of sustainability can be achieved in practice and what benefits – especially financial – that can accrue. Recent developments in the definitions of sustainability and the growing interest in the circular economy are introduced. It pays to be ahead of the game because decisions made now need to reflect an awareness of the coming pressures and there are opportunities available that can bring other benefits. This book is</p>	<p>intended for candidates for the NEBOSH qualification, but it will also be useful to anyone who wishes to understand the problems and how they can be tackled within their own organisations, be they industry, public service, voluntary bodies, or even as individuals. For the NEBOSH International General Certificate Routledge Internal auditing is an essential tool for managing compliance, and for initiating and driving continual improvement in any organization ' s systematic HSEQ performance. health and safety, environmental and quality management system standards – ISO 9001, ISO 14001 and ISO 45001. It delivers a powerful and proven approach to risk-based auditing of business-critical risk areas using ISO, or your own management systems. It connects the ‘ PDCA ’ approach to implementing management systems with auditing by focusing on the organization ’ s context and the needs and expectations of interested parties. The novel approach leads HSEQ practitioners and senior and line managers alike to concentrate on the most significant risks to their objectives, and provides a step-by-step route through The Audit Adventure™

to provide a high-level, future-focused audit opinion. The whole approach is aligned to the international standard guidance for auditing management systems (ISO 19011). This unique guide to HSEQ and operations integrity auditing has become the standard work in the field over three editions whilst securing bestseller status in Australasia, Europe, North America and South Africa. It is essential reading for senior managers and auditors alike – it remains the ‘ go to ’ title for those who aspire to drive a prosperous and thriving business based on world-class HSEQ management and performance. In The A Level Mindset, Steve Oakes and Martin Griffin share the secrets of coaching students to develop the characteristics, habits and mindsets which will help them realise their potential. Those students who make real and sustained progress at A level aren't necessarily the ones with superb GCSEs. Some students leap from average results aged 16 to outstanding results aged 18. Others seem to hit a ceiling. But why? It was in trying to answer this question that the VESPA system emerged. Steve and Martin have cut through the noise surrounding character development and identified five key characteristics that all students need to be successful: vision,

---

effort, systems, practice and attitude. These characteristics beat cognition hands down. Successful students approach their studies with the right behaviours, skills and attitudes: they understand how to learn and revise effectively, they're determined and organised, they give more discretionary effort and they get top results. Success at A level is a result of character, not intelligence. Much has been written about growth mindsets and character development in recent years, but teachers are still left wondering how to apply these ideas in their contexts: how can these theories help learners in practice? Taking cues from the work of Peter Clough, Carol Dweck and Angela Lee Duckworth, offers 40 easy-to-use and informed by their collective 30 plus years of teaching and coaching, Steve and Martin have spent years researching how character and behaviours affect student outcomes in their sixth form. After identifying the core traits that contributed to student success, they developed practical activities to help every student develop the A Level Mindset. Discover 40 concrete, practical and applicable tools and strategies that will supercharge learners' ambition, organisation, productivity, persistence and determination. Suitable for teachers, tutors, heads of sixth form or anyone else who wants to help A level students achieve their potential, The A Level Mindset offers 40 easy-to-use activities to develop students' resilience, commitment, buoyancy, motivation and determination. It could be your key to transforming student outcomes.
